Topic 1 - Question Set 1

Question #1 *Topic 1*

HOTSPOT -

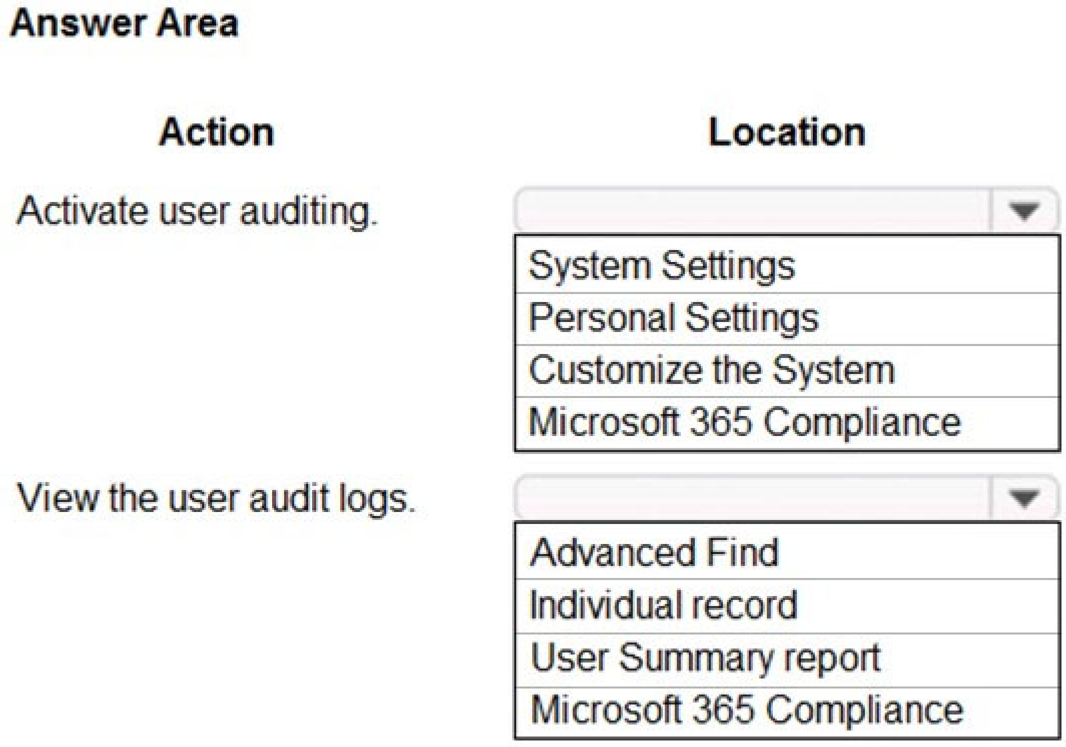
The owner of a company needs to know who signs into the system.

You need to ensure that the owner can view the user audit logs.

Where does each action need to be performed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:



Answer Area

Action **Location**

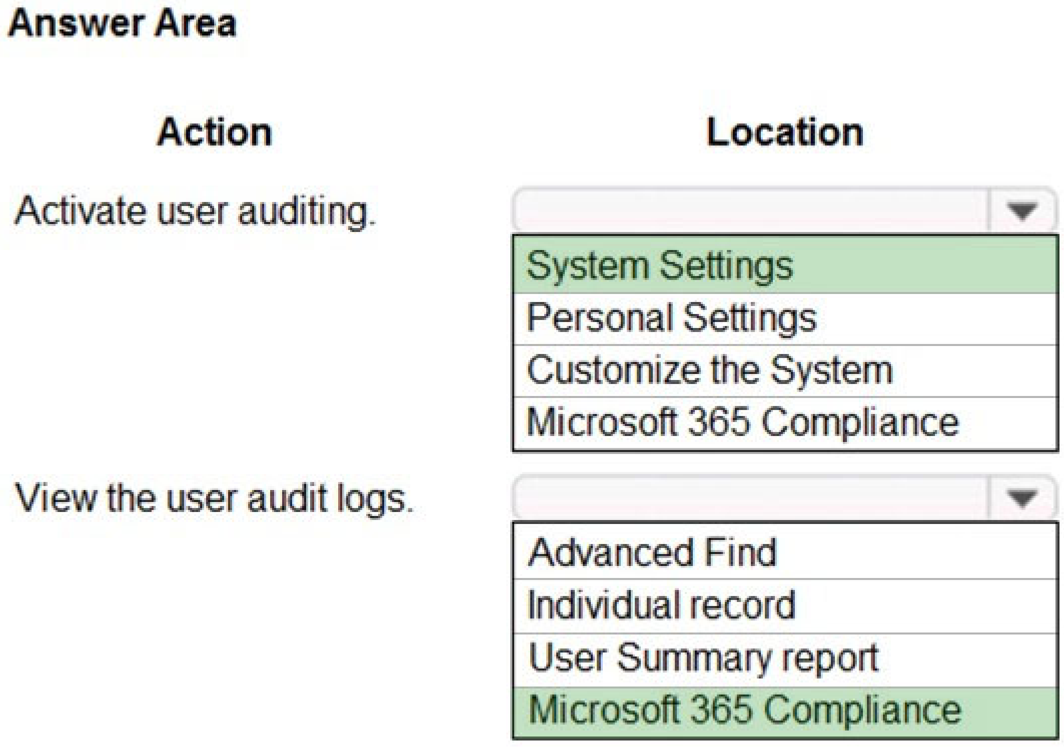
Activate user auditing.

- System Settings
- Personal Settings
- Customize the System
- Microsoft 365 Compliance

View the user audit logs.

- Advanced Find
- Individual record
- User Summary report
- Microsoft 365 Compliance

Correct Answer:



Answer Area

Action **Location**

Activate user auditing.

- 🟩 System Settings
- Personal Settings
- Customize the System
- Microsoft 365 Compliance

View the user audit logs.

- Advanced Find
- Individual record
- User Summary report
- 🟩 Microsoft 365 Compliance

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity

Question #2 *Topic 1*

HOTSPOT -

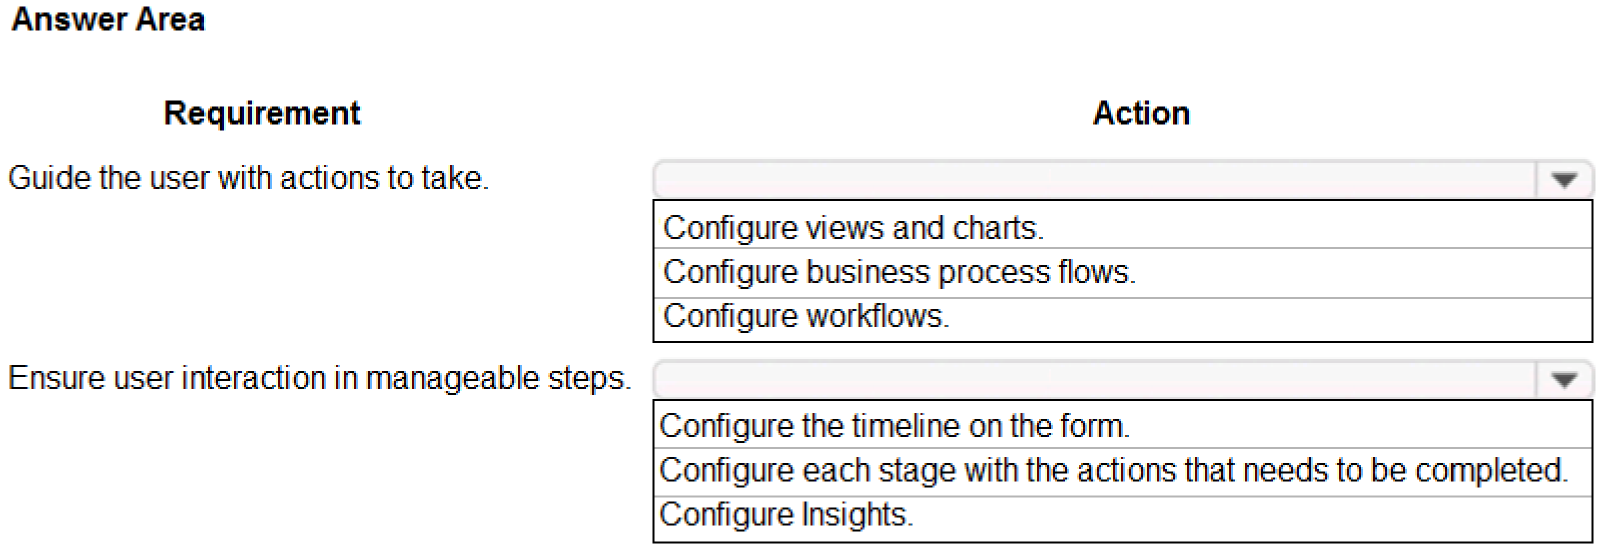
You are a Dynamic 365 administrator. You create a new solution in Dynamics 365.

You need to help end users understand which actions to take next and ensure that user interaction occurs in manageable steps.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

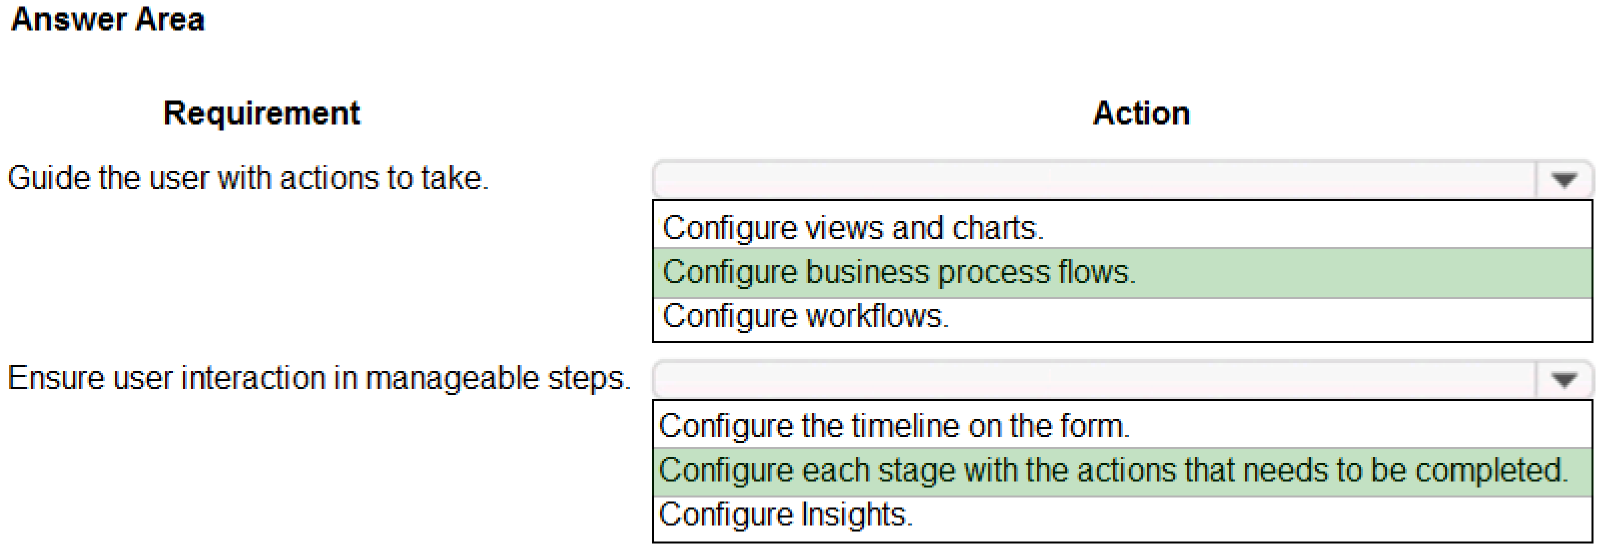
Hot Area:



Answer Area

Requirement	Action
Guide the user with actions to take.	Configure views and charts. Configure business process flows. Configure workflows.
Ensure user interaction in manageable steps.	Configure the timeline on the form. Configure each stage with the actions that needs to be completed. Configure Insights.

Correct Answer:



Answer Area

Requirement	Action
Guide the user with actions to take.	Configure views and charts. [✓ Configure business process flows.] Configure workflows.
Ensure user interaction in manageable steps.	Configure the timeline on the form. [✓ Configure each stage with the actions that needs to be completed.] Configure Insights.

Reference:

https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/business-process-flows-overview

Question #3 *Topic 1*

You create a Power Apps portal to provide training and documentation for students. Students create a profile on the portal and then select and pay for courses.

You plan to add free courses to the training portfolio. Free courses must be automatically available to all students when they sign in.

You need to assign default permissions to students.

What should you do?

A. Create a Students web role and set the Authenticated Users Role option to true. Assign the web role to each registered user.

B. Create an entity for managing free courses. Create entity permission records to provide access to entity records for free courses and assign the entity permissions to users when they register on the portal for the first time.

C. Create an entity for managing free courses. Create a Students web role and set the Authenticated Users role option to true. Create appropriate entity permissions to access the free course entity records and assign the entity permissions to the web role.

Correct Answer: *A*

Question #4

Topic 1

HOTSPOT -

You create workflows to automate business processes.

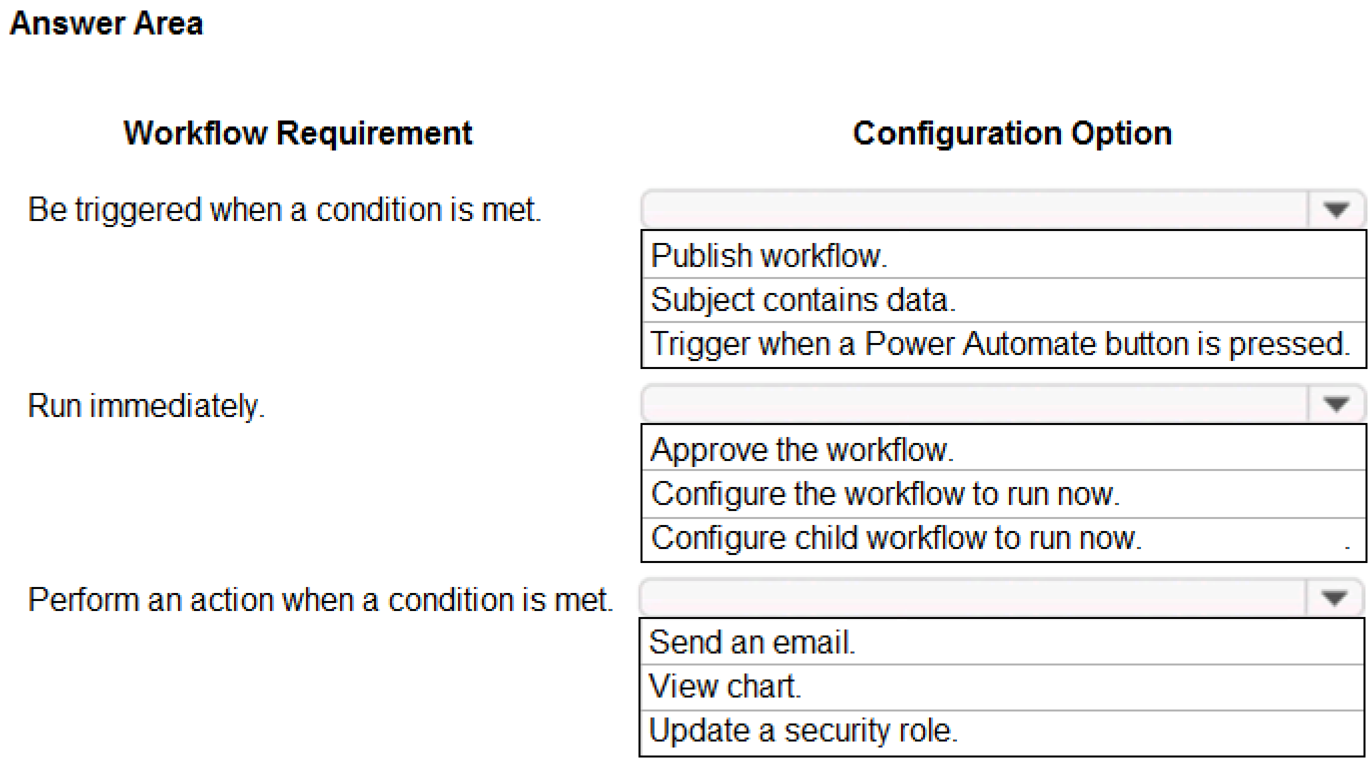
You need to configure a workflow to meet the following requirements:

- Be triggered when a condition is met.
- Run immediately.
- Perform an action when a condition is met.

You need to create a workflow that automatically sends emails based on a mail merge template. To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

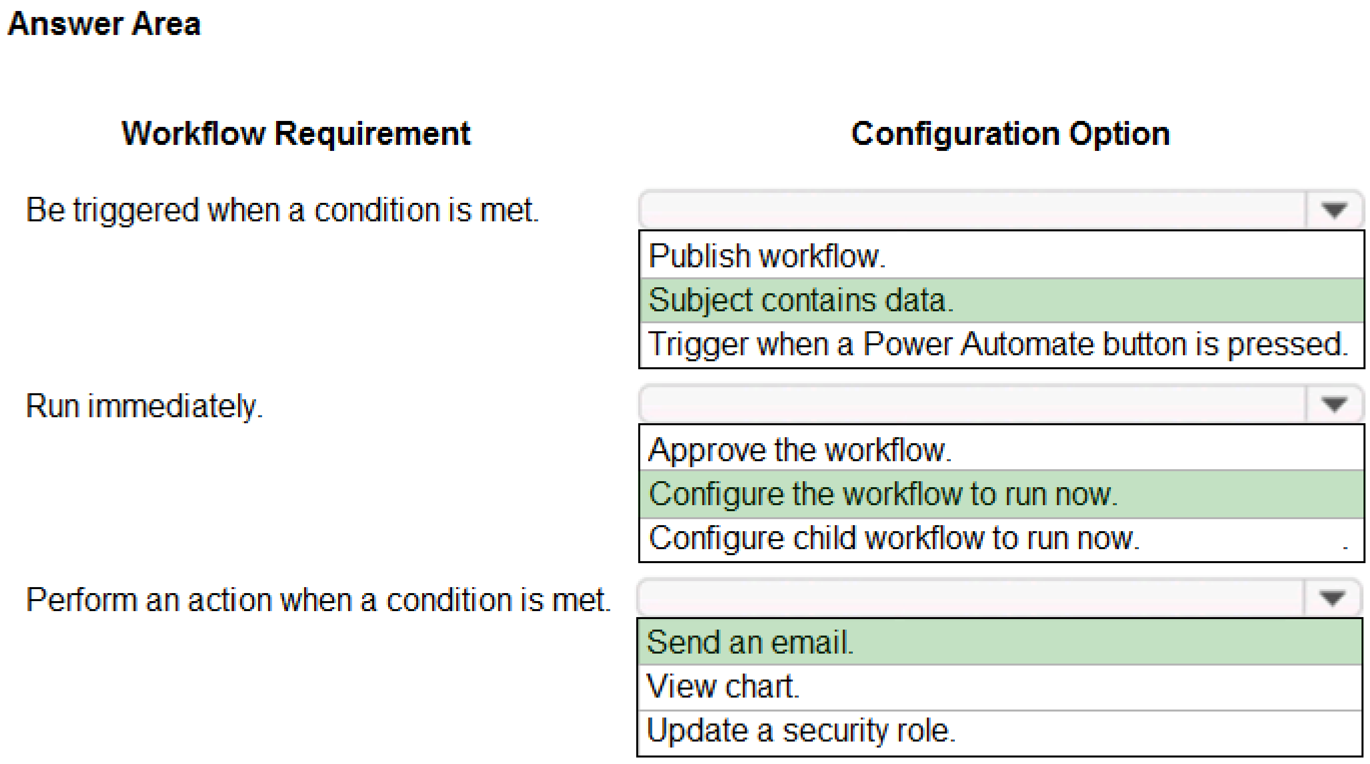
Hot Area:



Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	Publish workflow. Subject contains data. Trigger when a Power Automate button is pressed.
Run immediately.	Approve the workflow. Configure the workflow to run now. Configure child workflow to run now.
Perform an action when a condition is met.	Send an email. View chart. Update a security role.

Correct Answer:



Answer Area

Workflow Requirement	Configuration Option
Be triggered when a condition is met.	Publish workflow. [✓ Subject contains data.] Trigger when a Power Automate button is pressed.
Run immediately.	Approve the workflow. [✓ Configure the workflow to run now.] Configure child workflow to run now.
Perform an action when a condition is met.	[✓ Send an email.] View chart. Update a security role.

Question #5 *Topic 1*

HOTSPOT -

You are a Dynamics 365 Customer Service administrator.

You need to configure the following automation for the sales team:

➾ Send an email when the status changes on an Opportunity.

➾ Text the sales manager when an Opportunity is created.

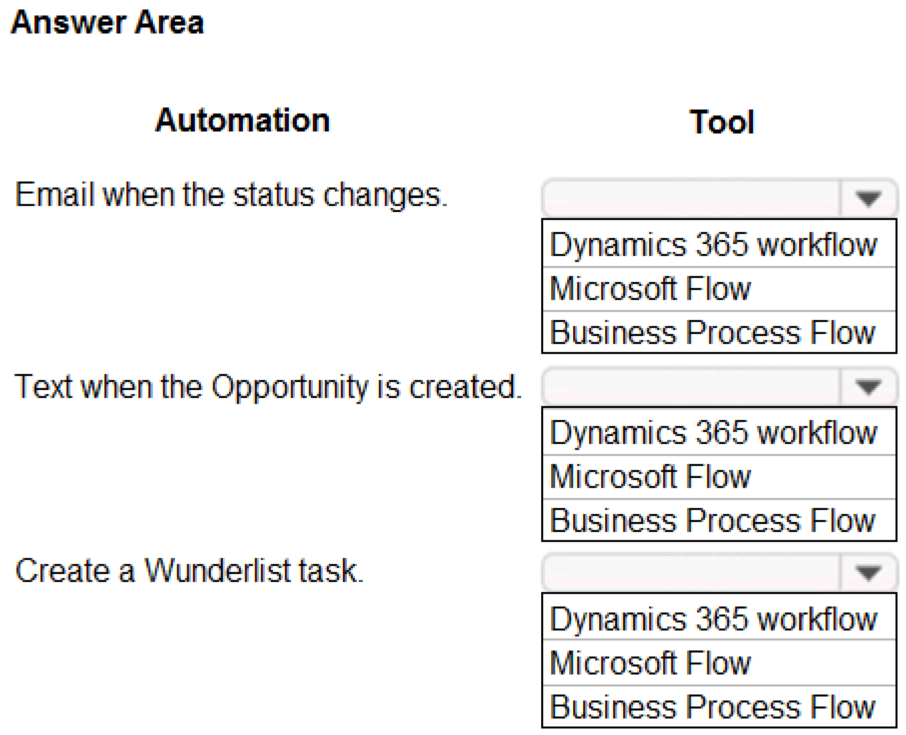
Create a Wunderlist task when an Opportunity is open for 30 days.

▪

Which tool should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

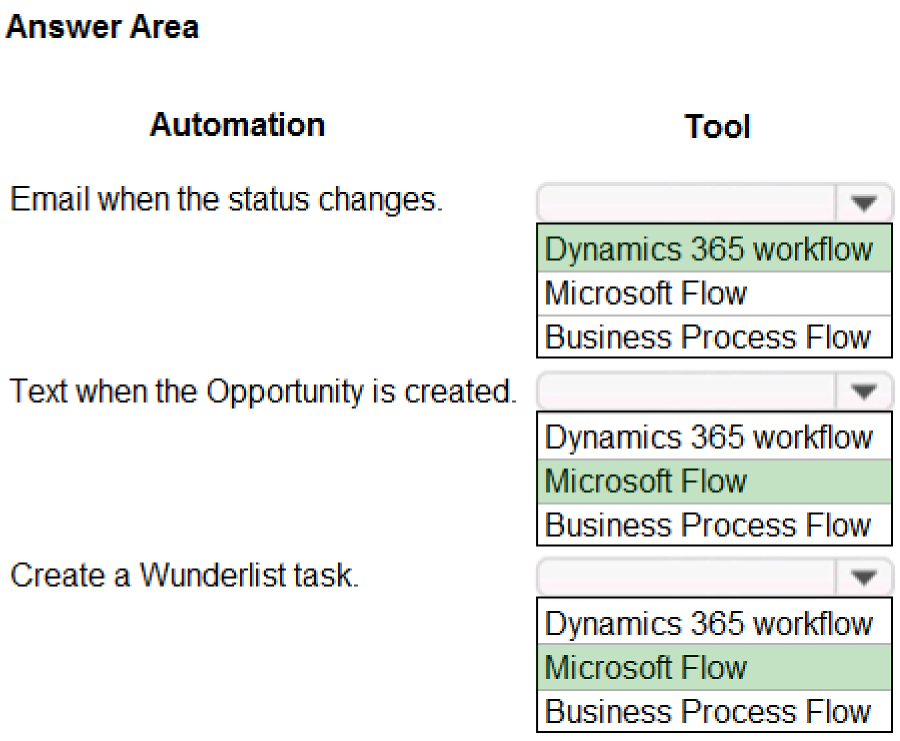
Hot Area:



Answer Area

Automation	Tool
Email when the status changes.	Dynamics 365 workflow Microsoft Flow Business Process Flow
Text when the Opportunity is created.	Dynamics 365 workflow Microsoft Flow Business Process Flow
Create a Wunderlist task.	Dynamics 365 workflow Microsoft Flow Business Process Flow

Correct Answer:



Answer Area

Automation	Tool
Email when the status changes.	[✓ Dynamics 365 workflow] Microsoft Flow Business Process Flow
Text when the Opportunity is created.	Dynamics 365 workflow [✓ Microsoft Flow] Business Process Flow
Create a Wunderlist task.	Dynamics 365 workflow [✓ Microsoft Flow] Business Process Flow

Question #6 *Topic 1*

A company uses Common Data Service to manage prospects. The company has a business process flow named BPFA that is associated with the Prospect entity to streamline the prospect management process.

You add a field named Category to the Prospect entity. You create additional business process flows. You apply the business process flows to Prospect records based on the selected category. Users can switch to any other newly configured business process flows but must not use BPFA.

You need to configure the solution.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Remove all of the privileges for BPFA.

B. Use a business rule to prevent users from switching to BPFA.

C. Deactivate BPFA.

D. Change the display order of the business process flows to move BPFA to the bottom of the list.

Correct Answer: *AC*

Question #7 *Topic 1*

You are creating a business rule to implement new business logic.

You must apply the business logic to a canvas app that has a single screen named Screen1.

You need to configure the scope for the business rule.

Which scope should you use?

A. Screen1

B. Entity

C. All Forms

D. Global

Correct Answer: *B*

Note: Some terminology has changed. Entity is now Table. If you're building a Canvas app, you must use table (entity) as the scope.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

Question #8 *Topic 1*

HOTSPOT -

You are a Dynamics 365 Customer Services administrator. You have a Production instance and Sandbox instance.

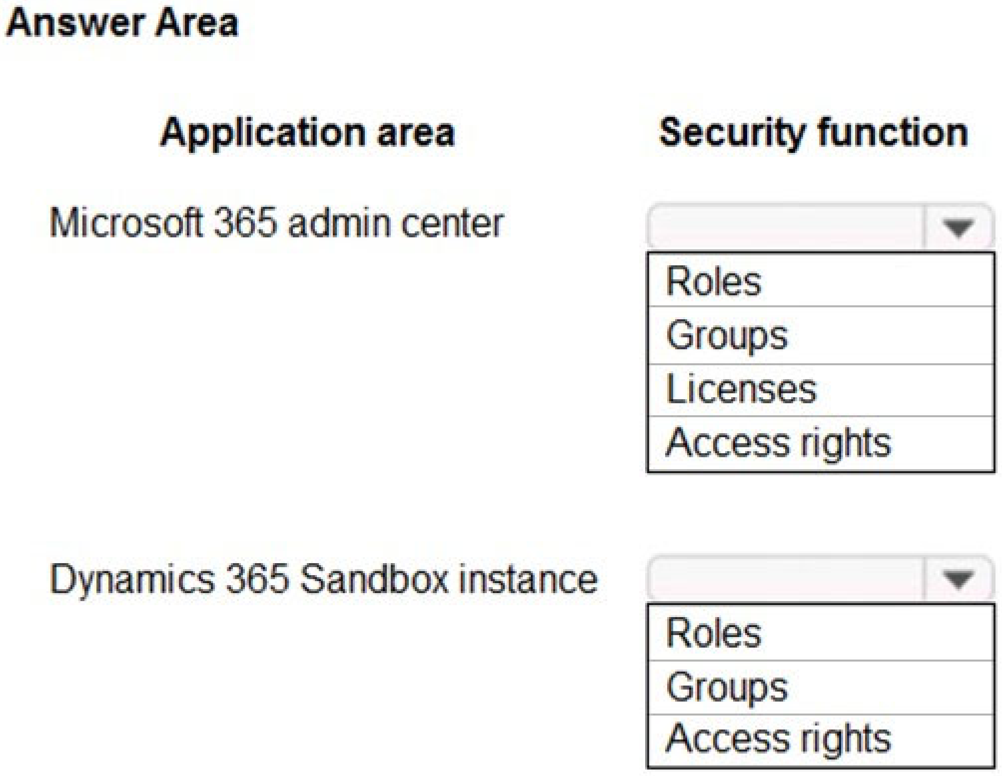
Users record Production instance data in the Sandbox instance.

You need to ensure that the users only record data in the Production instance.

Which security function needs to be edited to prevent access to the Sandbox? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

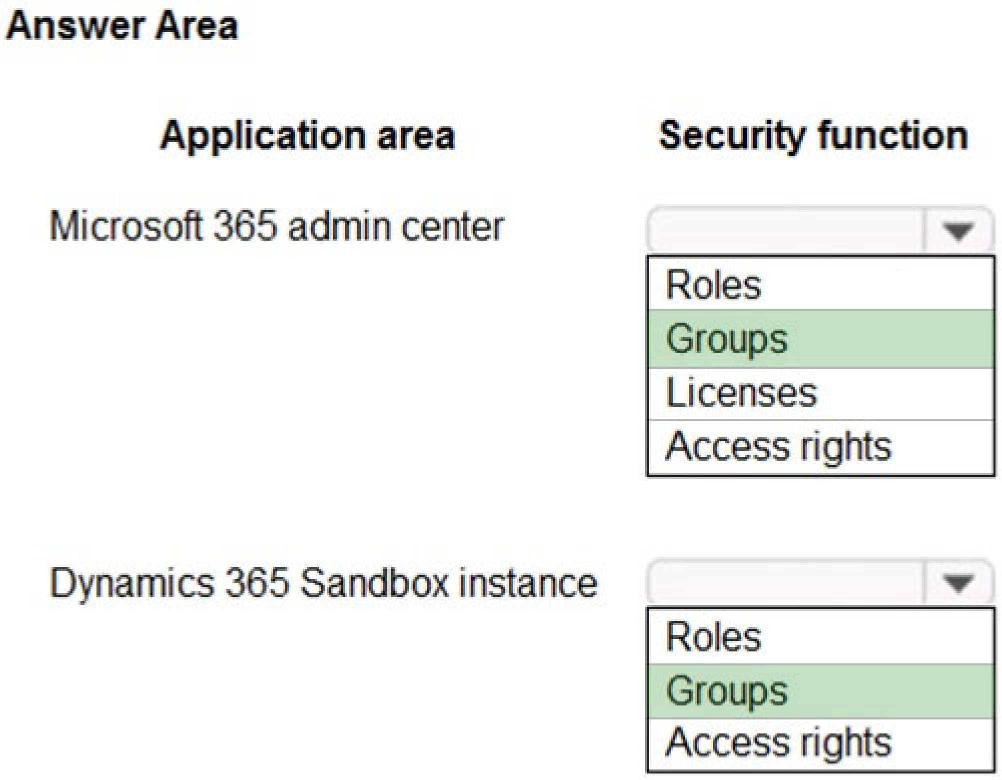
Hot Area:



Answer Area

Application area	Security function
Microsoft 365 admin center	Roles Groups Licenses Access rights
Dynamics 365 Sandbox instance	Roles Groups Access rights

Correct Answer:



Answer Area

Application area	Security function
Microsoft 365 admin center	Roles [✓ Groups] Licenses Access rights
Dynamics 365 Sandbox instance	Roles [✓ Groups] Access rights

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/control-user-access

Question #9 *Topic 1*

You must create a new entity to support a new feature for an app. Entity data will be transactional and will be associated with business units.
You need to configure entity ownership.
Which entity ownership type should you use?

A. user or team owned

B. organization-owned

C. none

D. business-owned

Correct Answer: *A*

Question #10

Topic 1

HOTSPOT -

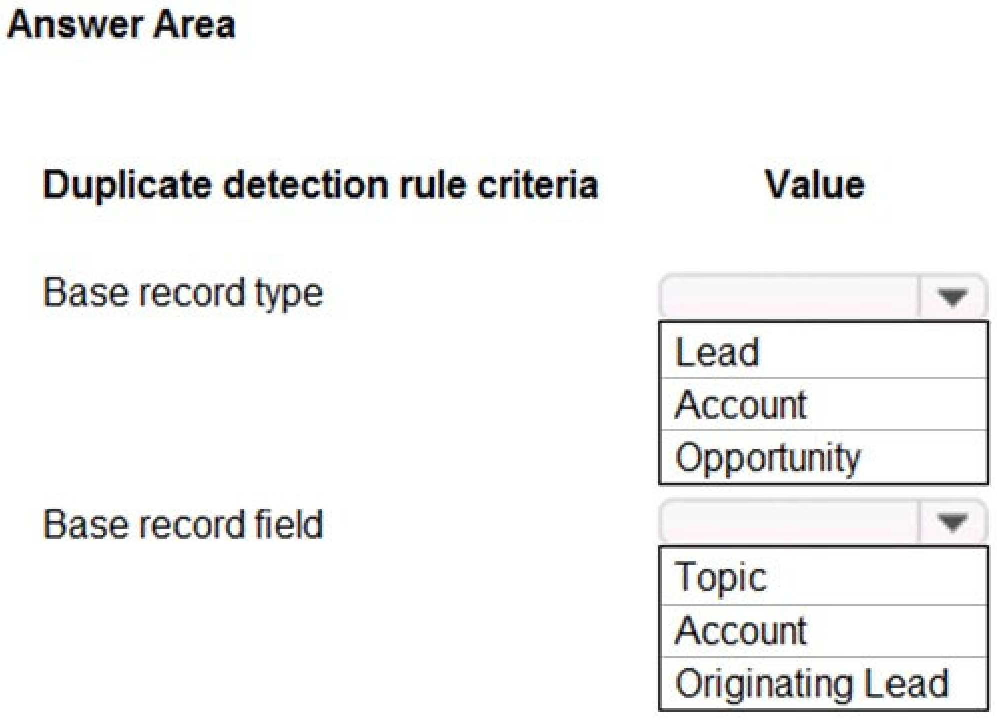
You need to ensure that there are no leads for a customer before you create a new opportunity for the customer.

How can you use duplicate detection rules to achieve this goal? To answer, select the appropriate options in the answer area.

NOTE:

Each correct selection is worth one point.

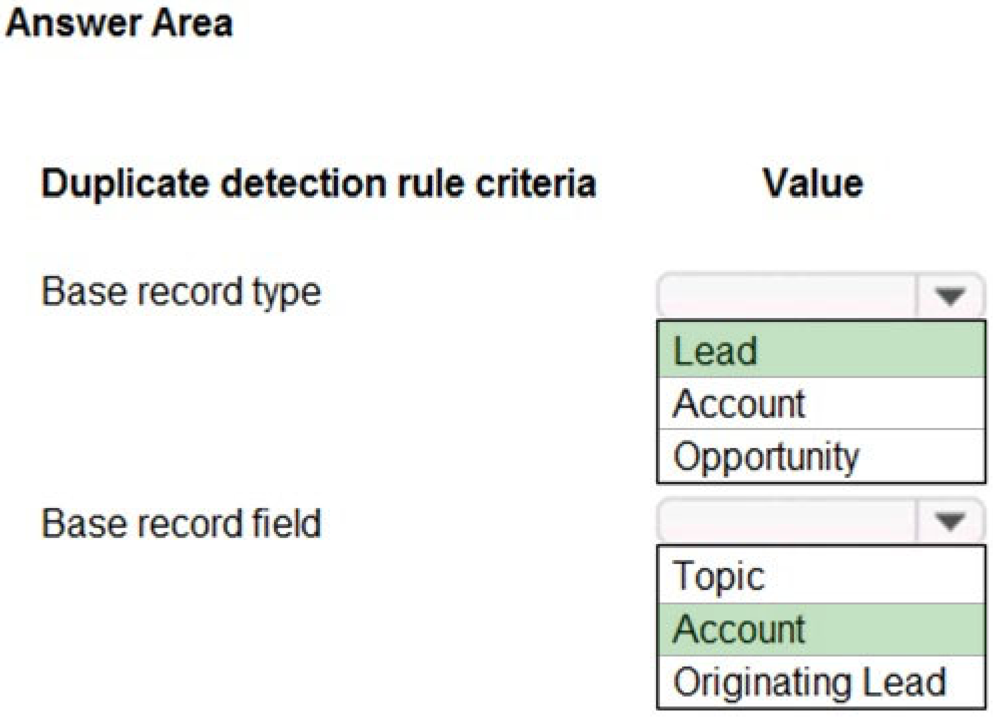
Hot Area:



Answer Area

Duplicate detection rule criteria	Value
Base record type	Lead Account Opportunity
Base record field	Topic Account Originating Lead

Correct Answer:



Answer Area

Duplicate detection rule criteria	Value
Base record type	[✓ Lead] Account Opportunity
Base record field	Topic [✓ Account] Originating Lead

Question #11 *Topic 1*

A car dealership has a Dynamics 365 Sales environment for its sales company and another environment for its leasing company.
Users in one environment must not be able to see the other environment.
You need to grant salespeople access to the sales company environment.
What should you do?

A. Add salespeople to an Office 365 security group.

B. Add salespeople to a security role.

C. Set privileges.

D. Set app security.

Correct Answer: *A*
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/control-user-access

Question #12 *Topic 1*

You are a Dynamics 365 administrator for a veterinarian clinic.
On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.
You need to create a dynamically visible field.
What should you configure?

A. field visibility on the form

B. workflow

C. business process flow

D. business rule

Correct Answer: *D*
Create apps by using Power Apps

Topic 2 - Question Set 2

Question #1 *Topic 2*

DRAG DROP -

You must create a form for team members to use. The form must provide the ability to:

➾ Lock a field on a form.

➾ Trigger business logic based on a field value.

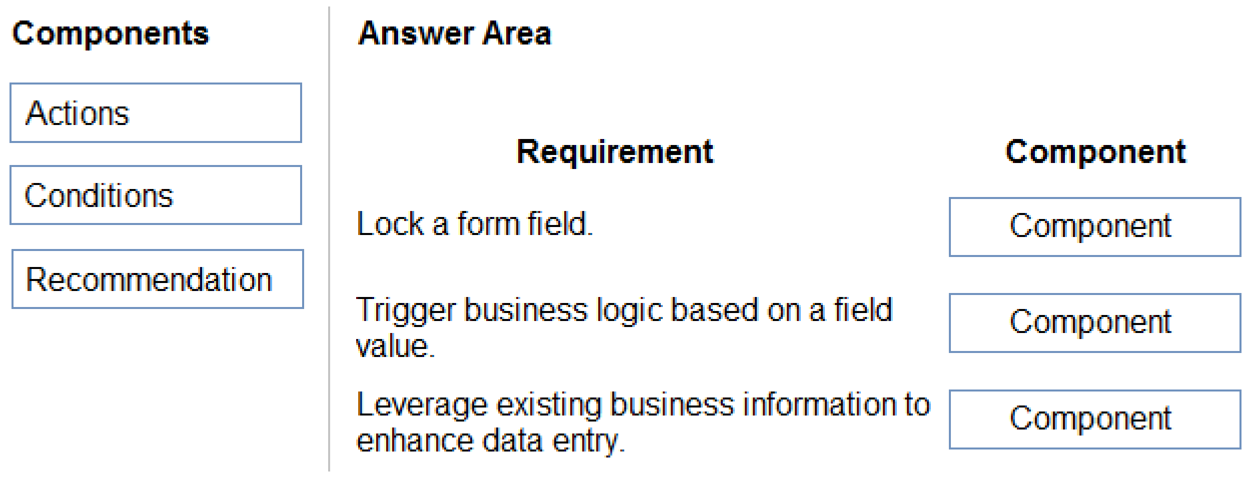
➾ Use existing business information to enhance data entry.

You need to implement business rule components to create the form.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



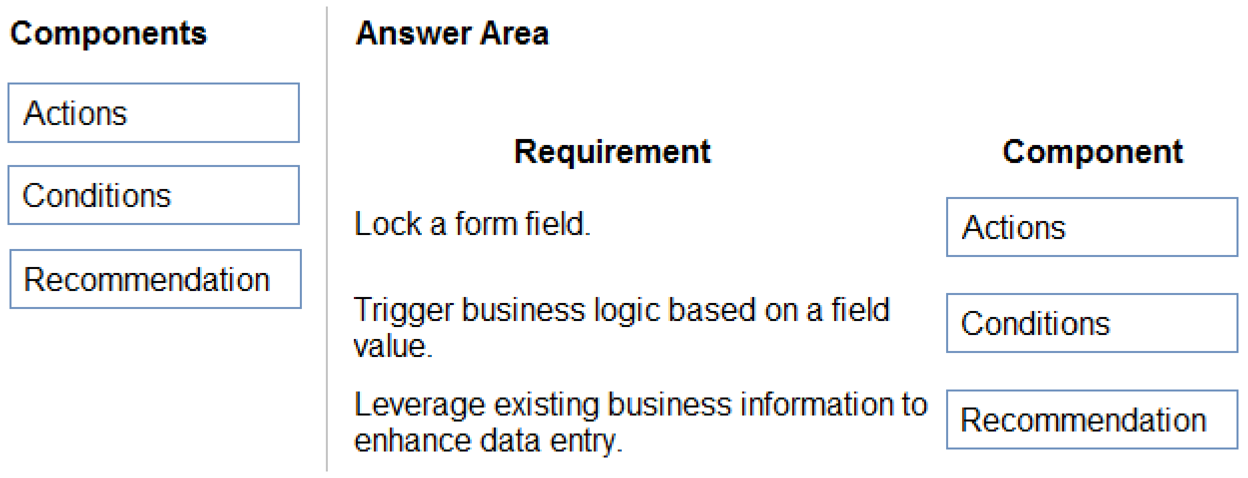
Components

- Actions
- Conditions
- Recommendation

Answer Area

Requirement	Component
Lock a form field.	Component
Trigger business logic based on a field value.	Component
Leverage existing business information to enhance data entry.	Component

Correct Answer:



Components

- Actions
- Conditions
- Recommendation

Answer Area

Requirement	Component
Lock a form field.	Actions
Trigger business logic based on a field value.	Conditions
Leverage existing business information to enhance data entry.	Recommendation

Question #2 *Topic 2*

You have a form that displays a custom field from an entity.
A customer wants to restrict users from filtering on the custom field.
You need to prevent users from filtering the field in Advanced Find.
What should you modify?

A. Fields in the Edit Filter Criteria option of the Quick Find view

B. the Field Security field on the Field Properties form

C. a searchable field on the Field Properties form

D. Fields in the Add Find Columns option of the Quick Find view

Correct Answer: *C*
Reference:
https://community.dynamics.com/365/b/dynamics365apps/posts/kb-understanding-dynamics-365-field-s-searchable-property

Question #3

Topic 2

HOTSPOT -

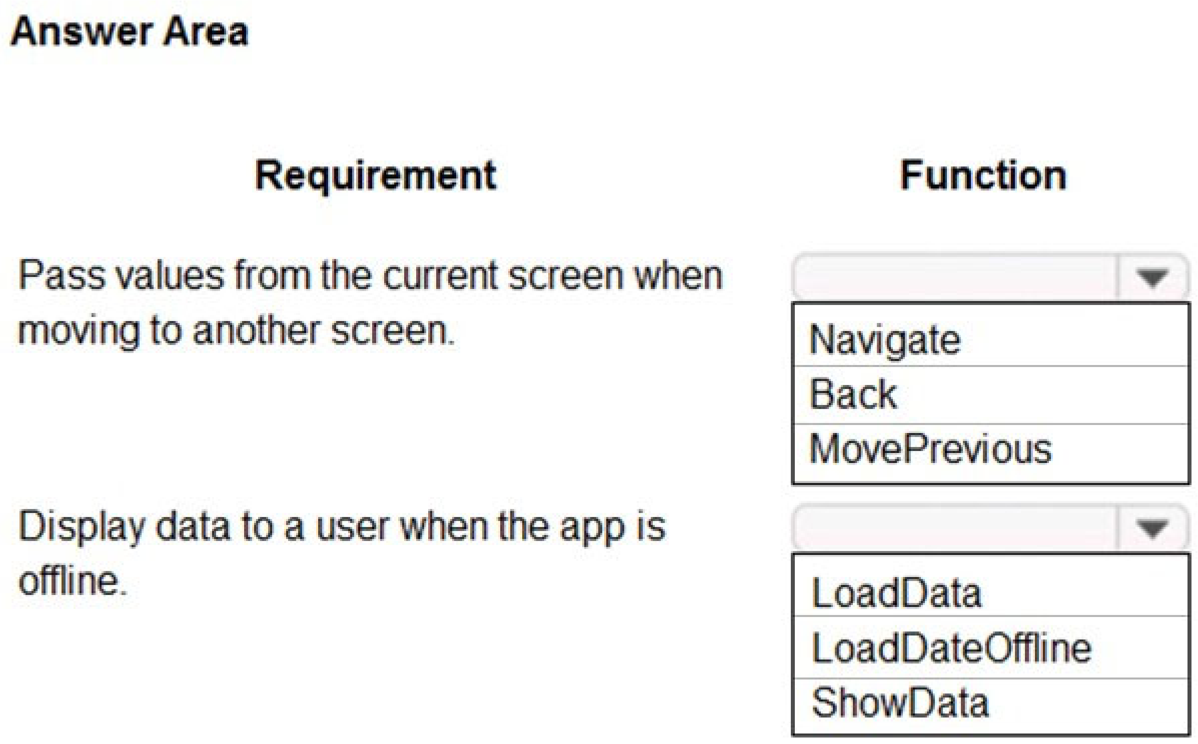
You are designing a canvas app that connects to Common Data Service.

You need to configure the app to meet the requirements and ensure that the canvas app is available offline.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

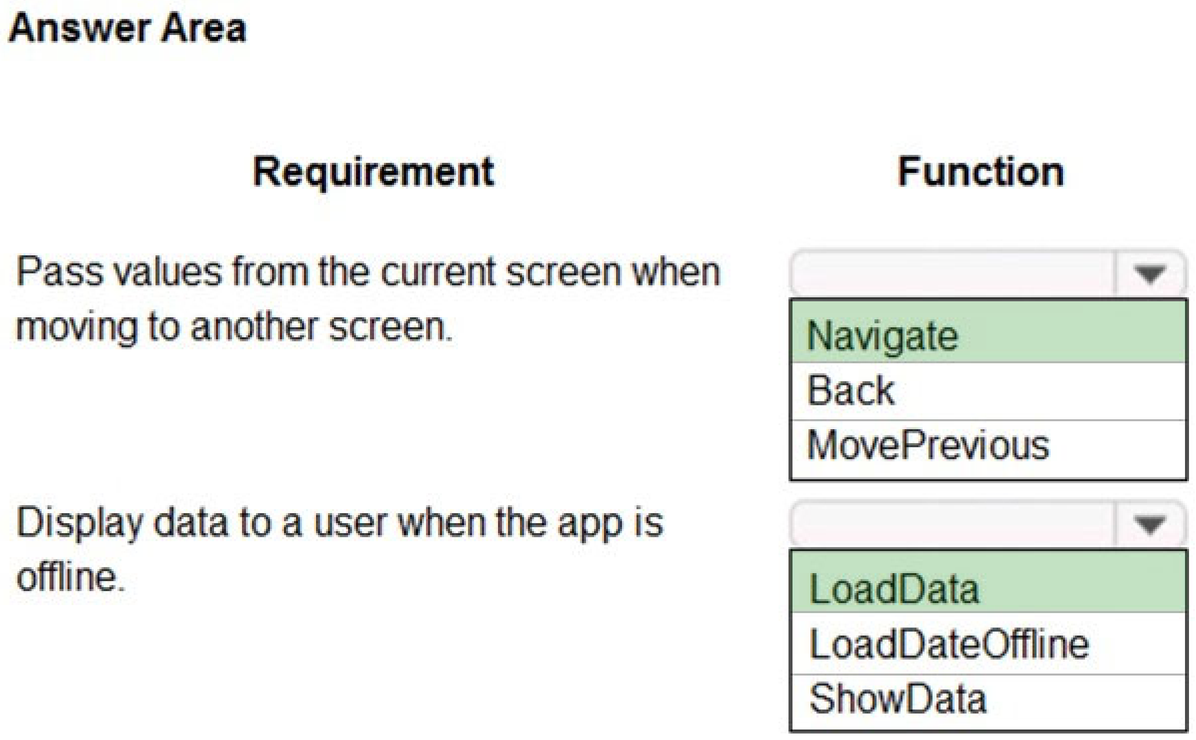
Hot Area:



Answer Area

Requirement	Function
Pass values from the current screen when moving to another screen.	Navigate Back MovePrevious
Display data to a user when the app is offline.	LoadData LoadDateOffline ShowData

Correct Answer:



Answer Area

Requirement	Function
Pass values from the current screen when moving to another screen.	🟩 Navigate Back MovePrevious
Display data to a user when the app is offline.	🟩 LoadData LoadDateOffline ShowData

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps

Question #4 *Topic 2*

You have a canvas app that allows users to view, select, and purchase products. The app uses a Gallery control to display products and checkboxes that allow users to select products.
When users select items from the product catalog, they move to a different screen to complete a purchase.
Users must be able to clear all product selections when they click the button.
You need to configure the button.
What should you do?

A. Use the Reset(Control) formula and pass the gallery control as a parameter to the Reset formula.

B. Use the Reload(Control) formula and pass the gallery control as a parameter to the Reload formula.

C. Use the ForAll() function to iterate through each item of the Gallery and clear user selections.

D. Set the OnCheck value to populate a collection and the OnUncheck value to remove the item from the collection. Clear collection when the user selects the button.

Correct Answer: *A*

Question #5 *Topic 2*

HOTSPOT -

A company has a canvas app that includes the following screens: Screen1 and Screen2.

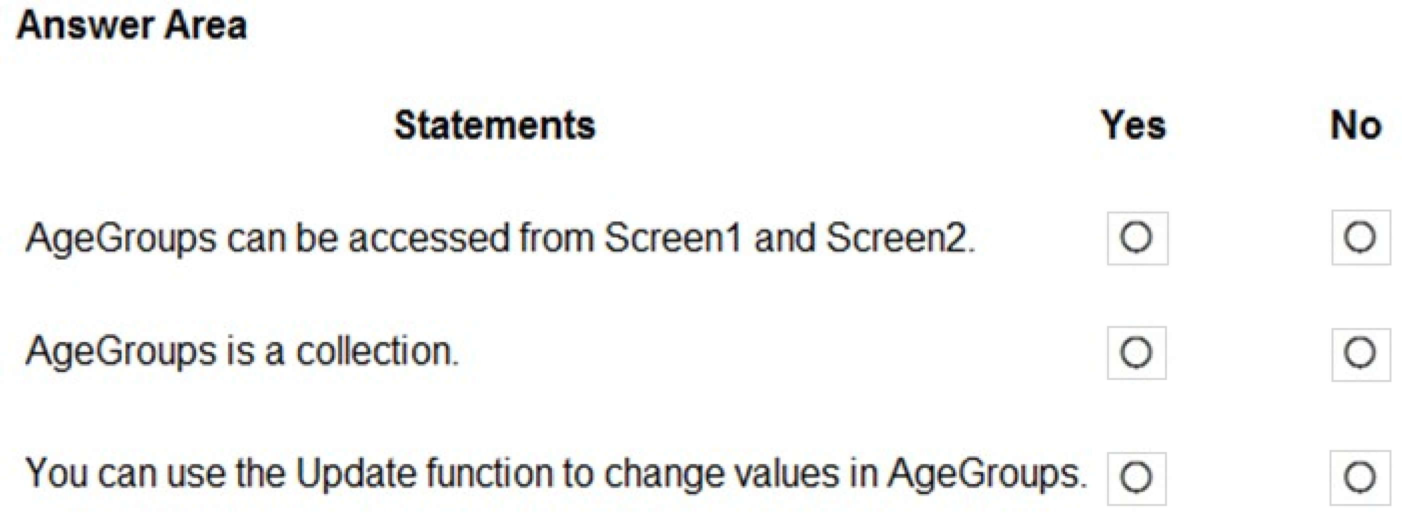
The OnVisible property for Screen1 contains the following expression.

Set(AgeGroups, ["1-25", "26-54", "55+"])

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

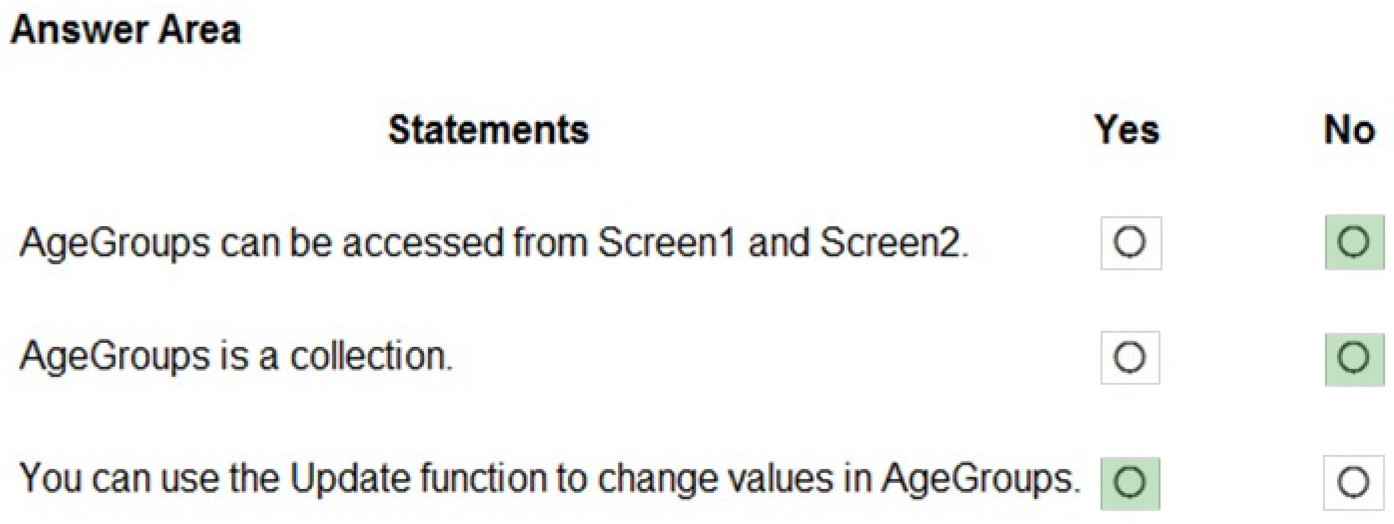
Hot Area:



Answer Area

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	○	○
AgeGroups is a collection.	○	○
You can use the Update function to change values in AgeGroups.	○	○

Correct Answer:



Answer Area

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	○	[✓ ○]
AgeGroups is a collection.	○	[✓ ○]
You can use the Update function to change values in AgeGroups.	[✓ ○]	○

Question #6 *Topic 2*

DRAG DROP -

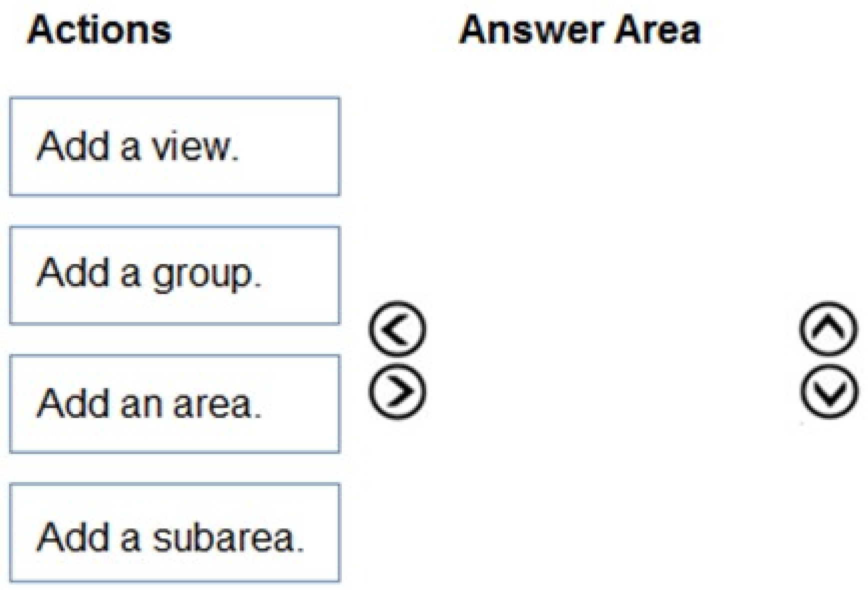
You are a Dynamics 365 administrator.

You create a new app.

You need to create the site map for the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

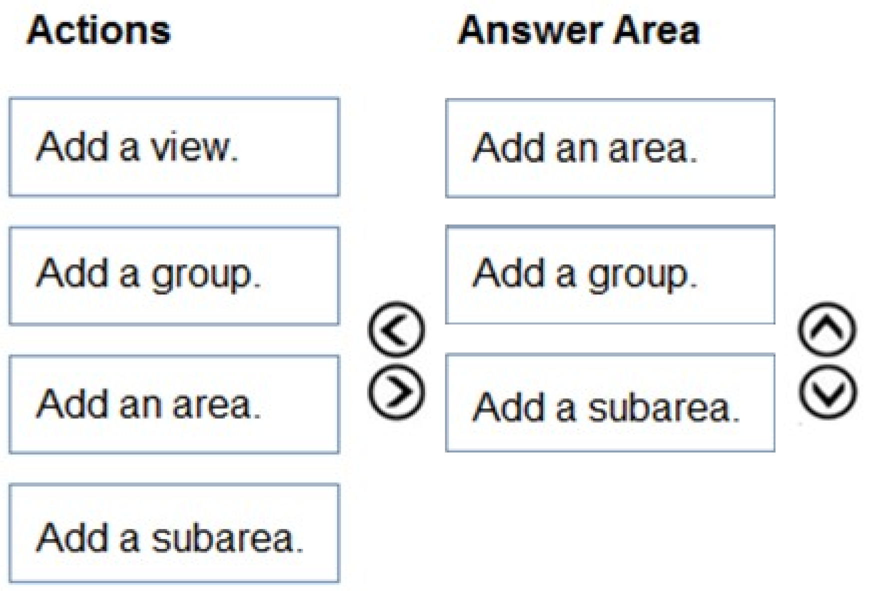


Actions

- Add a view.
- Add a group.
- Add an area.
- Add a subarea.

Answer Area

Correct Answer:



Actions

- Add a view.
- Add a group.
- Add an area.
- Add a subarea.

Answer Area

- Add an area.
- Add a group.
- Add a subarea.

Question #7 *Topic 2*

You are a Dynamics 365 Customer Service system administrator.
Your organization does not permit the use of custom code for solutions.
You need to create a view that can be viewed by all users in an organization.
Where should you create the view?

A. Microsoft Excel template
B. Entities component of a solution
C. Microsoft Virtual Studio
D. Templates area

Correct Answer: *B*

Question #8 *Topic 2*

DRAG DROP -

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields.

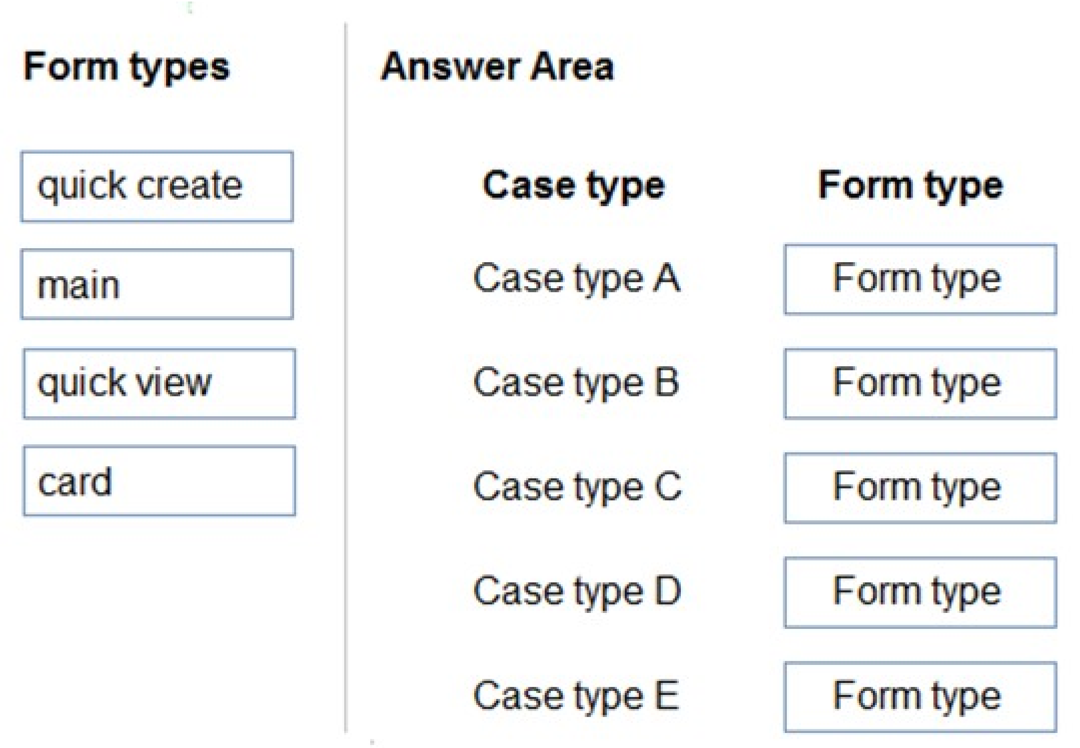
You need to create forms for each of the following case types:

Case type	Requirement
Case type A	A new case form that includes a timeline
Case type B	A new case form that includes a business process flow
Case type C	A new case form that can display case data on an interactive dashboard
Case type D	A new mobile-friendly case form that requires minimal fields for record creation
Case type E	A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



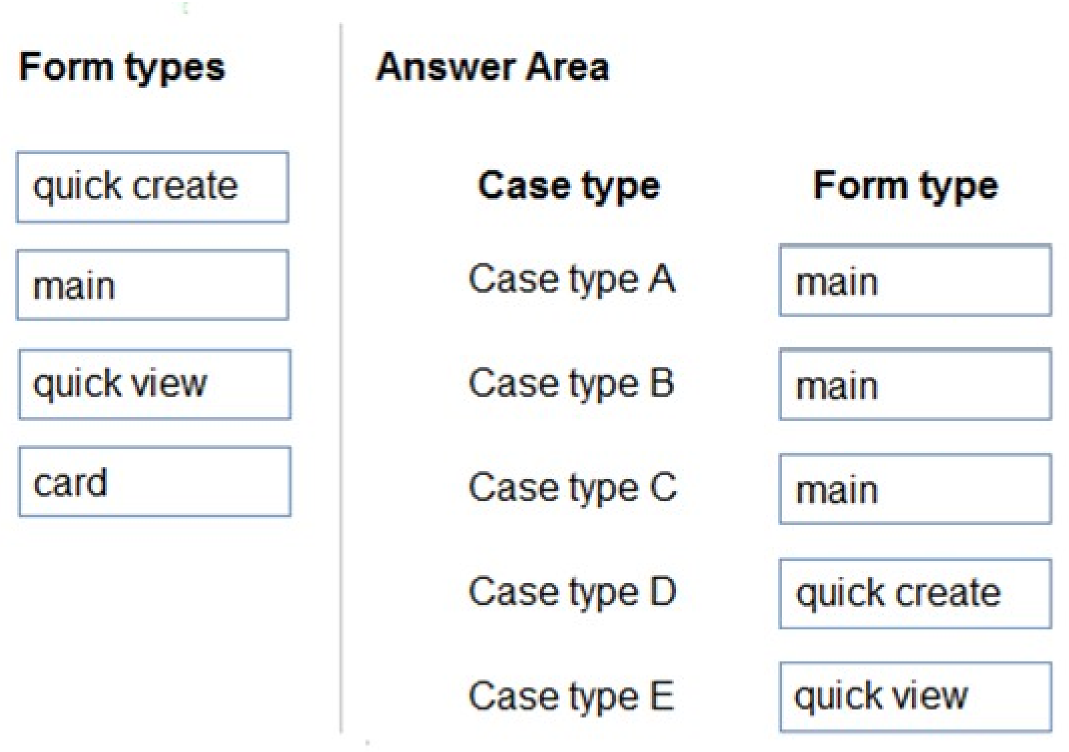
Form types

- quick create
- main
- quick view
- card

Answer Area

Case type	Form type
Case type A	Form type
Case type B	Form type
Case type C	Form type
Case type D	Form type
Case type E	Form type

Correct Answer:



Form types

- quick create
- main
- quick view
- card

Answer Area

Case type	Form type
Case type A	main
Case type B	main
Case type C	main
Case type D	quick create
Case type E	quick view

Question #9 *Topic 2*

DRAG DROP -

You are a Dynamics 365 Customer Service developer.

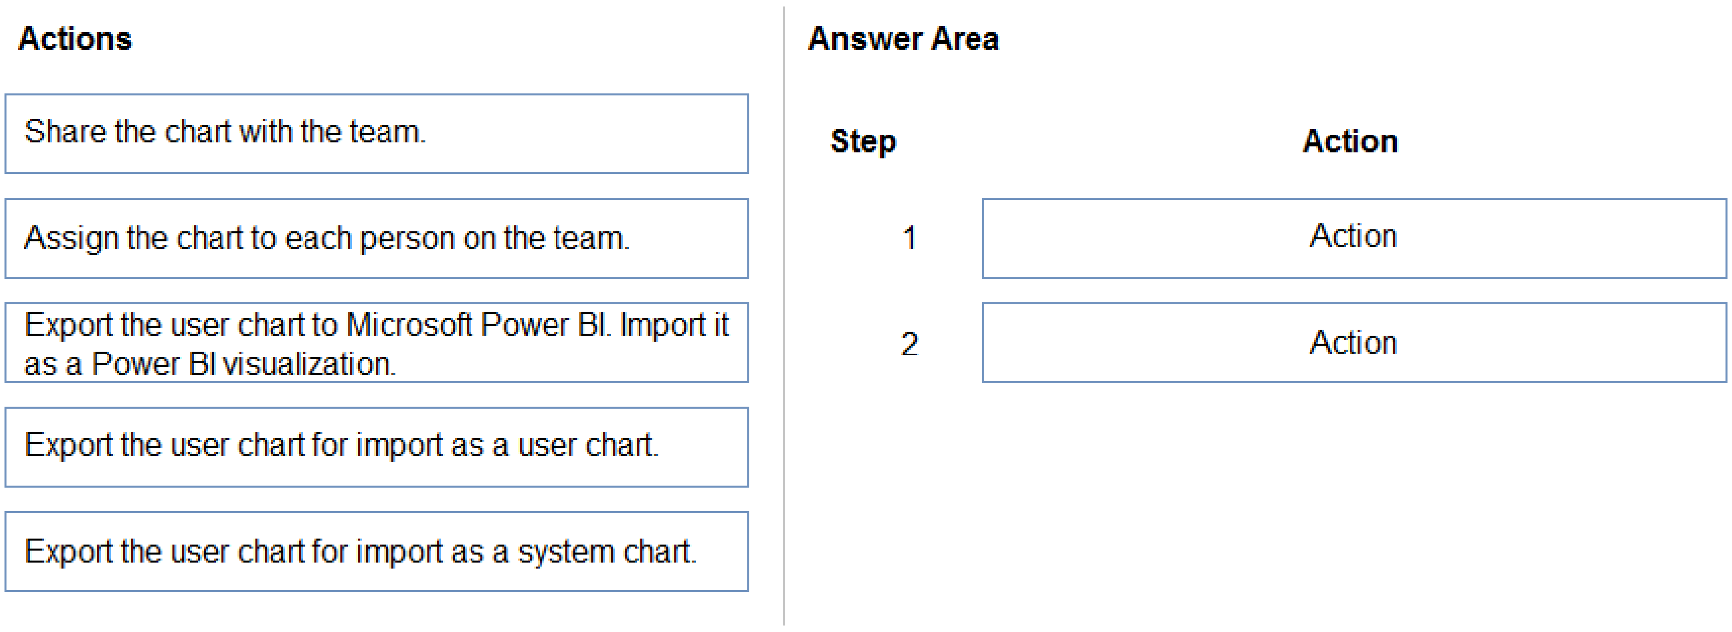
A salesperson creates a chart.

You need to ensure that the chart is available to all users on the team.

Which actions should the salesperson perform? To answer, drag the appropriate actions to the correct users. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



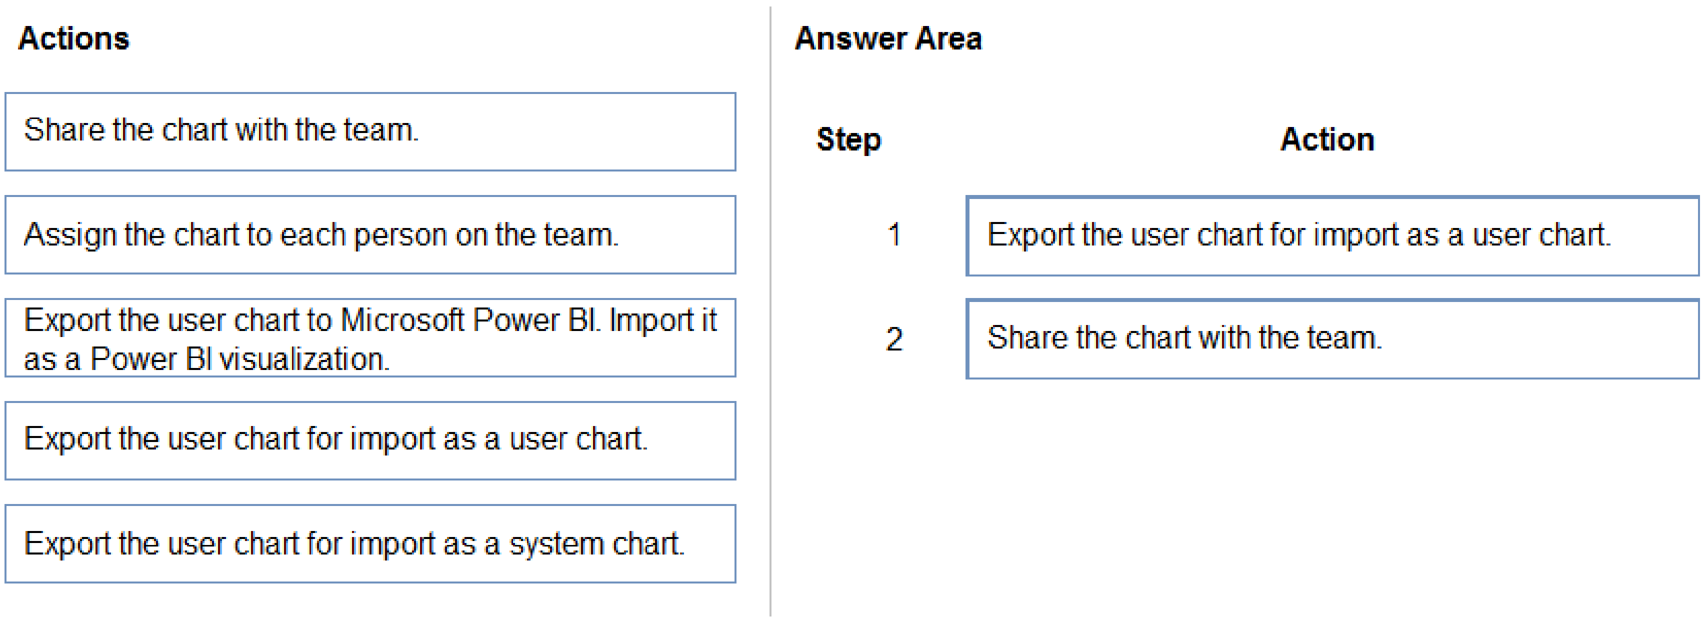
Actions

- Share the chart with the team.
- Assign the chart to each person on the team.
- Export the user chart to Microsoft Power BI. Import it as a Power BI visualization.
- Export the user chart for import as a user chart.
- Export the user chart for import as a system chart.

Answer Area

Step	Action
1	Action
2	Action

Correct Answer:



Actions

- Share the chart with the team.
- Assign the chart to each person on the team.
- Export the user chart to Microsoft Power BI. Import it as a Power BI visualization.
- Export the user chart for import as a user chart.
- Export the user chart for import as a system chart.

Answer Area

Step	Action
1	Export the user chart for import as a user chart.
2	Share the chart with the team.

Question #10 *Topic 2*

HOTSPOT -

You implement an editable grid for the Account entity.

The business team provides the following list of features that they would like you to implement:

✑ Group by or sort columns in the current view.

✑ Configure a business rule to show an error message.

✑ Edit values in calculated fields.

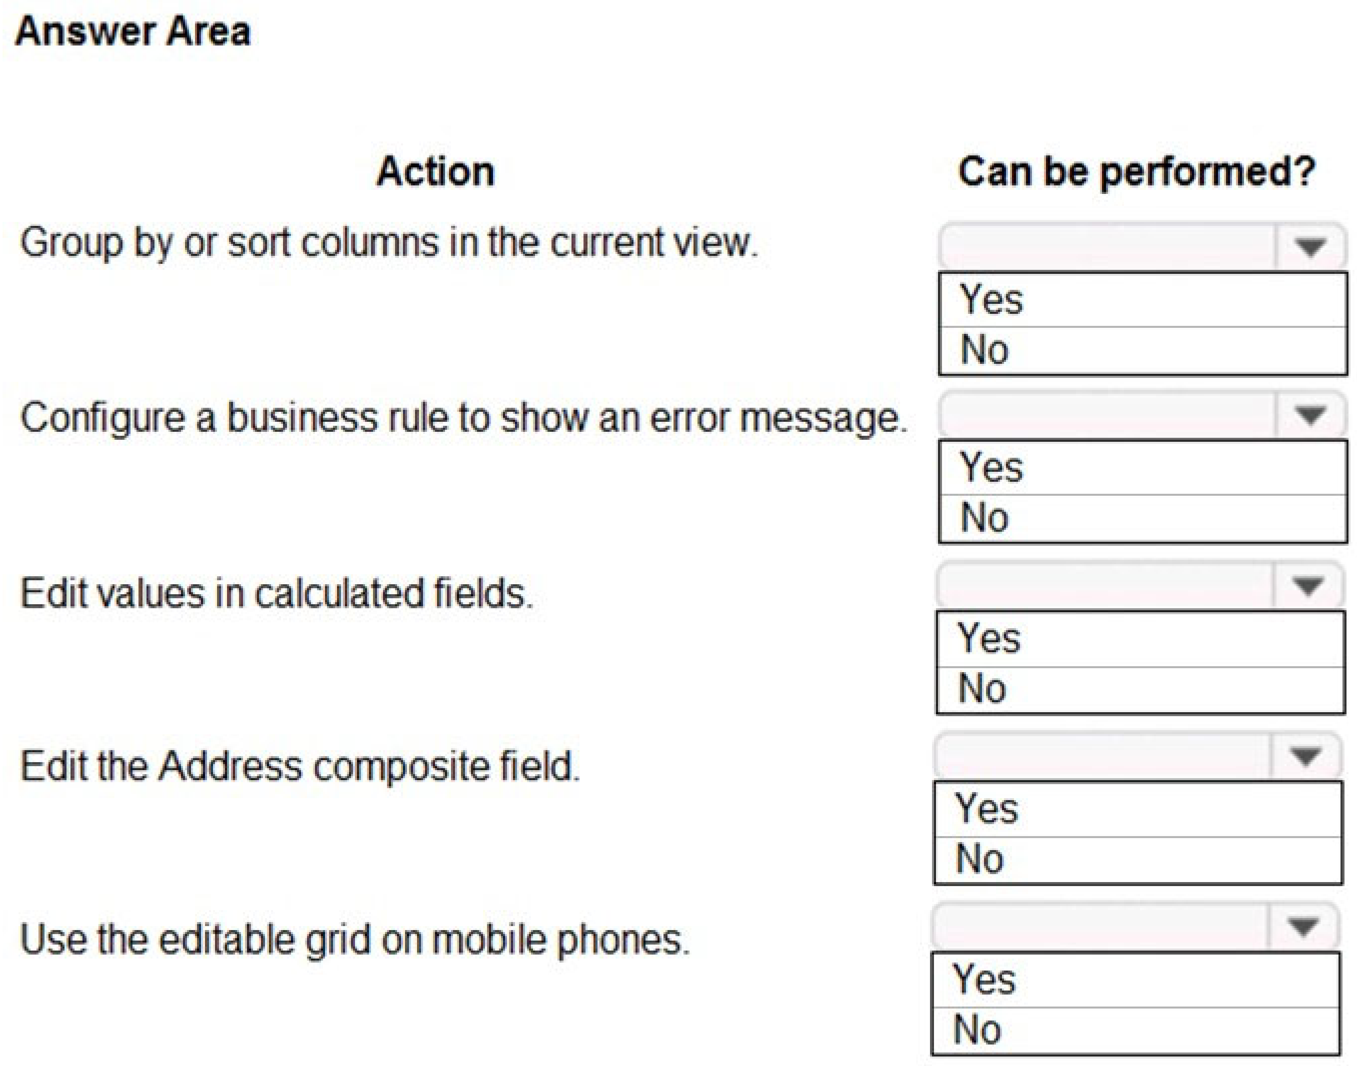
✑ Edit the Address composite field.

✑ Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:



Answer Area

Action	Can be performed?
Group by or sort columns in the current view.	Yes No
Configure a business rule to show an error message.	Yes No
Edit values in calculated fields.	Yes No
Edit the Address composite field.	Yes No
Use the editable grid on mobile phones.	Yes No

Answer Area

Action	Can be performed?
Group by or sort columns in the current view.	

Topic 3 - Question Set 3

Question #1 *Topic 3*

DRAG DROP -

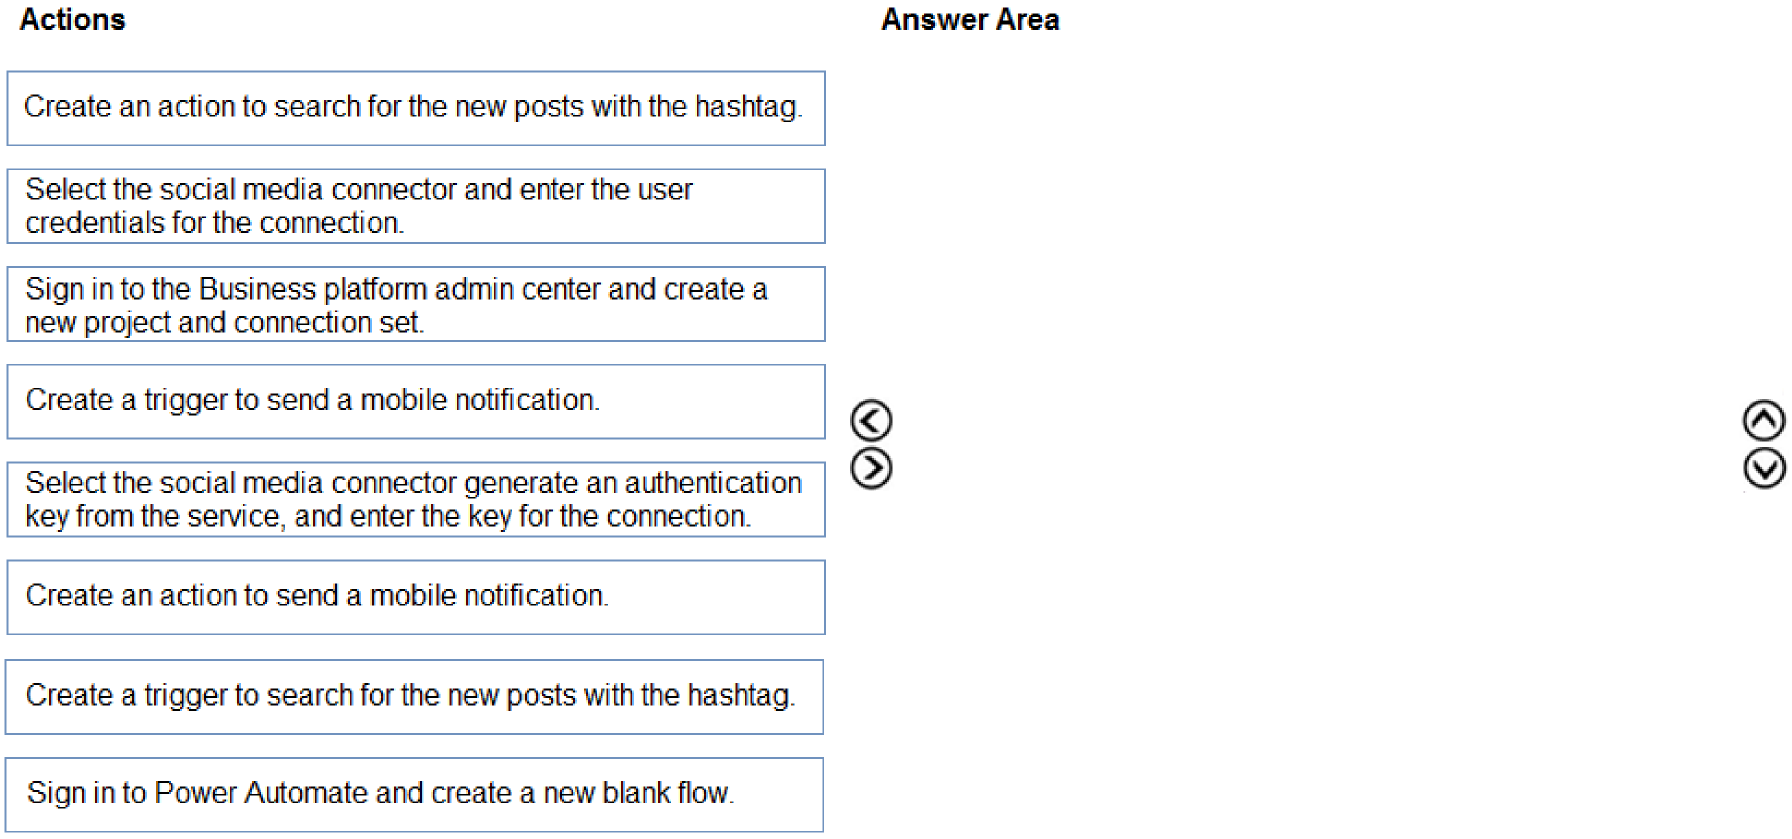
You are developing an app.

You must trigger a mobile notification whenever a specific hashtag is posted from Twitter. The notification will send email to the company's social media teams distribution list.

You need to create a connection to the Twitter service and build a solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

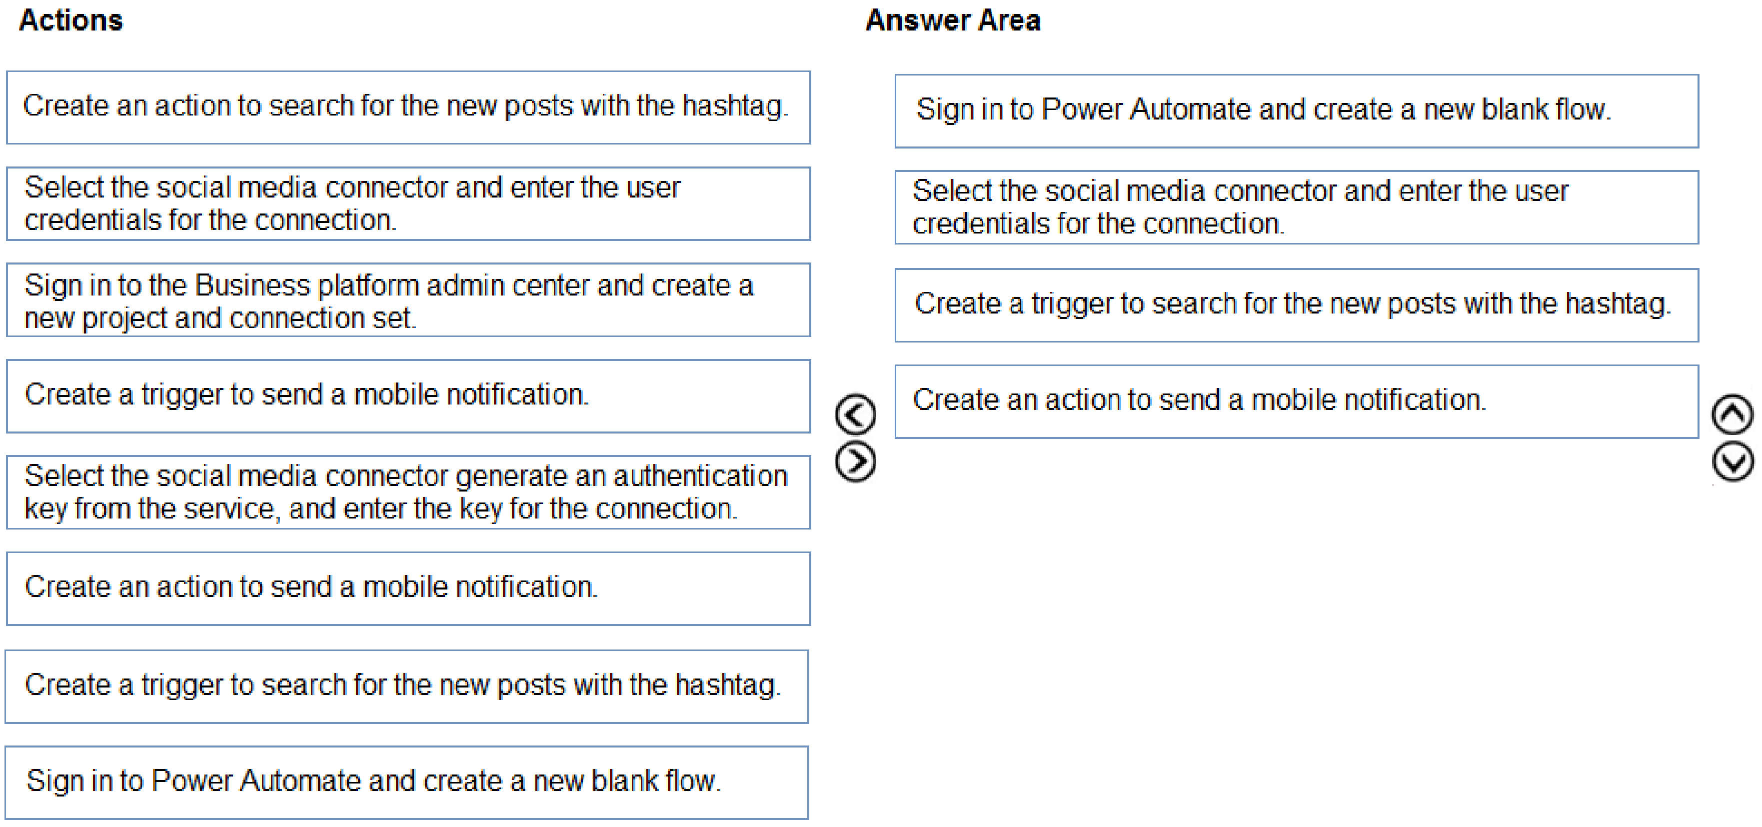


Actions

- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.
- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to send a mobile notification.
- Select the social media connector generate an authentication key from the service, and enter the key for the connection.
- Create an action to send a mobile notification.
- Create a trigger to search for the new posts with the hashtag.
- Sign in to Power Automate and create a new blank flow.

Answer Area

Correct Answer:



Actions

- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.
- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to send a mobile notification.
- Select the social media connector generate an authentication key from the service, and enter the key for the connection.
- Create an action to send a mobile notification.
- Create a trigger to search for the new posts with the hashtag.
- Sign in to Power Automate and create a new blank flow.

Answer Area

- Sign in to Power Automate and create a new blank flow.
- Select the social media connector and enter the user credentials for the connection.
- Create a trigger to search for the new posts with the hashtag.
- Create an action to send a mobile notification.

Question #2

Topic 3

You manage Dynamics 365 for a company.
You must prevent users from launching and using Power Automate.
You need to hide the Flow button on the user interface.
Which configuration setting should you change?

A. the SiteMap
B. the Customizations section of System Settings
C. the Entity component of the default solution
D. the Buttons tab of Flow

Correct Answer: *B*
Reference:
https://www.inogic.com/blog/2018/10/show-or-hide-microsoft-flow-button-in-dynamics-365/

Question #3 *Topic 3*

You configure and test a user interface (UI) flow. You plan to run the flow as a scheduled flow.
The UI flow must run on a Windows 10 device. As part of process automation, the UI flow must sign into the Windows 10 device with the credentials for a user account named User1.
You need to ensure that the flow runs during non-peak hours and requires no physical user intervention.
What should you do?

A. Ensure that the User1 account has an active user session on the device.

B. Ensure that all user sessions are signed out.

C. Ensure that there are no active user sessions on the device.

D. Ensure that all user sessions are signed out except for locked user sessions.

Correct Answer: *C*
Answer B is incorrect because it will work if you have disconnected sessions. The sessions do not need to be signed out; they just cannot be active.
Reference:
https://docs.microsoft.com/en-us/power-automate/ui-flows/run-ui-flow

Question #4 *Topic 3*

You plan to create user interface (UI) flows to automate several web-based business processes that you currently perform manually.
You need to ensure that users can create and run web UI flows.
Which three components must you install and configure on user's devices? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. UI Flows application

B. Latest version of Microsoft Edge

C. On-premises data gateway

D. Selenium IDE

E. Latest version of Mozilla Firefox

Correct Answer: *ABD*
Reference:
https://docs.microsoft.com/en-us/power-automate/ui-flows/setup

Question #5 *Topic 3*

DRAG DROP -

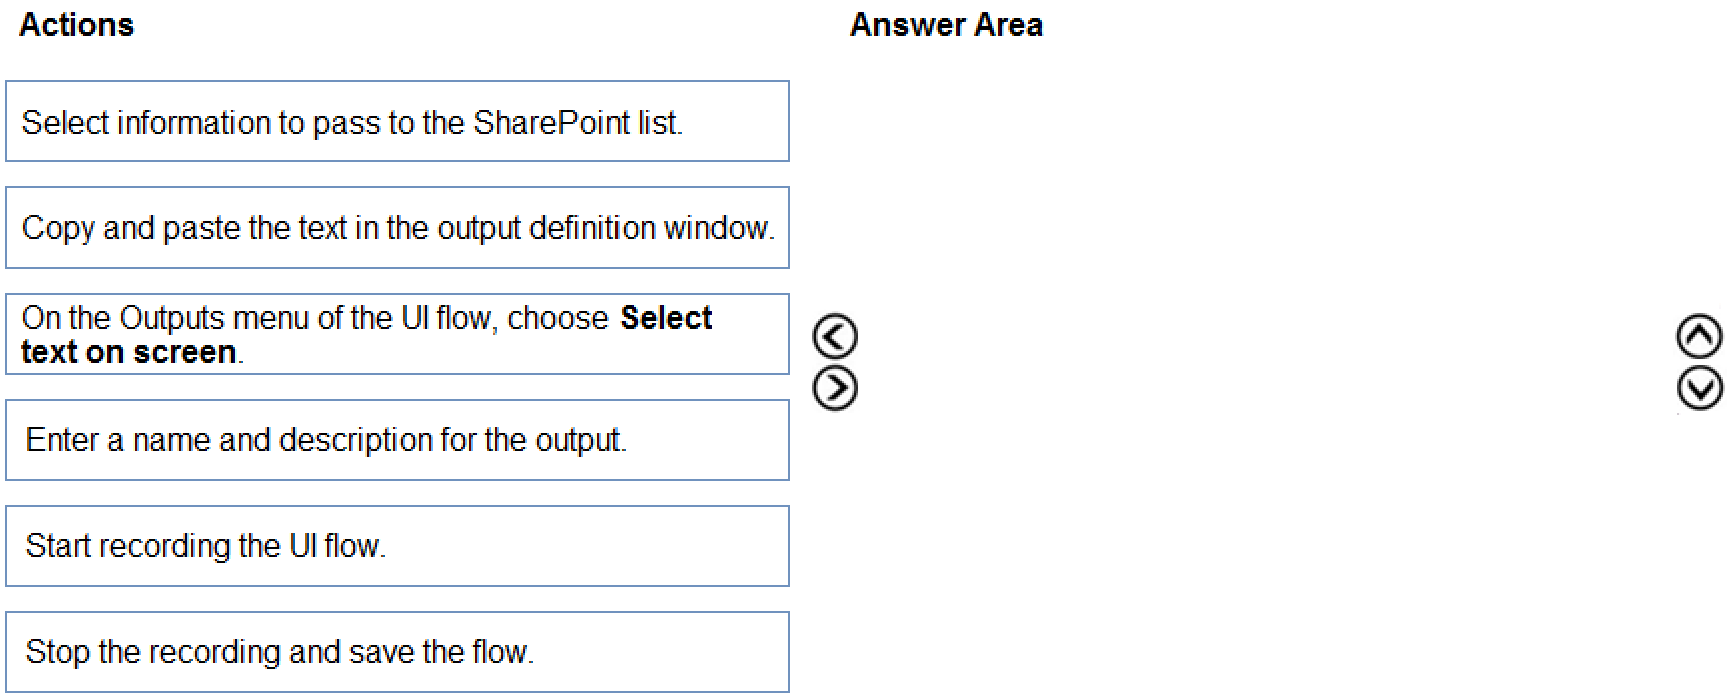
You are designing a desktop user interface (UI) flow.

The UI flow automates legacy software.

You need to prepare data for transfer to Microsoft SharePoint list.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

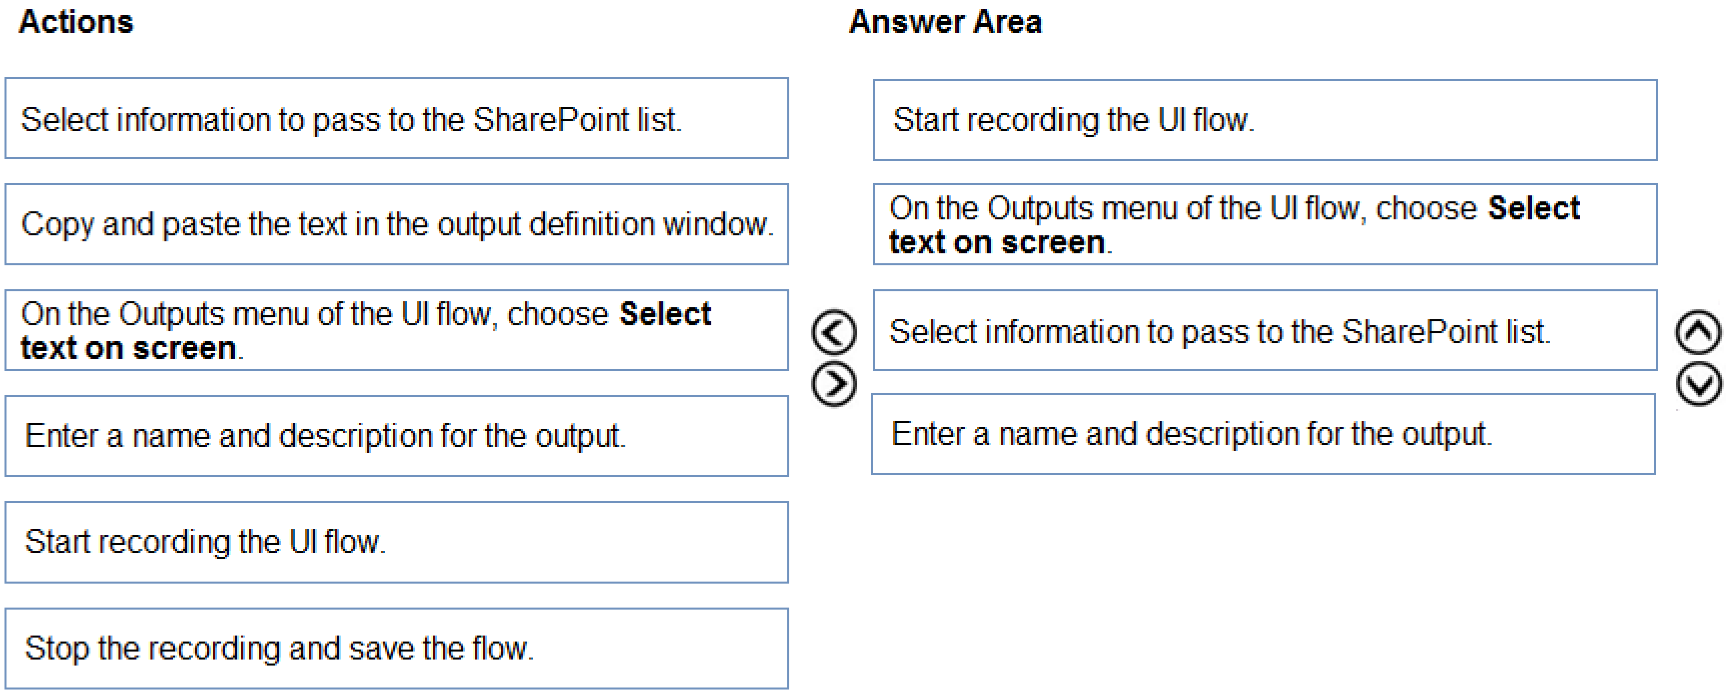


Actions

- Select information to pass to the SharePoint list.
- Copy and paste the text in the output definition window.
- On the Outputs menu of the UI flow, choose **Select text on screen**.
- Enter a name and description for the output.
- Start recording the UI flow.
- Stop the recording and save the flow.

Answer Area

Correct Answer:



Actions

- Select information to pass to the SharePoint list.
- Copy and paste the text in the output definition window.
- On the Outputs menu of the UI flow, choose **Select text on screen**.
- Enter a name and description for the output.
- Start recording the UI flow.
- Stop the recording and save the flow.

Answer Area

- Start recording the UI flow.
- On the Outputs menu of the UI flow, choose **Select text on screen**.
- Select information to pass to the SharePoint list.
- Enter a name and description for the output.

Reference:

https://docs.microsoft.com/en-us/power-automate/ui-flows/inputs-outputs-desktop#use-outputs-to-extract-information-from-the-app

Question #6 *Topic 3*

DRAG DROP -

You have a business process flow.

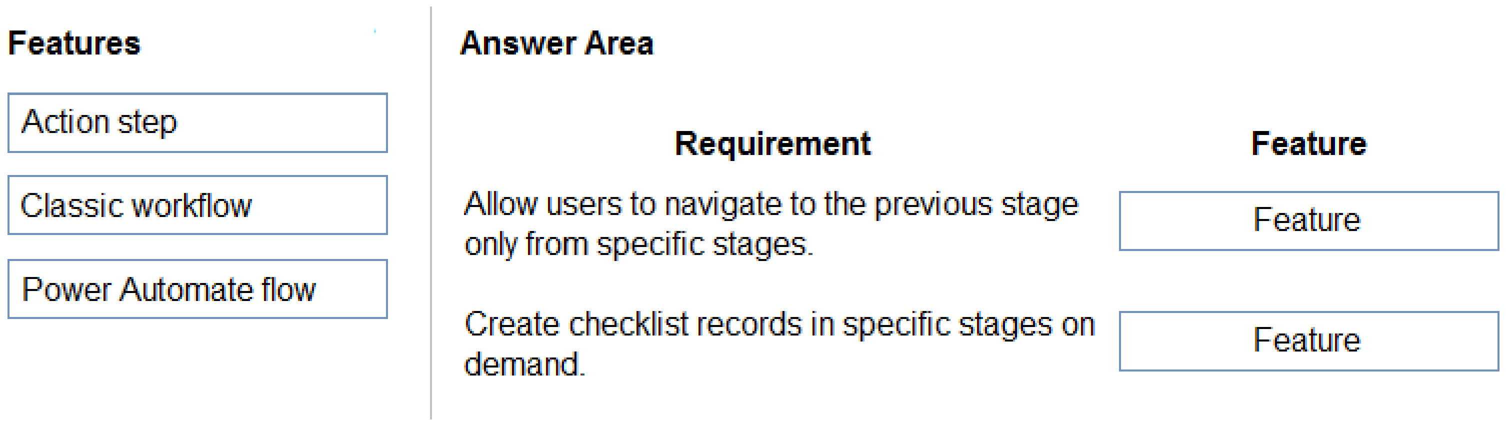
You need to update the business process flow while minimizing administrative and maintenance efforts.

What should you implement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



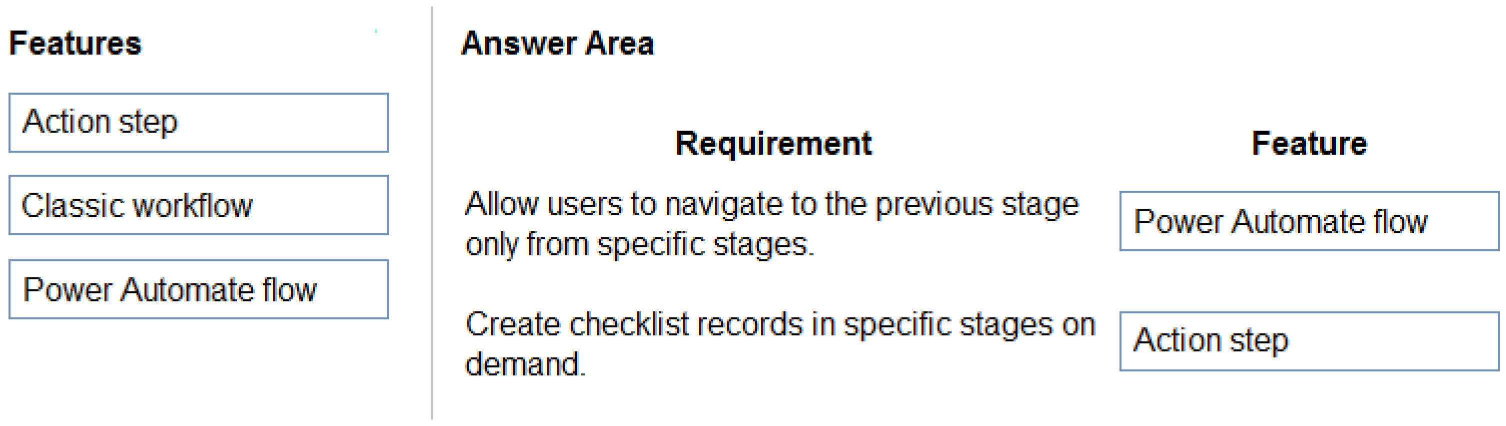
Features

- Action step
- Classic workflow
- Power Automate flow

Answer Area

Requirement	Feature
Allow users to navigate to the previous stage only from specific stages.	Feature
Create checklist records in specific stages on demand.	Feature

Correct Answer:



Features

- Action step
- Classic workflow
- Power Automate flow

Question #8 *Topic 3*

DRAG DROP -

You plan to automate several different processes by using Power Automate.

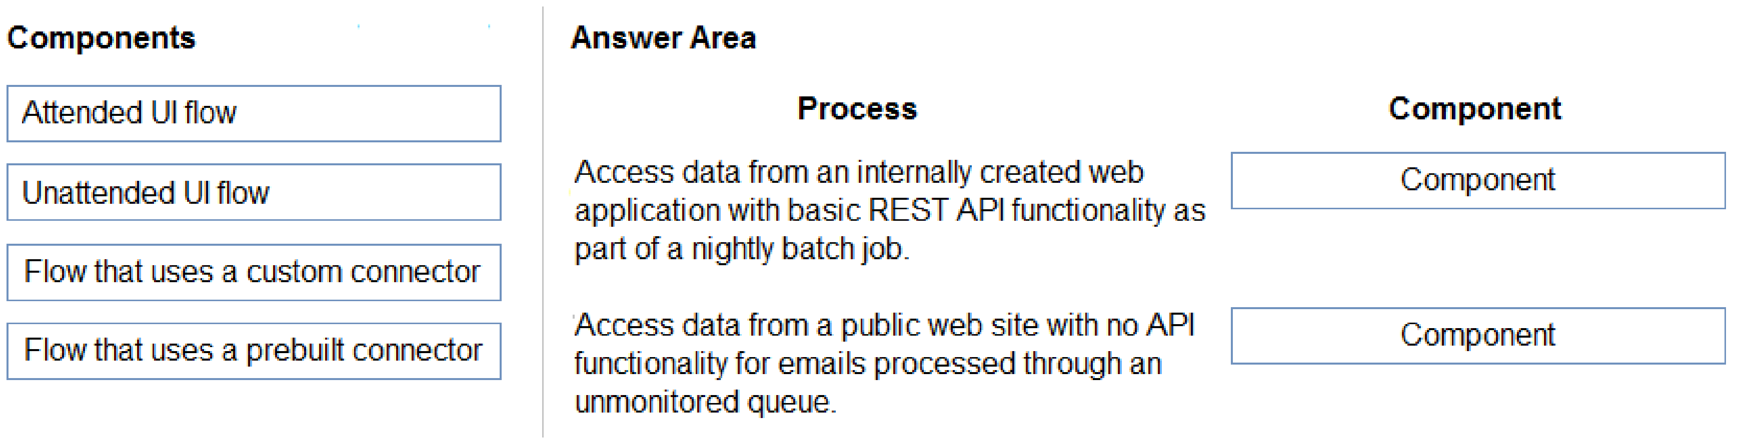
Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



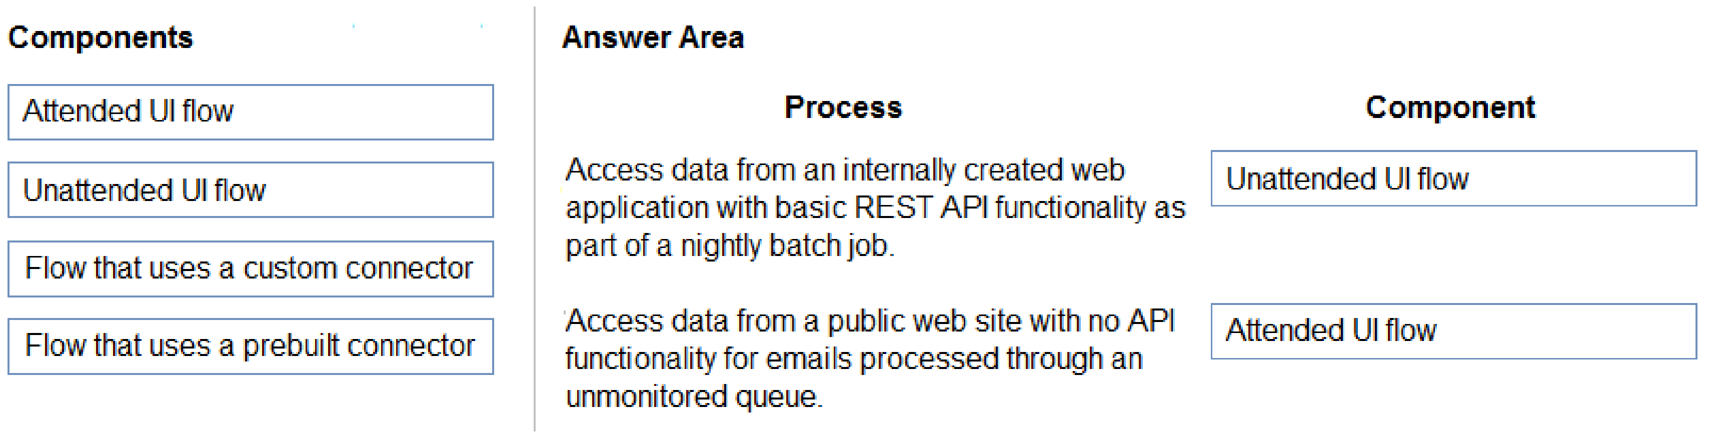
Components

- Attended UI flow
- Unattended UI flow
- Flow that uses a custom connector
- Flow that uses a prebuilt connector

Answer Area

Process	**Component**
Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Component
Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Component

Correct Answer:



Components

- Attended UI flow
- Unattended UI flow
- Flow that uses a custom connector
- Flow that uses a prebuilt connector

Answer Area

Process	**Component**
Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Unattended UI flow
Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Attended UI flow

Implement Power Virtual Agents chatbots

Topic 4 - Question Set 4

Question #1 *Topic 4*

You are creating a Power Virtual Agents chatbot that uses multiple topics.
Each user interaction can reference more than one topic.
You need to be able to capture a value in an initial topic and use it in subsequent topics.
Which type of variable should you create?

A. Context

B. Bot

C. Topic

Correct Answer: *B*
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot

Question #2 *Topic 4*

A company has a custom website.
You need to embed a Power Virtual Agents chatbot into the website.
What should you use?

A. Webpage URL

B. Form ID

C. Bot ID

D. IFrame

Correct Answer: *D*

Question #3 *Topic 4*

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.
The chatbots must prompt users to enter or select a product.
You need to store the model information so that it can be reused across all chatbots.
Where should you store the model data?

A. Global variables

B. Custom entities

C. Topics

D. Multiple choice options

Correct Answer: *A*

Question #4 *Topic 4*

DRAG DROP -

A company creates a Power Virtual Agents chatbot.

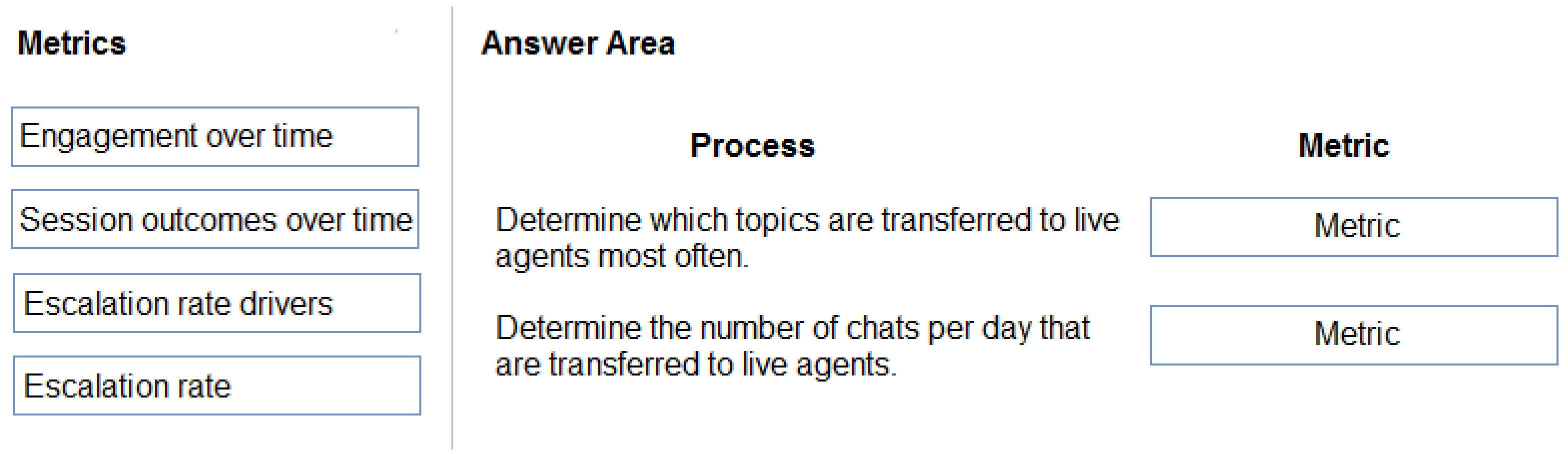
You need to determine when live agents are engaged to provide support.

Which metrics should you use? To answer, drag the appropriate metrics to the correct processes. Each metric may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



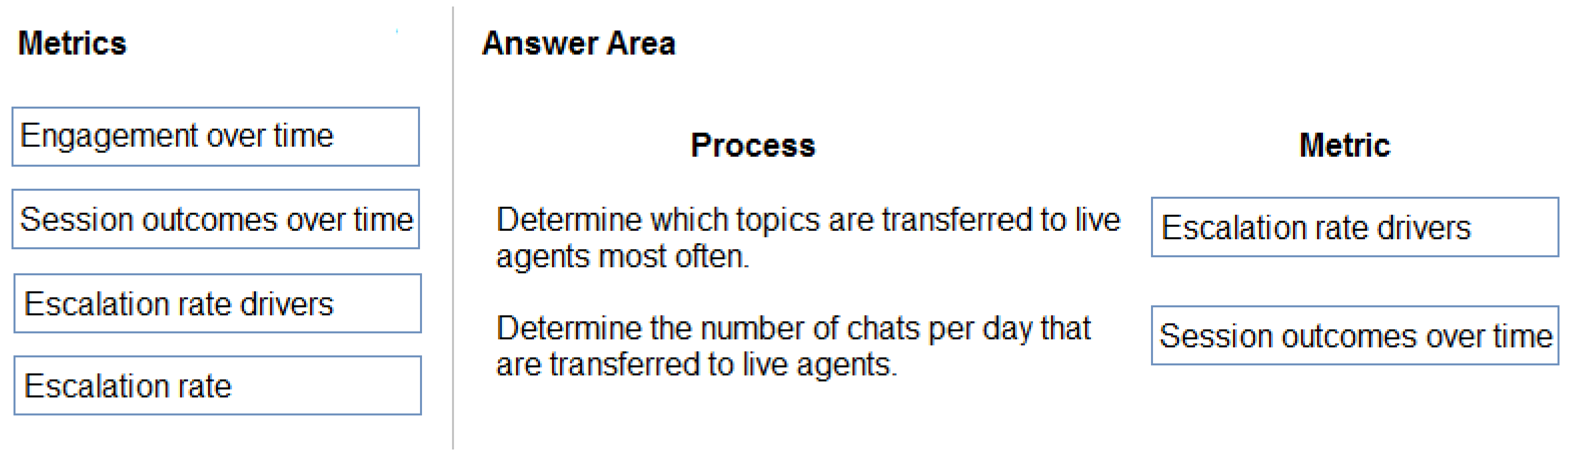
Metrics

- Engagement over time
- Session outcomes over time
- Escalation rate drivers
- Escalation rate

Answer Area

Process	Metric
Determine which topics are transferred to live agents most often.	Metric
Determine the number of chats per day that are transferred to live agents.	Metric

Correct Answer:



Metrics

- Engagement over time
- Session outcomes over time
- Escalation rate drivers
- Escalation rate

Answer Area

Process	Metric
Determine which topics are transferred to live agents most often.	Escalation rate drivers
Determine the number of chats per day that are transferred to live agents.	Session outcomes over time

https://docs.microsoft.com/en-us/power-virtual-agents/teams/analytics-summary-teams

Question #5 *Topic 4*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Use Date and time for Identify in the question and then add branches that use conditional logic to determine the age group.

Does this meet the goal?

A. Yes

B. No

Correct Answer: *B*

Question #6 *Topic 4*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers.
The chatbot must determine the group a customer belongs to based on their age. The age groups are:
✑ 0 - 17
✑ 18 - 25
✑ 26 - 35
✑ 36 - 55
✑ 55 - 100
You need to configure the chatbot to ask a question that can be used to determine the correct age group.
Solution: Use multiple choice for Identify in the question and create options that represent of the age groups.
Does this meet the goal?

A. Yes

B. No

Correct Answer: *B*

Question #7 *Topic 4*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers.
The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.
Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item. Use Age group for Identify in the question.
Does this meet the goal?

A. Yes

B. No

Correct Answer: *A*
Implement Power Virtual Agents chatbots

Topic 5 - Question Set 5

Question #1 *Topic 5*

HOTSPOT -

A company plans to implement AI Builder to add intelligence to several business processes.

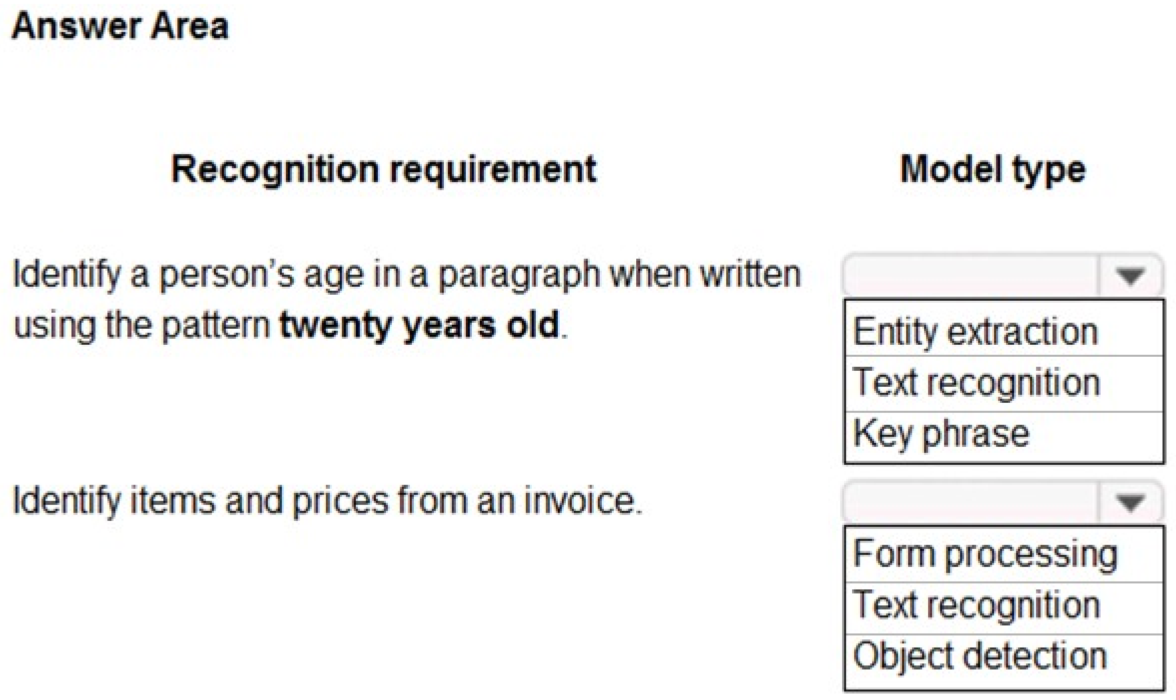
Each business process uses different sources and produces different outputs.

You need to determine which AI Builder model types to use.

Which model types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

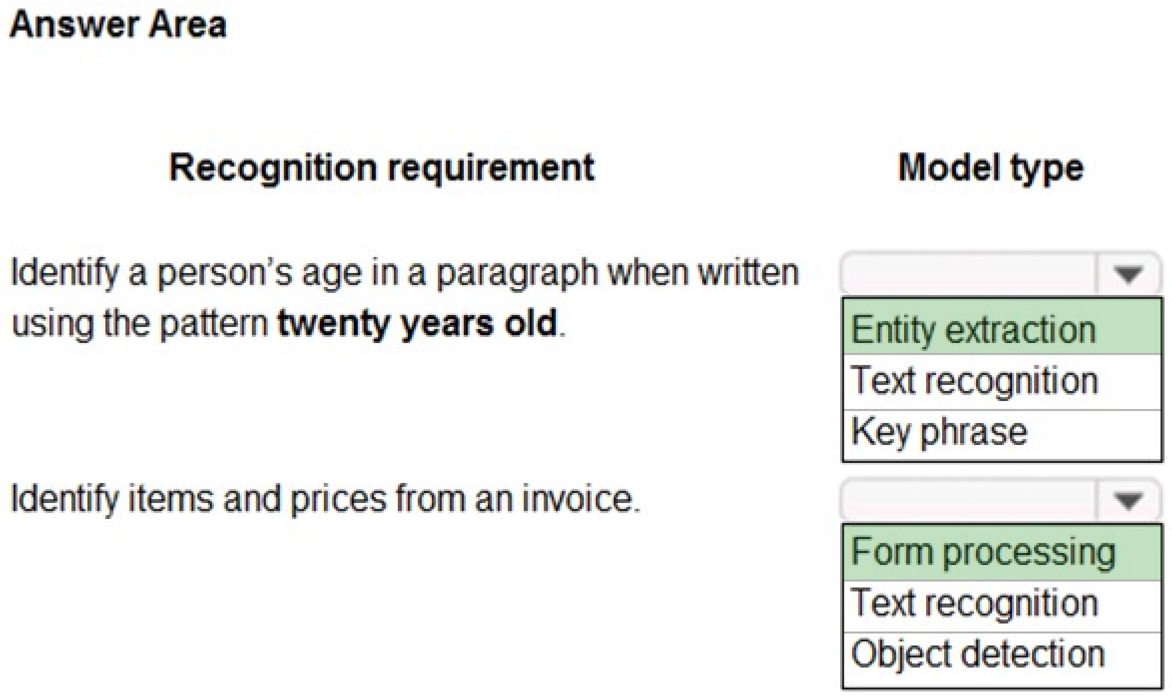
Hot Area:



Answer Area

Recognition requirement	Model type
Identify a person's age in a paragraph when written using the pattern **twenty years old**.	Entity extraction Text recognition Key phrase
Identify items and prices from an invoice.	Form processing Text recognition Object detection

Correct Answer:



Answer Area

Recognition requirement	Model type
Identify a person's age in a paragraph when written using the pattern **twenty years old**.	[✓ Entity extraction] Text recognition Key phrase
Identify items and prices from an invoice.	[✓ Form processing] Text recognition Object detection

Reference:

https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview

Question #2

Topic 5

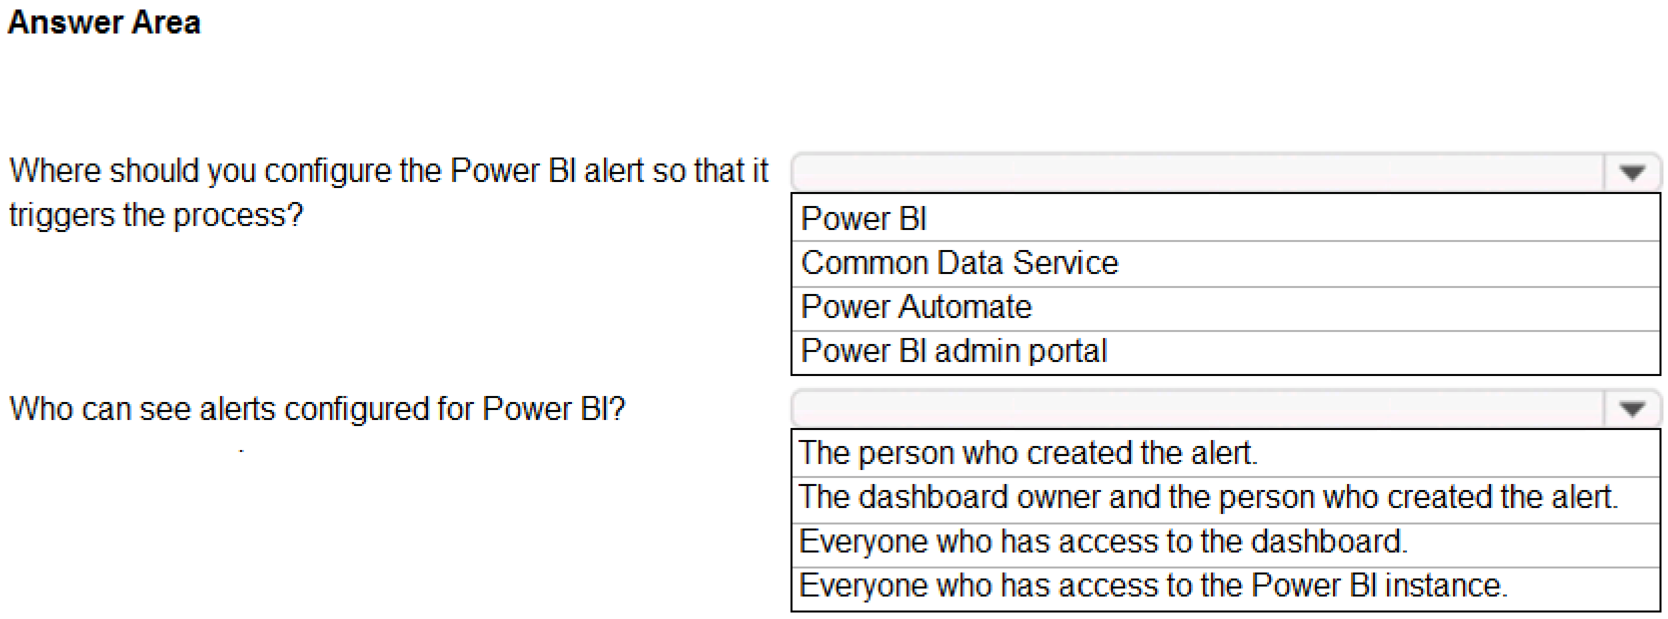
HOTSPOT -

You configure an alert in Power BI.

You need to alert users when the value of a tile exceeds a threshold. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:



Answer Area

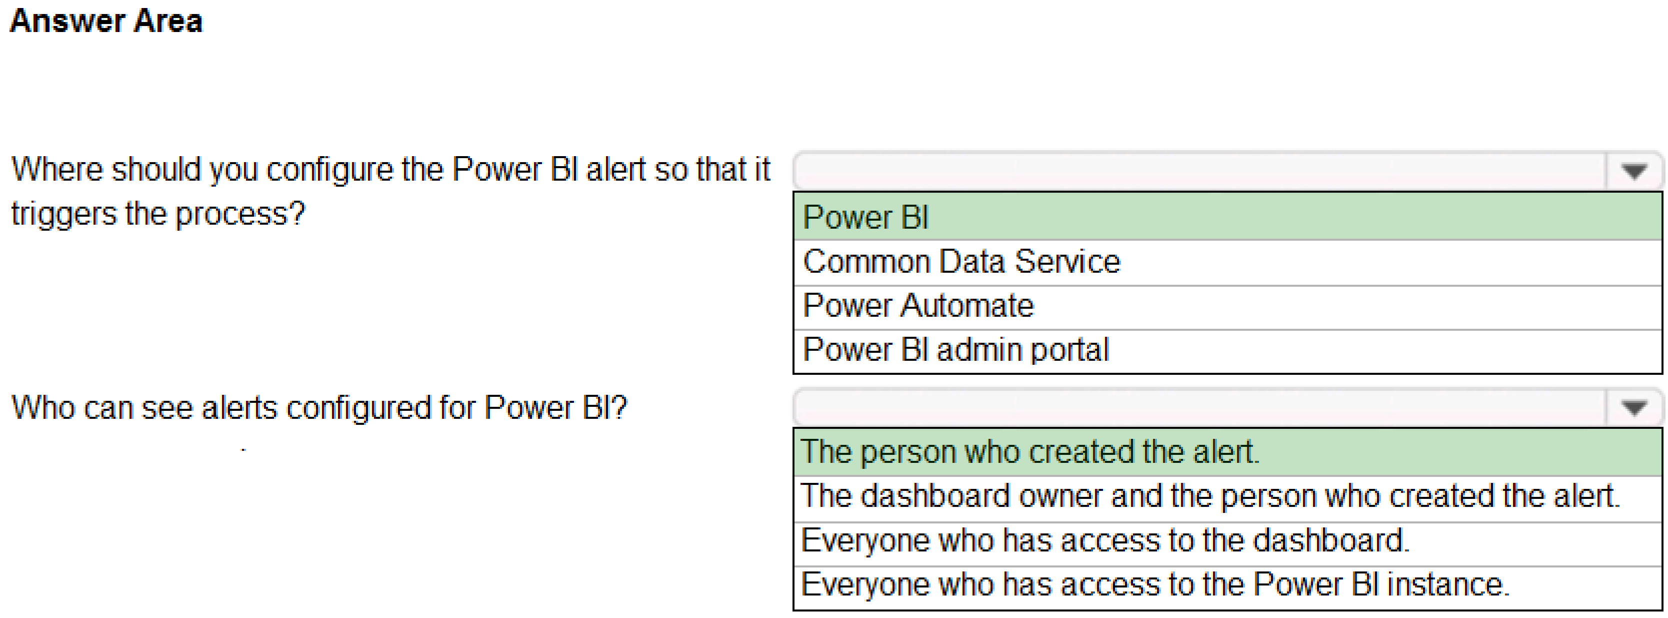
Where should you configure the Power BI alert so that it triggers the process?

- Power BI
- Common Data Service
- Power Automate
- Power BI admin portal

Who can see alerts configured for Power BI?

- The person who created the alert.
- The dashboard owner and the person who created the alert.
- Everyone who has access to the dashboard.
- Everyone who has access to the Power BI instance.

Correct Answer:



Answer Area

Where should you configure the Power BI alert so that it triggers the process?

- [✓ Power BI]
- Common Data Service
- Power Automate
- Power BI admin portal

Who can see alerts configured for Power BI?

- [✓ The person who created the alert.]
- The dashboard owner and the person who created the alert.
- Everyone who has access to the dashboard.
- Everyone who has access to the Power BI instance.

Reference:

https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts

Question #3 *Topic 5*

You are using Power BI to build a dashboard for a company.

You must make the dashboard available to a specific set of users, including employees and five external users. The number of employees that require access to the dashboard varies, but usually less than 100.

Employees and external users must not be permitted to share the dashboard with other users.

You need to share the dashboard with the employees and external users.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create a dynamic distribution list. Add all users to the distribution group and use the list to share the dashboard.

B. Sign into the Power BI service. Open the dashboard and select Share.

C. Enter the individual email address of internal and external users.

D. Sign into Power BI Desktop. Open the dashboard and select Share.

E. Clear the Allow recipients to share your dashboard (or report) option.

F. Create a distribution group. Add all users to the distribution group and use the list to share the dashboard.

Correct Answer: *BEF*

Question #4 *Topic 5*

You create a report by using Power BI Desktop and a Power BI dataset that is connected to Azure SQL Database.
Multiple groups of employees will use the report.
You need to ensure that each group of employees can see only data that pertains to their group.
What should you do?

A. Create and assign file security profiles.

B. Create and assign Common Data Service security roles.

C. Create and assign roles by using row-level security.

Correct Answer: *C*
Reference:
https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards

Question #5 *Topic 5*

HOTSPOT -

A company uses Common Data Service to manage account and contact information.

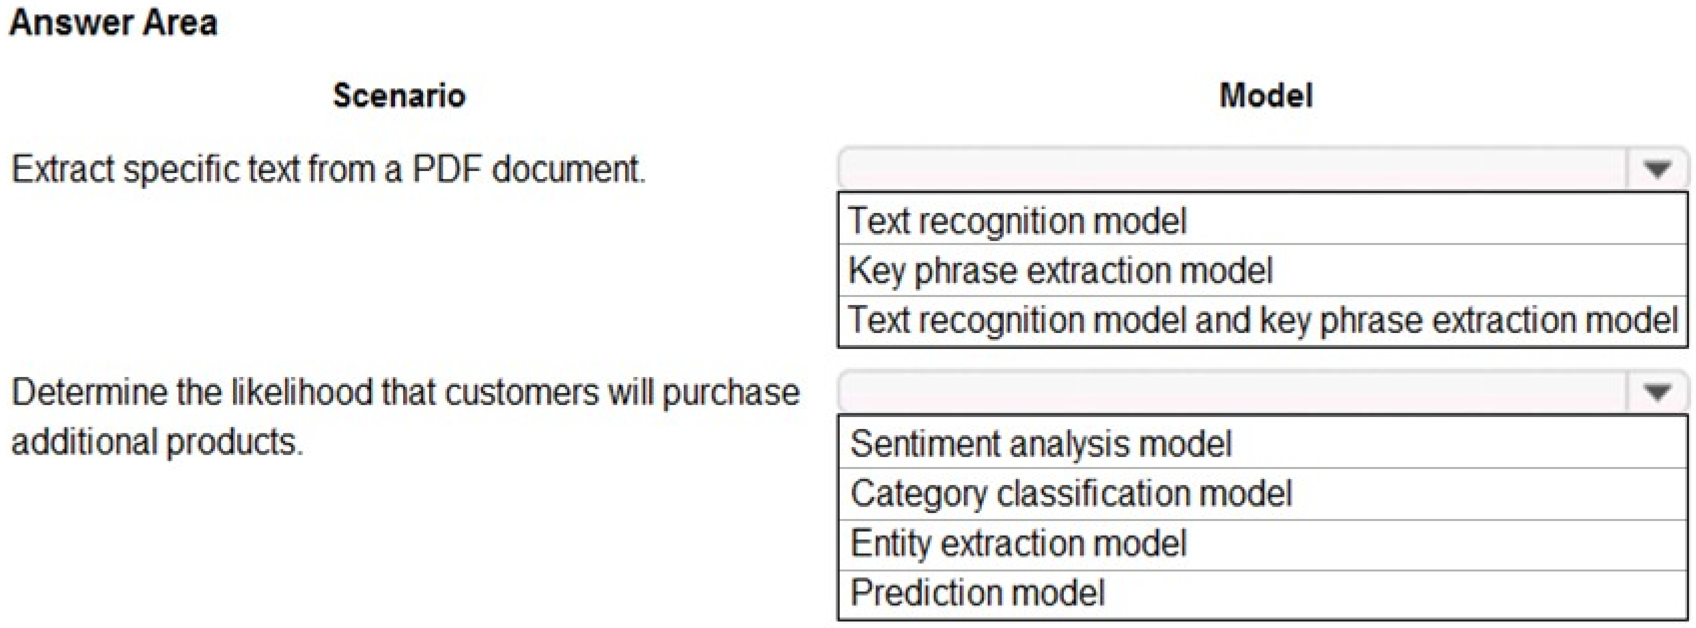
The company plans to use the AI Builder model to make key business decisions.

You need to integrate prebuilt AI Builder models with Power Automate flows.

Which models should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

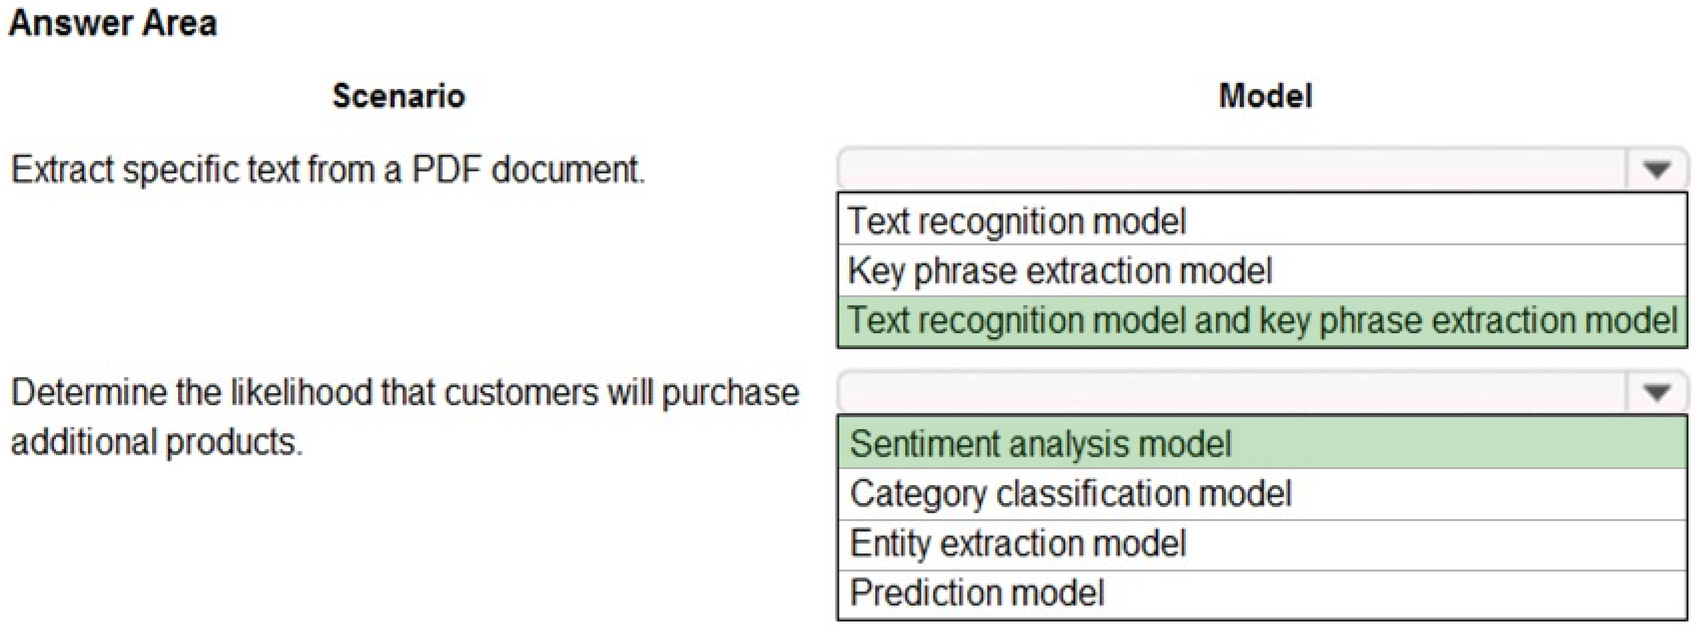
Hot Area:



Answer Area

Scenario	Model
Extract specific text from a PDF document.	Text recognition model Key phrase extraction model Text recognition model and key phrase extraction model
Determine the likelihood that customers will purchase additional products.	Sentiment analysis model Category classification model Entity extraction model Prediction model

Correct Answer:



Answer Area

Scenario	Model
Extract specific text from a PDF document.	Text recognition model Key phrase extraction model [✓ Text recognition model and key phrase extraction model]
Determine the likelihood that customers will purchase additional products.	[✓ Sentiment analysis model] Category classification model Entity extraction model Prediction model

Question #6 *Topic 5*

The sales manager receives a list of leads from a partner company monthly. The field names that are provided do not match the fields in Dynamics 365. A data map does not exist.

You need to import the leads without changing the data from the partner company.

What should you do?

A. Create a data map on the first import by using the Import Data wizard.

B. Add a template for Import Data.

C. Use Import File Translations.

D. Create a data map in Data Management.

Correct Answer: *A*

Reference:

https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/basics/import-accounts-leads-other-data

Question #7 *Topic 5*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled.

You need to recommend a storage solution that keeps storage costs low.

Solution: Enable server-based SharePoint integration.

Does this meet the goal?

A. Yes

B. No

Correct Answer: *A*

Question #8 *Topic 5*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled.
You need to recommend a storage solution that keeps storage costs low.
Solution: Enable OneNote integration.
Does this meet the goal?

A. Yes

B. No

Correct Answer: *B*

Question #9 *Topic 5*

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled.
You need to recommend a storage solution that keeps storage costs low.
Solution: Enable OneDrive for Business.
Does this meet the goal?

A. Yes

B. No

Correct Answer: *B*

Question #10 *Topic 5*

You are a Dynamics Sales administrator for a car dealership. The dealership uses only out-of-the-box functionality. When a new car is sold, the salesperson uses a Word template to generate a letter from the quote to thank the customer.
You need to determine if you can revise the template.
Which Word template change can you make?

A. Add the Discount field conditionally.

B. Format the table to have alternating color rows.

C. Format the Created On field to a long date format.

D. Add the address of the customer.

Correct Answer: *D*

Question #11 *Topic 5*

You manage the Dynamics 365 Customer Service environment for an organization.
Microsoft SharePoint will not be deployed in the environment for a year.
You need to integrate Microsoft Office 365 solutions with the Dynamics 365 instance to help the sales team with internal collaboration efforts.
Which three solutions can you currently implement? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Microsoft Skype for Business

B. Microsoft Exchange Online

C. Microsoft OneNote

D. Microsoft Yammer

E. Microsoft OneDrive for Business

Correct Answer: *ABD*

Topic 6 - Testlet 1

Question #1

Topic 6

Introductory Info

Case Study -

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Current environment. General -

Bookings at the resort have decreased. The company has decided to focus on creating a tailored, first-class experience for guests. The company also plans to target corporate meetings and events.

The company recently purchased a chatbot named FAQbot from AppSource. The chatbot uses the resort's existing FAQs.

Current environment. Communication

Communication between staff members is primarily conducted through email and SMS text messages.

Conversations between staff members and guests are often lost.

Conference calls are used for all group meetings.

Current environment. Event registration

Corporate customers can reserve a meeting room at the resort to host meetings. The meetings will include lunch and choice of either an inside-spa experience or a seasonally appropriate outdoor activity.

Event registration is conducted three weeks prior to start of the event. It is assumed that all event attendees will attend the meeting.

-

Current environment. Check-in progress

Guests wait in lines to check in and obtain name badges. At this time, guests can specify any dietary restrictions and select their activity preference. This can result in long wait times and crowding at the front desk.

For health and compliance reasons, guests must answer a series of questions with a yes or no answer during check-in. The front desk will ask and record these answers for the resort's records.

Current environment. Marketing -

At the check-in counter, the guests can drop their business cards into a bowl for a chance to win an all-inclusive weekend stay at the resort. The resort uses the business card information to send announcements about promotions and upcoming events.

Current environment. Resort policies and event inquiries

A guest can call or send an email to the event coordinator at the resort to get information about hotel policies, snow conditions, or to pre-select their after- meeting event.

Guests can also go to the website to view the extensive list of frequently asked questions (FAQ) compiled over the years. Many of the answers to the FAQ's are out of date.

Requirements. General -

Alpine Ski House does not employ technical staff and does not have the budget to hire an external firm to develop solutions. There are two team members who are proficient at Microsoft Excel formulas. Any solution created must use the capabilities of current team members.

All solutions must be simple to use, easy to maintain, and represent the brand of the resort.

You must implement the following solutions:

a centrally managed communication solution

a customer service solution

a resort portal

a chat solution

a check-in solution

Requirements. Communication -

Communication between team members must be centrally managed and unified in Microsoft Teams.

When the company confirms an event, they must provide a list of guest's names and email addresses.

You must send guests a welcome email that includes a unique registration number for authentication with the resort's portal.

Guests must receive a separate email to verify proof of ownership for their registration.

Requirements. Event attendance -

Guests must create an account and sign into a resort portal to confirm their attendance to an event and pre-select an after-meeting event.

Prior to the event, guests must be able to identify any personal dietary restrictions.

Requirements. Check-in processes

Check-in processes must be self-service. Each screen must ask for specific data from the guest. The check-in solution will use some data that is stored in

Microsoft Excel.

The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.

The check-in solution must have a screen where the guest will select either yes or no to health and wellness questions. Guests must physically interact with each answer before proceeding to the next screen.

Guests must be able to confirm any dietary restrictions they may have entered from the portal or add new ones at this time.

Data must be entered in each screen before users move on to the next screen.

Requirements. Marketing -

To eliminate the handling of business cards, the check-in solution must be able to translate the contents of the business cards into Alpine Ski House's marketing system.

The solution must not require any effort or manual entry from the guest to prevent any mistyped information and to make it more appealing to the guest to participate.

Requirements. Hotel policies and event inquiries

The portal must allow the guests to ask questions about hotel policies, event information, weather reports, and current weather conditions at the resort.

Requirements. Chat solution -

The chat solution must specifically address the following key words. No additional key words will be added until a later implementation phase:

Snow reports
Weather conditions
Start time
End time
Event date
Outdoor activities
Indoor activities
Most popular

The chat solution must be available always and not require staff to answer all of the questions. If a question does require a staff member's attention, the solution must determine which staff member is best to assist the customer with the question.

The information in the FAQ on the legacy website must be used in the chat solution but retyping all the data from the website should not be required. If guests ask about topics that are not listed in the FAQ the chat solution must identify the issue and escalate to a staff member.

Team members must be able to ask their own questions through a centrally managed communication solution instead of using the guest portal.

Team members must be able to access the same FAQ across multiple solutions.

Issue -

Guest1 inquires about snow conditions several times during each day of their stay.

Question

You need to add controls to the check-in solution for the health and wellness questions.

Which form control should you use?

A. Drop down

B. Check box

C. Text input

Correct Answer: *B*

Question #2 *Topic 6*

Answer Area

Requirement	Solution
Implement the invitation code redemption process.	Auto-populate the invitation code field on the sign-in screen from the email link. [✓ Embed the invitation code in the email link URL.] Send the customer their username and temporary password in the email link.
Validate the user's email.	Two-factor authentication Azure Active Directory authentication Social provider sign-in [✓ Invitation code sign-up]

Topic 7 - Testlet 2

Question #1 *Topic 7*

Introductory Info

Case Study -

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Current environment. General -

Bookings at the resort have decreased. The company has decided to focus on creating a tailored, first-class experience for guests. The company also plans to target corporate meetings and events.

The company recently purchased a chatbot named FAQbot from AppSource. The chatbot uses the resort's existing FAQs.

Current environment. Communication

Communication between staff members is primarily conducted through email and SMS text messages.

Conversations between staff members and guests are often lost.

Conference calls are used for all group meetings.

Current environment. Event registration

Corporate customers can reserve a meeting room at the resort to host meetings. The meetings will include lunch and choice of either an inside-spa experience or a seasonally appropriate outdoor activity.

Event registration is conducted three weeks prior to start of the event. It is assumed that all event attendees will attend the meeting.

▪

Current environment. Check-in progress

Guests wait in lines to check in and obtain name badges. At this time, guests can specify any dietary restrictions and select their activity preference. This can result in long wait times and crowding at the front desk.

For health and compliance reasons, guests must answer a series of questions with a yes or no answer during check-in. The front desk will ask and record these answers for the resort's records.

Current environment. Marketing -

At the check-in counter, the guests can drop their business cards into a bowl for a chance to win an all-inclusive weekend stay at the resort. The resort uses the business card information to send announcements about promotions and upcoming events.

Current environment. Resort policies and event inquiries

A guest can call or send an email to the event coordinator at the resort to get information about hotel policies, snow conditions, or to pre-select their after- meeting event.

Guests can also go to the website to view the extensive list of frequently asked questions (FAQ) compiled over the years. Many of the answers to the FAQ's are out of date.

Requirements. General -

Alpine Ski House does not employ technical staff and does not have the budget to hire an external firm to develop solutions. There are two team members who are proficient at Microsoft Excel formulas. Any solution created must use the capabilities of current team members.

All solutions must be simple to use, easy to maintain, and represent the brand of the resort.

You must implement the following solutions:

a centrally managed communication solution
a customer service solution
a resort portal
a chat solution
a check-in solution

Requirements. Communication -
Communication between team members must be centrally managed and unified in Microsoft Teams.
When the company confirms an event, they must provide a list of guest's names and email addresses.
You must send guests a welcome email that includes a unique registration number for authentication with the resort's portal.
Guests must receive a separate email to verify proof of ownership for their registration.

Requirements. Event attendance -
Guests must create an account and sign into a resort portal to confirm their attendance to an event and pre-select an after-meeting event.
Prior to the event, guests must be able to identify any personal dietary restrictions.
Requirements. Check-in processes
Check-in processes must be self-service. Each screen must ask for specific data from the guest. The check-in solution will use some data that is stored in
Microsoft Excel.
The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.
The check-in solution must have a screen where the guest will select either yes or no to health and wellness questions. Guests must physically interact with each answer before proceeding to the next screen.
Guests must be able to confirm any dietary restrictions they may have entered from the portal or add new ones at this time.
Data must be entered in each screen before users move on to the next screen.

Requirements. Marketing -
To eliminate the handling of business cards, the check-in solution must be able to translate the contents of the business cards into Alpine Ski House's marketing system.
The solution must not require any effort or manual entry from the guest to prevent any mistyped information and to make it more appealing to the guest to participate.
Requirements. Hotel policies and event inquiries
The portal must allow the guests to ask questions about hotel policies, event information, weather reports, and current weather conditions at the resort.

Requirements. Chat solution -
The chat solution must specifically address the following key words. No additional key words will be added until a later implementation phase:
Snow reports
Weather conditions
Start time
End time
Event date
Outdoor activities
Indoor activities
Most popular
The chat solution must be available always and not require staff to answer all of the questions. If a question does require a staff member's attention, the solution must determine which staff member is best to assist the customer with the question.
The information in the FAQ on the legacy website must be used in the chat solution but retyping all the data from the website should not be required. If guests ask about topics that are not listed in the FAQ the chat solution must identify the issue and escalate to a staff member.
Team members must be able to ask their own questions through a centrally managed communication solution instead of using the guest portal.
Team members must be able to access the same FAQ across multiple solutions.

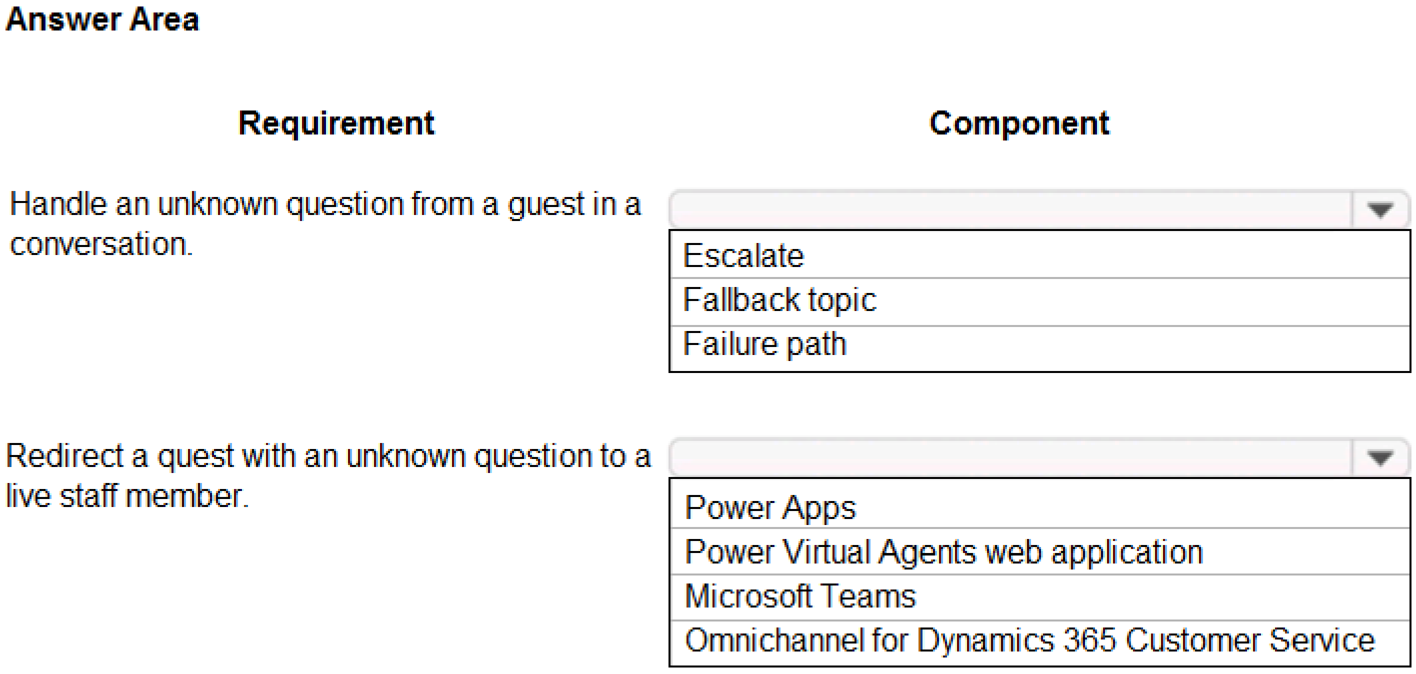
Issue -
Guest1 inquires about snow conditions several times during each day of their stay.

Question

HOTSPOT -
You need to design the FAQ solution to handle unknown responses.
Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:



Answer Area

Requirement | **Component**

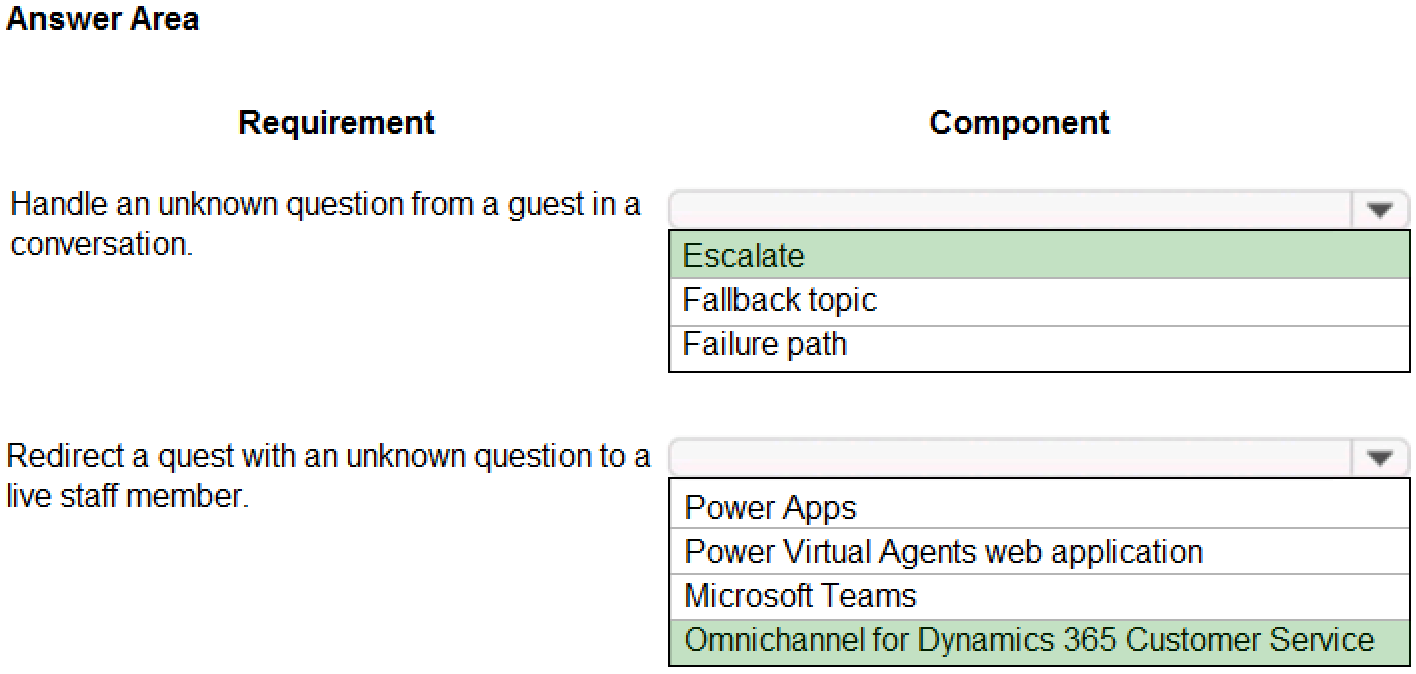
Handle an unknown question from a guest in a conversation.

Escalate
Fallback topic
Failure path

Redirect a quest with an unknown question to a live staff member.

Power Apps
Power Virtual Agents web application
Microsoft Teams
Omnichannel for Dynamics 365 Customer Service

Correct Answer:



Answer Area

Requirement | **Component**

Handle an unknown question from a guest in a conversation.

[✓ Escalate]
Fallback topic
Failure path

Redirect a quest with an unknown question to a live staff member.

Power Apps
Power Virtual Agents web application
Microsoft Teams
[✓ Omnichannel for Dynamics 365 Customer Service]
