Topic 1 - Single Topic

Question #1

Topic 1

This question requires that you evaluate the underlined text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select **No change is needed**. If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. one
- C. three
- D. four

Correct Answer: C

Restore a canvas app to a previous version in PowerApps.

1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

Details • Share • Versions • Settings • Analytics (preview)

PowerApps keeps a version history of your apps.

VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE	PUBLISHED	COMMENT
2	8/20/2018 2:24:29 PM	Firstname Lastname	3.18081.19	Live	Restore Delete
1	7/9/2018 10:55:48 AM	Firstname LastName	3.18071.36		Restore Delete

4. In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

Details • Share • Versions • Settings • Analytics (preview)

PowerApps keeps a version history of your apps.

VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE	PUBLISHED	COMMENT
3	8/20/2018 2:41:30 PM	Firstname Lastname	3.18071.36		Publish this version
2	8/20/2018 2:24:29 PM	Firstname Lastname	3.18081.19	Live	Restore Delete
1	7/9/2018 10:55:48 AM	Firstname Lastname	3.18071.36		Restore Delete

Question #2

Topic 1

A company uses Dynamics 365 Sales. The company uses a browser-based app named Sales Hub.

You need to ensure that users can access data from mobile devices.

Which app should users install?

- A. Dynamics 365 Remote Assist
- B. Dynamics 365 Finance
- C. Dynamics 365 Business Central
- D. Dynamics 365 for Phones

Correct Answer: D

Use the Dynamics 365 for phones and Dynamics 365 for tablets apps for your sales, customer service, field service, and other tasks when you're on the go. With one download from your app store, you'll automatically have access to all the apps you need for your role. You will see apps with the new Unified Interface on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/mobile-app/dynamics-365-phones-tablets-users-guide>

Question #3

Topic 1

You are a customer service manager.

You need to implement a Power Apps portal that allows customers to submit cases.

Which type of data source is used?

- A. Dynamics 365 Connector
- B. Microsoft SharePoint
- C. Microsoft Azure Storage
- D. Common Data Service

Correct Answer: B

SharePoint can be set up to setup customer feedback.

Note: The PowerApp uses Finance and Operations connector to grab sales order information and SharePoint connector to connect and write the data to

SharePoint list.

Reference:

<https://powerapps.microsoft.com/en-us/blog/scenario-2-collect-customer-feedback-in-sharepoint-after-order-delivery/>

Question #4

HOTSPOT -

You create a user-owned custom entity by using Common Data Service.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
Correct Answer: You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input checked="" type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No -

Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.

Box 2: Yes -

By combining conditions and actions, you can do any of the following with business rules:

Set field values -

Clear field values -

Set field requirement levels -

Show or hide fields -

Enable or disable fields -

Validate data and show error messages

Create business recommendations based on business intelligence.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds>

Question #5

Topic 1

DRAG DROP -

You need to explain the major components of the Common Data Model (CDM) and their functions.

Match each term to its definition.

Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

Entities
Data connectors
Common Data Service
Common Data Model
Workflows

Answer Area

Purpose

Tool

Helps jumpstart application development by leveraging business logic, security, and integrations.

Tool

A set of records used to store data.

Tool

Correct Answer:

Tools

Entities
Data connectors
Common Data Service
Common Data Model
Workflows

Answer Area

Purpose

Tool

Helps jumpstart application development by leveraging business logic, security, and integrations.

Common Data Service

A set of records used to store data.

Entities

Box 1: Common Data Service -

Note: Common Data Service has been renamed to Dataverse.

By using Dataverse, you can jump-start app development by using the Common Data Model with business logic, security, and integration already built-in.

Box 2: Entities -

An entity is a set of records used to store data, similar to how a table stores data within a database.

Reference:

<https://docs.microsoft.com/en-us/common-data-model/use>

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-intro>

Question #6

Topic 1

A distribution company has multiple warehouses.
Tax rates charged on sales orders need to be calculated based on locality and region.
You need to recommend a cost-effective solution that can be implemented quickly.
What should you recommend?

- A. Check AppSource for a tax add-on.
- B. Create alerts in Dynamics 365 Finance for tax table changes.
- C. Implement the Common Data Model.
- D. Run a Power BI report.
- E. Write scripts and code tax updates.

Correct Answer: *B*

Reference:

<https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/indirect-taxes-overview>

Question #7

Topic 1

DRAG DROP -

You manage the support team at a rapidly growing company.

Customers and support technicians need a better experience when logging and responding to support requests. You need more visibility into what the support technicians are doing every week.

You need to recommend tools to help the company's needs.

Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools	Answer Area	Requirement	Tool
Power Apps portal		Customers must be able to submit support requests by using a website.	
Power Automate		Support requests must be created and stored.	
Power BI		Support technicians must be notified when a new support request is entered.	
Common Data Service		Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	

Correct Answer:

Tools	Answer Area	Requirement	Tool
Power Apps portal		Customers must be able to submit support requests by using a website.	Power BI
Power Automate		Support requests must be created and stored.	Common Data Service
Power BI		Support technicians must be notified when a new support request is entered.	Power Automate
Common Data Service		Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Power Apps portal

Question #8

Topic 1

HOTSPOT -

You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	<input type="radio"/>	<input type="radio"/>
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	<input type="radio"/>	<input checked="" type="radio"/>
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	<input type="radio"/>	<input checked="" type="radio"/>

Box 1: No -

When you offer your application for use by other companies through a purchase or subscription, you make your application available to customers within their own

Azure tenants. This is known as creating a multi-tenant application.

Box 2: No -

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/isv-sso-content>

Question #9

Topic 1

You need to implement Microsoft Business Applications along with the Microsoft Power platform.

Which three Microsoft products are part of the Power platform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Power Apps
- B. Azure Active Directory
- C. Power Automate
- D. Azure Machine Learning
- E. Microsoft Power BI

Correct Answer: ACE

The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

Reference:

<https://docs.microsoft.com/en-us/learn/powerplatform/>

Question #10

Topic 1

HOTSPOT -

A company plans to implement Power Platform apps. The company does not plan to use any development tools or plug-ins.

Which actions can you perform?

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
-----------	-----	----

You can synchronize account information from Dynamics 365 Sales with a third-party database.

You can create invoices from orders and then send the invoices to the customer by using a Power Automate flow.

Answer Area

Statement	Yes	No
-----------	-----	----

Correct Answer: You can synchronize account information from Dynamics 365 Sales with a third-party database.

You can create invoices from orders and then send the invoices to the customer by using a Power Automate flow.

The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

Reference:

<https://docs.microsoft.com/en-us/learn/powerplatform/>

Question #11

Topic 1

A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.

The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.

You need to recommend a tool to determine software usage.

What should you recommend?

- A. Microsoft Intune
- B. Azure Stream Analytics
- C. Power Platform Analytics
- D. Dynamics 365 Product Insights

Correct Answer: C

The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/analytics-powerapps>

Question #12

DRAG DROP -

A company uses Power Apps.

You need to perform administrative tasks for the company.

Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Admin centers	Answer Area	Requirement	Admin center
Azure Active Directory		Create user accounts for Power Apps.	Admin center
Dynamics 365 Admin center			
Power Apps Admin center		Assign the Environment Maker role to a user.	Admin center
Power BI Admin portal			

Correct Answer:

Admin centers	Answer Area	Requirement	Admin center
Azure Active Directory		Create user accounts for Power Apps.	Azure Active Directory
Dynamics 365 Admin center			
Power Apps Admin center		Assign the Environment Maker role to a user.	Power Apps Admin center
Power BI Admin portal			

Box 1: Azure Active Directory -

Create the company users in the Azure Active Directory.

Box 2: Power Apps admin center -

In the Power Apps Admin center, manage environments that you've created and those for which you have been added to the Environment Admin or System

Administrator role. From the admin center, you can perform these administrative actions:

Create environments.

Rename environments.

Add or remove a user or group from either the Environment Admin or Environment Maker role.

Etc.

Incorrect Answers:

☞ Use the Dynamics 365 admin center to review the status of your apps and solutions, apply updates, and manage your Dynamics 365 instances, solutions, and apps.

☞ The Power BI admin portal enables you to manage a Power BI tenant for your organization. The portal includes items such as usage metrics, access to the

Microsoft 365 admin center, and settings

Note: You use the Microsoft 365 admin center to create user accounts for every user who needs access to model-driven apps in Dynamics 365, such as

Dynamics 365 Sales and Customer Service.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-administration> <https://docs.microsoft.com/en-us/dynamics365/marketing/dynamics-365-admin-center> <https://powerapps.microsoft.com/sv-se/blog/introducing-admin-center-for-powerapps/>

Question #13

Topic 1

HOTSPOT -

A rapidly growing company produces Office 365 licenses for all employees. The company wants to empower users to build apps, automate business processes, and analyze data without requiring IT expertise or development skills and without increasing IT expenses and dependencies. You need to recommend tools so that users can accomplish specific tasks.

Which tools should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario

Application

Build automatic workflows that access multiple data sources.

AI Builder
Power Apps
Power Automate

Application

AI Builder
Power Apps
Power Automate
Azure Functions
Power BI

Create custom apps that address specific business needs.

AI Builder
Power Apps
Power Automate
Azure Functions
Power BI

Design insightful data visualizations.

AI Builder
Power Apps
Power Automate
Azure Functions
Power BI

Box 1: Power Automate -

Power Automate, formerly known as Microsoft Flow, is cloud-based software that allows employees to create and automate workflows and tasks across multiple applications and services without help from developers.

Box 2: Power Apps -

PowerApps is a suite of apps, services, connectors and data platform that provides a rapid application development environment to build custom apps for your business needs.

Box 3: Power BI -

Power BI is a business analytics solution that lets you visualize your data and share insights across your organization, or embed them in your app or website.

Connect to hundreds of data sources and bring your data to life with live dashboards and reports.

Reference:

<https://docs.microsoft.com/en-us/powerapps/powerapps-overview>

Question #14

Topic 1

HOTSPOT -

A company plans to use Power Platform to build apps which address specific business challenges.

You need to recommend the appropriate types of Power Apps to use.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Scenario**

Field technicians need a mobile app to capture the location and the image of defective products.

Tool

▼
Canvas app
Power Apps Portals
Common Data Service

Sales representatives need to see different views and dashboards in the sales app.

▼
Canvas app
Model-driven app
Power Apps Portals

Correct Answer:

Answer Area**Scenario**

Question #18

Topic 1

HOTSPOT -

A company is evaluating ways to connect Power Platform apps to external services to perform complex activities.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
------------	-----	----

You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.

You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.

Correct Answer:

Answer Area

Statements	Yes	No
------------	-----	----

You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.

You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.

Reference:

<https://docs.microsoft.com/en-us/azure/cognitive-services/cognitive-services-and-machine-learning>

Question #19

Topic 1

You create a business rule on contact entity to enforce the requirement that users must enter either a telephone number, fax number, or an email when creating a new record.

The company decides to remove fax number from the condition.

You need to update the business rule.

What are two ways of achieving the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Save a copy of the rule and change the condition. Deactivate and delete the original rule.
- B. Deactivate the business rule and change the condition.
- C. Take a snapshot of the business rule and change the condition.
- D. Change the condition and activate the change.

Correct Answer: AD

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-rules>

Question #20

Topic 1

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker.

What should you recommend?

- A. Create a custom connector.
- B. Ask the outside source to send you the data once a week.
- C. Use Microsoft Flow to connect to the database.
- D. Open a ticket with Microsoft and request a new connector.
- E. Use Microsoft Azure Service Bus.

Correct Answer: A

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.

Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

Reference:

<https://carinaclaesson.com/2019/09/06/setting-up-a-custom-connector-from-an-openapi-file-and-utilizing-it-in-powerapps-and-flow/>

Question #21

Topic 1

A toy company creates a text classification model in AI Builder to monitor customer feedback for specific key words.

When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a canvas app.
- B. Implement the Virtual Agent.
- C. Build a Power Automate flow.
- D. Use the Common Data Model.

Correct Answer: AC

A (not D): AI Builder comes with:

A ready-to-use business card reader available in canvas as well as in model-driven apps.

Business card reader (Canvas)

Business card reader (Model-driven)

Additional canvas components to leverage your AI Builder form processing or object detection models canvas apps.

C: Use the results from your AI model across Power Platform to create end-to-end solutions that meet your business needs, even if you have no coding skills. For example, create a flow that automates document processing in Power Automate, or an app created with PowerApps that predicts whether a supplier will be out of compliance.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/use-in-powerapps-overview>

Question #22

Topic 1

HOTSPOT -

A company plans to use Power BI to visualize data from business systems.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	<input type="radio"/>	<input type="radio"/>
You can display related data from multiple sources in the same Power BI report.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
Correct Answer: You can display data aggregates and raw data in a Power BI report.	<input checked="" type="radio"/>	<input type="radio"/>
You can display related data from multiple sources in the same Power BI report.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes -

The following list provides advantages to using aggregations:

Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset. Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.

Box 2: Yes -

With Power BI Desktop, you can connect to many different types of data sources, then shape the data to meet your needs, enabling you to create visual reports to share with others. Shaping data means transforming the data: renaming columns or tables, changing text to numbers, removing rows, setting the first row as headers, and so on. Combining data means connecting to two or more data sources, shaping them as needed, then consolidating them into a useful query.

Reference:

<https://docs.microsoft.com/en-us/power-bi/desktop-aggregations> <https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-shape-and-combine-data>

Question #23

A company is evaluating ways that they can implement AI Builder.

For which two scenarios can you use AI Builder? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Send emails to all users who subscribe to a service.
- B. Synchronize data from an external database.
- C. Collect data from several data sources and display a dashboard that shows trending data.
- D. Interpret images and perform an action on the image.**
- E. Detect patterns in data and predict outcomes.

Correct Answer: DE

Reference:

<https://powerapps.microsoft.com/en-us/blog/introducing-ai-builder-for-powerplatform/>

Question #24

HOTSPOT -

A company plans to create Power Platform apps that consume industry-standard and proprietary data sources.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	<input type="radio"/>	<input type="radio"/>
Custom connectors are supported in instant flows only.	<input type="radio"/>	<input type="radio"/>
Standard and custom connectors cannot be mixed within the same flow or app.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	<input checked="" type="radio"/>	<input type="radio"/>
Custom connectors are supported in instant flows only.	<input type="radio"/>	<input checked="" type="radio"/>
Standard and custom connectors cannot be mixed within the same flow or app.	<input checked="" type="radio"/>	<input type="radio"/>

Question #25

Topic 1

HOTSPOT -

A company is evaluating Power Platform and has questions about the role that Common Data Service plays in using Power Apps and Power Automate.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Model-driven apps require a Common Data Service database.	<input type="radio"/>	<input type="radio"/>
A flow instance can only access one Common Data Service database.	<input type="radio"/>	<input type="radio"/>
Canvas apps require a Common Data Service database.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Model-driven apps require a Common Data Service database.	<input checked="" type="radio"/>	<input type="radio"/>
A flow instance can only access one Common Data Service database.	<input checked="" type="radio"/>	<input type="radio"/>
Canvas apps require a Common Data Service database.	<input checked="" type="radio"/>	<input type="radio"/>

Question #26

Topic 1

HOTSPOT -

A company plans to create a Common Data Service environment.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can create a Common Data Service environment in the Power Platform Admin center.	<input type="radio"/>	<input type="radio"/>
You must enable data encryption after you create a Common Data Service environment.	<input type="radio"/>	<input type="radio"/>
You can control security roles and privileges in a Common Data Service environment from the Power Apps Admin center.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
You can create a Common Data Service environment in the Power Platform Admin center.	<input checked="" type="radio"/>	<input type="radio"/>
You must enable data encryption after you create a Common Data Service environment.	<input type="radio"/>	<input checked="" type="radio"/>
You can control security roles and privileges in a Common Data Service environment from the Power Apps Admin center.	<input checked="" type="radio"/>	<input type="radio"/>

Correct Answer:

- You must enable data encryption after you create a Common Data Service environment.
You can control security roles and privileges in a Common Data Service environment from the Power Apps Admin center.

Question #27

A company plans to use AI Builder to help improve business performance.
You need to determine which AI Models are available for use.
Which three types of models can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. linear regression
- B. prediction
- C. object detection
- D. anomaly detection
- E. text classification

Correct Answer: BCE

Reference:

<https://docs.microsoft.com/en-us/ai-builder/model-types>

Question #28

A company uses Microsoft 365 and Dynamics 365 Sales. The company does not have any developers on its staff.
You need to explain to the executives the benefits of using Power Platform apps.
What are two benefits? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Users can send emails from Dynamics 365 Sales to their personal email addresses.
- B. Users can create Power Apps to create apps for different departments.
- C. Users can use Power Automate to share information between Microsoft 365 and Dynamics 365 Sales.
- D. The company can unify all the mobile devices to one vendor.

Correct Answer: BC

Question #29

Topic 1

HOTSPOT -

A company needs to create several workflows and applications to help streamline their sales operations.

You need to determine which applications are appropriate for given scenarios.

Which applications should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario	Application
Create no-code workflows that use different systems.	<div style="border: 1px solid black; padding: 5px;"><input type="checkbox"/> Azure Logic Apps <input type="checkbox"/> Power Apps <input type="checkbox"/> Power Automate <input type="checkbox"/> Dynamics 365 workflows</div>
Build a no-code mobile application.	<div style="border: 1px solid black; padding: 5px;"><input type="checkbox"/> Azure Logic Apps <input type="checkbox"/> Power Apps <input type="checkbox"/> Power Automate <input type="checkbox"/> Dynamics 365 workflows</div>
Administer your workflow in Microsoft Azure.	<div style="border: 1px solid black; padding: 5px;"><input type="checkbox"/> Azure Logic Apps <input type="checkbox"/> Power Apps <input type="checkbox"/> Power Automate <input type="checkbox"/> Dynamics 365 workflows</div>
Build a mobile application by using Common Data Service.	<div style="border: 1px solid black; padding: 5px;"><input type="checkbox"/> Azure Logic Apps <input type="checkbox"/> Power Apps <input type="checkbox"/> Power Automate <input type="checkbox"/> Dynamics 365 workflows</div>

Answer Area**Scenario****Application**

Create no-code workflows that use different systems.

Azure Logic Apps
Power Apps
Power Automate
Dynamics 365 workflows

Build a no-code mobile application.

Azure Logic Apps
Power Apps
Power Automate
Dynamics 365 workflows

Correct Answer:

Administer your workflow in Microsoft Azure.

Azure Logic Apps
Power Apps
Power Automate
Dynamics 365 workflows

Build a mobile application by using Common Data Service.

Azure Logic Apps
Power Apps
Power Automate
Dynamics 365 workflows

Reference:

<https://docs.microsoft.com/en-us/power-automate/getting-started> <https://docs.microsoft.com/en-us/azure/logic-apps/logic-apps-overview>
<https://powerapps.microsoft.com/pl-pl/blog/business-model-may/>

Question #30

Topic 1

A company uses Dynamics 365 Supply Chain Management and Dynamics 365 Finance.

User account data must be synchronized between the two systems.

You need to ensure that the synchronized data is stored in one place.

What should you use?

- A. Azure IoT Central
- B. Azure Active Directory
- C. SQL Server
- D. Common Data Service

Correct Answer: D

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/data-integrator>

Question #31

Topic 1

What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?

- A. Use Common Data Services to connect to application data.
- B. You only need to set up groups in Microsoft 365 for permissions to all data.
- C. Users can access both Microsoft 365 and Dynamics 365 by using Single Sign-on (SSO).

Correct Answer: A

Question #32

HOTSPOT -

You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	<input type="radio"/>	<input type="radio"/>
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	<input type="radio"/>	<input type="radio"/>
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	<input checked="" type="radio"/>	<input type="radio"/>
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	<input type="radio"/>	<input checked="" type="radio"/>
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes -

You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.

Box 2: No -

The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:

Windows: Microsoft Edge / Narrator

macOS: Safari / VoiceOver

Android: PowerApps app / Talkback

iOS: PowerApps app / VoiceOver

Box 3: Yes -

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

Reference:

<https://docs.microsoft.com/en-us/powerapps/user/keyboard-shortcuts> <https://docs.microsoft.com/en-us/powerapps/user/screen-reader>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

Question #33

Topic 1

DRAG DROP -

A bank uses Power Platform apps and flows to support business processes.

The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Actions

Train the model.

Use the model in PowerApps or Power Automate.

Export data into AI Builder.

Publish the model.

Import data into Common Data Service.

Correct Answer:

Answer Area

Actions

Train the model.

Use the model in PowerApps or Power Automate.

Export data into AI Builder.

Publish the model.

Import data into Common Data Service.

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data

Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model -

Step 3: Publish the model -

The last step is to publish your model.

Step 4: Use the model in PowerApps or Power Automate.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/build-model>

Question #34

DRAG DROP -

A company plans to implement solutions that use Common Data Service as a data storage.

You need to recommend features to meet the company's needs.

Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Features	Answer Area	Requirement	Feature
business rules		Validate data across multiple fields and entities regardless of the app used to create data.	
business process flows		Create visual guides to ensure that users enter data and perform tasks in a consistent manner.	
Common Data Model		Accelerate development by using a standard set of entities for the most common scenarios.	

Correct Answer:

Features	Answer Area	Requirement	Feature
business rules		Validate data across multiple fields and entities regardless of the app used to create data.	business rules
business process flows		Create visual guides to ensure that users enter data and perform tasks in a consistent manner.	business process flows
Common Data Model		Accelerate development by using a standard set of entities for the most common scenarios.	Common Data Model

Box 1: business rules -

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: business process flows -

Flows Power Automate includes several types of processes, each designed for a different purpose:

- Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.
- Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.
- Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
- Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
- Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.

Box 3: Common Data Model -

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-processes>

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/model-driven-app-overview>

Question #35

Topic 1

DRAG DROP -

A manufacturing company is evaluating AI Builder.

You need to select AI Builder models to address specified requirements.

Which model types should you use? To answer, drag the appropriate model types to the correct requirements. Each model type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Model types prediction form processing object detection**Answer Area****Requirement**

Identify products without labels or serial numbers.

Identify customers who might not pay their invoices on time.

Model type

Correct Answer:

Model types form processing**Answer Area****Requirement**

Identify products without labels or serial numbers.

Identify customers who might not pay their invoices on time.

Model type object detection prediction

Question #36

Topic 1

DRAG DROP -

You manage the support team at a rapidly growing company.

Support technicians need a better experience when logging and responding to support requests.

You need to recommend tools to help the company's needs.

Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools	Answer Area	Requirement	Tool
Power Apps		Support technicians must be able to submit support requests by using an app.	
Power Automate		Customer data must be stored and synchronized with Dynamics 365 Finance.	
Power BI		Support technicians must be notified when a new support request is entered.	
Common Data Service			

Correct Answer:

Tools	Answer Area	Requirement	Tool
		Support technicians must be able to submit support requests by using an app.	Power Apps
		Customer data must be stored and synchronized with Dynamics 365 Finance.	Common Data Service
Power BI		Support technicians must be notified when a new support request is entered.	Power Automate

Question #39

Topic 1

HOTSPOT -

You are a retail director for a large clothing company. Each week you use the corporate YouTube channel to create a video that highlights new initiatives, and goals for retail operations.

You need to design a Power Apps app that streams the videos to internal users.

Which objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Action****Option**

Implement the Power Apps app.

Use drag and drop to add a video to the app.

Apply consistent company colors to the app.

**Answer Area****Action****Option**

Implement the Power Apps app.

Use drag and drop to add a video to the app.

Apply consistent company colors to the app.

Question #41

Topic 1

A company is building apps to support their business operations. The apps will use connectors to access data from several data sources and respond to a number of events generated by components.

Which two operations can you use for connectors? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Actions
- B. Plug-ins
- C. Gateways
- D. Triggers

Correct Answer: AC

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections-list>

Question #42

Topic 1

You are a sales manager for a large retail organization.

You are creating a Power Apps app that will display customer product purchase information from your old point-of-sale (POS) system and need to link those sales to the customer accounts and product sales in Dynamics 365 Commerce.

You need to use the appropriate component.

What should you use?

- A. Common Data Service
- B. business process flow
- C. entity metadata
- D. business rule

Correct Answer: A

Question #43

Topic 1

A manufacturing company uses Internet of Things (IoT) devices to monitor the temperature in different parts of their warehouse.

The current IoT monitoring software is extremely outdated and is not user friendly.

You need to view near-real time information from the IoT devices in Power BI Service dashboards.

Which tool should you use?

A. Scheduled refresh dataset

B. Streaming dataset

C. Content Pack dataset

D. Power BI dataflows

E. Quick Insights

Correct Answer: B

Reference:

<https://docs.microsoft.com/en-us/power-bi/service-real-time-streaming> <https://powerbi.microsoft.com/en-us/blog/using-power-bi-real-time-dashboards-to-display-iot-sensor-data-a-step-by-step-tutorial/>

Question #44

Topic 1

HOTSPOT -

You have a Power BI report with a page named RevReceived. The page shows gross revenue received by your company. You want to create an almost identical page that shows net revenue instead of gross revenue.

What should you do? To answer, select the appropriate option in the answer area.

Hot Area:

Answer Area

You should

- modify the RevReceived page
- duplicate the RecReceived page and update the duplicate copy.
- import the RevReceived page.
- copy the visuals from RevReceived to a new page.

Answer Area

You should

- modify the RevReceived page
- duplicate the RecReceived page and update the duplicate copy.
- import the RevReceived page.
- copy the visuals from RevReceived to a new page.

Question #45

Topic 1

DRAG DROP -

A company plans to implement Power BI to analyze retail operations data.

You need to recommend solutions for the company.

Which Power BI components should the company use? To answer, drag the appropriate Power BI components to the correct requirements. Each Power BI component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Power BI components

- reports
- workspaces
- dashboards
- dataset

Answer Area

Requirement

Power BI component

Allow users to set and receive alerts when data changes beyond specified limits.

View and filter data and export data to Microsoft Excel for further manipulation and analysis.

Correct Answer:

Power BI components

- reports
-
- dashboards
-

Answer Area

Requirement

Power BI component

Allow users to set and receive alerts when data changes beyond specified limits.

 workspaces

View and filter data and export data to Microsoft Excel for further manipulation and analysis.

 dataset

Question #46

You create a set of dashboards and reports for a project team that combines data from different sources in Power BI. Some of the data is considered sensitive.
You need to distribute the dashboards and reports securely to the team.
What should you create?

- A. a custom data connector
- B. a published app**
- C. a Microsoft flow
- D. a Power BI workspace

Correct Answer: B

Reference:

<https://docs.microsoft.com/en-us/power-bi/service-how-to-collaborate-distribute-dashboards-reports>

Question #47

DRAG DROP -

You create a Power BI dashboard.

Match each option to its function. To answer, drag the appropriate option from the column on the left to its function on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

Products	Answer Area	Requirement	Product
Share		Ensure that coworkers can see the dashboard.	
Embed		Display data from Microsoft Excel in the dashboard.	
Get Data			
Pin		Add a report tile to the dashboard.	

Correct Answer:

Products	Answer Area	Requirement	Product
		Ensure that coworkers can see the dashboard.	Share
Embed		Display data from Microsoft Excel in the dashboard.	Get Data
		Add a report tile to the dashboard.	Pin

Question #49

Topic 1

A carpet cleaning company uses Dynamics 365 Sales.

The process for entering customer information during onsite sales calls is very complicated. The company wants a simplified screen that allows salespeople to capture the customer name, phone number, and other information while speaking to the customer.

You need to recommend a solution that works on various types of mobile devices.

What should you recommend?

- A. Common Data Service
- B. Power Automate
- C. AI Builder
- D. Canvas app**
- E. Power BI

Correct Answer: D

Reference:

<https://powerapps.microsoft.com/en-us/build-powerapps/>

Question #50

Topic 1

A company manages a chain of retail stores. The company stores a list of retail store names and numbers in one Power BI table. The company stores sales transaction data including a transaction ID in another table. The transaction ID includes the store number.

You need to show the store name for all retail transactions in all Power BI reports.

Which tool should you use?

- A. Query Editor**
- B. Power BI Service
- C. Microsoft Excel
- D. Data Connector

Correct Answer: A

Power BI Desktop comes with Query Editor, where you can connect to one or many data sources, shape and transform the data to meet your needs, then load that model into Power BI Desktop.

Reference:

<https://docs.microsoft.com/en-us/power-bi/desktop-query-overview>

Question #51

Topic 1

DRAG DROP -

A company is using Power BI to build visualizations.

The company's IT support team needs to know when to install Power BI Desktop on users' computers and where the Power BI Service will suffice to perform tasks.

You need to recommend solutions for the company.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools	Answer Area	Requirement	Component
Power BI Service only		Create dashboards.	Tool
Power BI Desktop only		Create reports.	Tool
Power BI Desktop or Power BI Service		Create calculated columns.	Tool
		Configure security.	Tool
		Configure sharing.	Tool

Correct Answer:

Tools	Answer Area	Requirement	Component
Power BI Service only		Create dashboards.	Power BI Service only
Power BI Desktop only		Create reports.	Power BI Desktop or Power BI Service
Power BI Desktop or Power BI Service		Create calculated columns.	Power BI Desktop only
		Configure security.	Power BI Desktop or Power BI Service
		Configure sharing.	Power BI Service only

In a Venn diagram comparing Power BI Desktop and the Power BI service, the area in the middle shows how the two overlap. Some tasks you can do in either

Power BI Desktop or the service. The two sides of the Venn diagram show the features that are unique to the application and the service.

Question #55

DRAG DROP -

A company plans to create an information portal that managers can use to view critical information about their teams.

You need to recommend the type of Power BI components that the company should use.

What should you recommend? To answer, drag the appropriate component types to the correct requirements. Each component type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Component types	Answer Area	Requirement	Component type
Dashboard		Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Component type
Report		Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Component type
		Display Sales charts that can be filtered by region.	Component type

Correct Answer:

Component types	Answer Area	Requirement	Component type
Dashboard		Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Report
Report		Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Dashboard
		Display Sales charts that can be filtered by region.	Report

Box 1: Report -

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard -

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report -

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

Question #56

HOTSPOT -

You have a Power BI report.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input type="radio"/>
You can export data to view supporting data for a KPI.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input checked="" type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input checked="" type="radio"/>
You can export data to view supporting data for a KPI.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes -

If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or .csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.

Note: Export data from a Power BI dashboard

1. Select the ellipsis in the upper-right corner of the visualization.
2. Choose the Export data icon.
3. Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.
4. Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.

Box 2: No -

Underlying data: Select this option if you want to see the data in the visual and additional data from the model (see chart below for details). If your visualization has an aggregate, selecting Underlying data removes the aggregate. When you select Export, Power BI exports the data to an .xlsx file and your browser prompts you to save the file. Once saved, open the file in Excel.

Box 3: Yes -

A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.

Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Question #57

Topic 1

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.

You need to share the Power BI dashboard with coworkers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Publish the dashboard as an app to your coworkers.
- C. Export the data into Common Data Service for others to manipulate in Power BI.
- D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- E. Embed reports in your company's internal web portal.

Correct Answer: ABE

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

Question #58

Topic 1

Your company has an on-premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.
You need to establish a secure connection between the database and the app.
What should you use?

- A. Data source
- B. App
- C. Data gateway
- D. Power Automate

Correct Answer: C

For an on-premises database, identify a data gateway that was shared with you (or create one).

Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/connection-azure-sqldatabase>

Question #59

Topic 1

A recent update has been made to a canvas app.
The update causes usability issues.
You need to roll back the app to a previous version.
What should you do?

- A. Restore the previous version of the app.
- B. Uninstall the app for all users and reinstall by using the package from a previous version.
- C. Deactivate the live app, import the previous version of the app, and then activate the app.
- D. Delete the app and create a new app based on the previous version.

Correct Answer: A

Restore a canvas app to a previous version in PowerApps.

Restore an app from your account

1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.
4. In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app>

Question #60

Topic 1

You are a district manager for a large retail organization. You train each store manager to use Power BI to track sales and daily sales targets. A store manager remembers learning about the Analyze in Excel option but cannot find the option in their Power BI dashboard. You need to help the user resolve the issue.

How should you advise the user?

- A. Install the Power BI Desktop app.
- B. Select the Spotlight button on the dashboard tile.
- C. Subscribe to the dashboard and follow the email link.
- D. Navigate to the report used by the dashboard.

Correct Answer: D

Question #61

Topic 1

DRAG DROP -

You are a district manager for a large retail company. You want to provide sales managers with deeper sales insights to ensure that they can make more informed decisions for their stores.

Store managers must be able to view data in near real-time.

You need to create and share a Power BI dashboard that can be used by the store managers.

Which tools can you use? To answer, drag the appropriate reporting types to the correct requirements. Each reporting type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Reporting types

Power BI Service only

Power BI Desktop only

Power BI Desktop or Power BI Service

Answer Area

Requirement

Create Power BI dashboards that contain a single store's sales information.

Reporting type

Share that dashboard with your retail managers.

Correct Answer:

Reporting types

Power BI Service only

Answer Area

Requirement

Create Power BI dashboards that contain a single store's sales information.

Reporting type

Power BI Desktop only

Share that dashboard with your retail managers.

Power BI Desktop or Power BI Service

Question #63

Topic 1

DRAG DROP -

A company plans to display support call metrics on a screen that is visible to all call center staff.

You need to recommend solutions to meet the company's requirements.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components

Tile	Theme
Template App	Alert
Treemap	DirectQuery
Page	Workspace

Answer Area**Requirement**

Display a chart with incoming calls versus wait time and pin the chart to a dashboard.

Component

--

Send a specific user a notification when the number of customer support calls waiting is over 20.

--

Display metrics from different datasets that have related data.

--

Correct Answer:**Components**

	Theme
Template App	
	DirectQuery
Page	Workspace

Answer Area**Requirement**

Display a chart with incoming calls versus wait time and pin the chart to a dashboard.

Component

Tile

Send a specific user a notification when the number of customer support calls waiting is over 20.

Alert

Display metrics from different datasets that have related data.

Question #66

Topic 1

DRAG DROP -

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each app type to its definition. To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

App types	Answer Area	Definition	App type
model-driven		Quickly create apps for very complex business processes from data in Common Data Service with very little or no code.	
dashboard			
dataset			
canvas		Create simple apps with a highly customizable user interface layouts.	

Correct Answer:

App types	Answer Area	Definition	App type
model-driven		Quickly create apps for very complex business processes from data in Common Data Service with very little or no code.	
dashboard			canvas
dataset			
canvas		Create simple apps with a highly customizable user interface layouts.	model-driven

Box 1: canvas -

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model " building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven -

Question #86

Topic 1

DRAG DROP -

A company is building a model-driven app.

You need to create and configure the objects needed for the app.

Which component categories should you use? To answer, drag the appropriate component categories to the correct objects. Each component category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Component categories	Object	Component category
UI	Relationship between applications	
Data	Entry forms	
Logic	Business rule process	
Visualization	Views to review similar information	

Component categories	Object	Component category
UI	Relationship between applications	Data
Data	Entry forms	UI
Logic	Business rule process	Logic
Visualization	Views to review similar information	UI

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/model-driven-app-components>

Question #87

HOTSPOT -

You are creating a canvas app that will be used in several countries/regions.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Canvas app authoring environment will adapt to the language setting of the author.	<input type="radio"/>	<input type="radio"/>
When running a canvas app on a mobile device, the app adopts the app author's language.	<input type="radio"/>	<input type="radio"/>
Numbers and dates in Power Apps app automatically conform to the regional and language settings for a user's device.	<input type="radio"/>	<input type="radio"/>

Answer Area

Correct Answer:

Statement	Yes	No
Canvas app authoring environment will adapt to the language setting of the author.	<input checked="" type="radio"/>	<input type="radio"/>
When running a canvas app on a mobile device, the app adopts the app author's language.	<input checked="" type="radio"/>	<input type="radio"/>
Numbers and dates in Power Apps app automatically conform to the regional and language settings for a user's device.	<input checked="" type="radio"/>	<input type="radio"/>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/global-apps>

Question #88

Topic 1

HOTSPOT -

A company publishes e-books for independent authors.

The company wants to implement a Power Apps portal solution to make announcements about upcoming books to the general public.

You need to recommend features for the company.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Requirement**

Ensure that book authors can securely access their data.

Ensure consistent page design across the website.

Ensure that the public can access announcements about upcoming books.

Action

- Authenticate external users.
- Access data in Common Data Service.
- Browse content anonymously.
- Customize layouts.

- Authenticate external users.
- Access data in Common Data Service.
- Use page templates.
- Browse content anonymously.

- Authenticate external users.
- Use page templates.
- Browse content anonymously.

Correct Answer:

Answer Area**Requirement**

Ensure that book authors can securely access their data.

Ensure consistent page design across the website.

Ensure that the public can access announcements about upcoming books.

Action

- Authenticate external users.
- Access data in Common Data Service.

Question #90

Topic 1

HOTSPOT -

A company plans to implement Power Apps.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
------------------	------------	-----------

Building Power Apps apps requires proficiency in JavaScript programming.

You must select one of the app templates to create an app.

Answer Area

Statement	Yes	No
------------------	------------	-----------

Correct Answer: Building Power Apps apps requires proficiency in JavaScript programming.

You must select one of the app templates to create an app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/>

Question #91

Topic 1

You create a Power App portal.
When a user signs into the portal the following error displays: User not found
You confirm that the user's sign in information is correct.
You need to determine the cause of the error.
What should you do?

- A. Disable custom error messages.
- B. Create a custom error message.
- C. Enable diagnostic tools in Lifecycle Services.
- D. Enable Maintenance mode.

Correct Answer: C

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring-diagnostics>

Question #93

Topic 1

DRAG DROP -

A company is building a Power Apps portal.

You need to select out-of-the-box portal types to meet the company's requirements.

Which portal types should you use? To answer, drag the appropriate portal types to the correct requirements. Each portal type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Portal types

partner portal

community portal

portal from blank

customer self-service portal

Answer Area

Requirement

Collaboratively onboard new suppliers and distributors.

Publish a blog post announcing new suppliers.

Portal type

Portal type

Portal type

Correct Answer:

Portal types

partner portal

community portal

portal from blank

customer self-service portal

Answer Area

Requirement

Collaboratively onboard new suppliers and distributors.

Publish a blog post announcing new suppliers.

Portal type

partner portal

community portal

Box 1: Partner portal -

A partner portal allows every organization with resellers, distributors, suppliers, or partners to have real-time access to every stage of shared activities.

Box 2: Community portal -

A community portal leverages peer-to-peer interactions between customers and experts to organically grow the catalog of available knowledge from knowledge base articles, forums, and blogs as well as providing feedback through comments and ratings.

Incorrect Answers:

☞ Portal from blank: Create a website to share data with external and internal users. This template comes with sample pages to get you quickly started.

☞ Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates>

Question #94

Topic 1

HOTSPOT -

A user is trying to understand the differences between the various ways apps can be built by using Power Apps.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can embed canvas apps in model-driven apps.	<input type="radio"/>	<input type="radio"/>
A Power Apps portal can use only one data source.	<input type="radio"/>	<input type="radio"/>
You must use Power BI to create reports in model-driven apps.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
You can embed canvas apps in model-driven apps.	<input checked="" type="radio"/>	<input type="radio"/>
A Power Apps portal can use only one data source.	<input type="radio"/>	<input checked="" type="radio"/>
You must use Power BI to create reports in model-driven apps.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes -

You can create a canvas app and then embed that within a model driven app.

Box 2: No -

With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.

Note: Common Data Service lets you securely store and manage data that's used by business applications. Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using Power Query. App makers can then use PowerApps to build rich applications using this data.

Box 3: Yes -

To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data Service.

Reference:

<https://carldesouza.com/how-to-embed-a-canvas-app-in-a-model-driven-app-in-powerapps/> <https://docs.microsoft.com/en-us/powerapps/maker/portals/create-portal> <https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-intro>

Question #95

HOTSPOT -

A user is creating their first canvas app in Power Apps.

The user does not know what types of controls they can include.

You need to recommend solutions for the user.

Which types of controls should you recommend using in Power Apps? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Scenario**

View the date, time, and location of upcoming internal meetings.

Create a meeting request from within the app.

Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.

Control

Meeting-screen template
Gallery
List box

Meeting-screen template
Gallery
List box

Image
People-screen template
Add picture

Correct Answer:

Answer Area**Scenario**

View the date, time, and location of upcoming internal meetings.

Create a meeting request from within the app.

Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.

Control

Meeting-screen template
Gallery
List box

Meeting-screen template
Gallery
List box

Image
People-screen template
Add picture

Box 1: Gallery -

A Gallery control can show multiple records from a data source, and each record can contain multiple types of data. For example, a Gallery control can show multiple contacts with each item showing contact information that includes a name, an address, and a phone number for each contact.

Box 2: Meeting-screen template -

In a canvas app, add a meeting screen that lets users create and send meeting requests from their Office 365 Outlook accounts. Users can search for attendees in their org and add external email addresses. If your tenant has meeting rooms built into Outlook, users can select a location as well.

Box 3: Image -

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

Incorrect Answers:

☞ List box: A list in which the user can select one or multiple items.

☞ With the Add picture control in PowerApps users can take photos or upload image files from their device and update the data source with this content. On a mobile device the user is presented with the device's choice dialog to choose between taking a photo or selecting one already

available.

Question #96

Topic 1

HOTSPOT -

You are designing a Power Apps solution that allows users to upload a status report directly to the company Microsoft SharePoint project management site from their mobile device.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
-----------	-----	----

You should build a model-driven app in Power Apps.

You should build a canvas app in Power Apps.

Users must download and run the Power Apps mobile application to use the solution.

Correct Answer:

Answer Area

Statement	Yes	No
-----------	-----	----

You should build a model-driven app in Power Apps.

You should build a canvas app in Power Apps.

Users must download and run the Power Apps mobile application to use the solution.

Box 1: No -

Box 2: Yes -

Box 3: Yes -

When you create an app, or someone shares an app with you, you can run that app on Windows, iOS, Android, or in a web browser.

Question #97

Topic 1

A company uses Dynamics 365 Supply Chain Management.
The company wants to build customer user interfaces that add additional functionality.
You need to recommend a solution for the company.
What should you recommend?

- A. Power BI
- B. Power Apps canvas apps**
- C. AI Builder
- D. Microsoft Flow

Correct Answer: *B*

Microsoft Power Apps provides a consistent experience for building apps and extending Office 365 and Dynamics 365. Investments include enhancements on Unified Interface, support for embedding canvas apps in model-driven apps and native support of the Common Data Service for Apps.

https://en.wikipedia.org/wiki/General_Data_Protection_Regulation

Question #99

Topic 1

DRAG DROP -

You need to create a mobile application which will allow sales associates to enter custom sales leads.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Go to the Office 365 admin center.	
Add components to the app.	
Create a new Power Apps app.	↖ ↘
Publish the app.	↑ ↓
Save the app.	
Add flows to the app.	

Actions	Answer Area
Go to the Office 365 admin center.	Create a new Power Apps app.
	Add components to the app.
	Save the app.
	↖ ↘
	Publish the app.
Correct Answer: Add flows to the app.

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/build-first-model-driven-app>

Question #100

Topic 1

A company uses Power Apps canvas apps.

When a user opens Power Apps Studio in a browser and selects Apps I can edit, they do not see an app that they need to modify.

You need to determine why the user cannot see the app.

What are three possible reasons? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. The user selected an incorrect Power Apps environment.
- B. The user has not been granted the System Customizer role.
- C. The user has not been set as the app co-owner.
- D. The app has not been shared with the user.
- E. The environment does not have a Common Data Service database.

Correct Answer: ACD

Question #103

Topic 1

You create a canvas app that allows contractors to submit time they work against a project.

Contractors must be able to use the canvas app to enter time. Contractors must not be able to perform any other actions in the app.

You need to configure permissions for the contractors.

Which type of permissions should you use?

- A. application-level
- B. task-level
- C. record-level
- D. field-level

Correct Answer: D

Field-level security feature to allow more granular control of security at the field level.

Incorrect Answers:

C: Record-level privileges that determine the level of access a user has to a specific record or record type.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges> <https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds>

Question #104

DRAG DROP -

You are creating a model-driven app to track requests for quotes.

The app must use the following navigation structure:

Sales -

- Sales Log
- Request for Quotes
- Projects
- Settings
- Customers
- Product Lines
- Sales Territories

Administration -

- User Admin
- Users
- Roles

You need to create the app navigation.

Which sitemap component types should you use? To answer, drag the appropriate component types to the correct navigation elements. Each component type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Component types		Answer Area	
		Navigation element	Component type
<input type="checkbox"/> Area		Administration	<input type="checkbox"/> Component type
<input type="checkbox"/> Group		Sales log	<input type="checkbox"/> Component type
<input type="checkbox"/> Subarea		Customers	<input type="checkbox"/> Component type

Question #105

Topic 1

DRAG DROP -

You plan to use Power Automate to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components	Answer Area	Requirement	Component
action			Component
expression	Retrieve the top five posts from your company's Facebook page.		Component
service	Enter the resulting posts into the product database.		Component
trigger	Combine author and link fields into a single field.		Component
	Run flow every hour.		Component

Correct Answer:

Components	Answer Area	Requirement	Component
action			action
expression	Retrieve the top five posts from your company's Facebook page.		action
service	Enter the resulting posts into the product database.		action
trigger	Combine author and link fields into a single field.		expression
	Run flow every hour.		trigger

Box 1: Action -

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to retrieve the top five posts from a Facebook page.

Box 2: Action -

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to insert records into a database.

Box 3: Expression -

Sometimes users just need to do basic operations like getting the current time, adding numbers together, or replacing a part of a string of text. That's possible inline in any flow action. Microsoft Flow leverages the same Workflow Definition Language used by Azure Logic apps. For now, users who are unfamiliar with the expression language, there is an inline help experience that shows how to use each expression as they

For users who are unfamiliar with the expression language, there is an entire topic experience that shows how to use each expression as they build out their flow.

Box 4: Trigger -

A trigger is something that triggers or starts the workflow. It could be a new file uploaded to a document library, a new item created in the list or an email sent to your Inbox — something that will start (kick-off the workflow).

There are two types of triggers:

- ⇒ Automatic trigger is pre-programmed into the workflow based on a certain rule (i.e. new document or item created, email sent, etc.)
- ⇒ Manual Trigger is a trigger initiated by a user. Unlike with automatic trigger above, the workflow will only start when initiated manually by the end user (for example, from the Document Library for a selected file). Manual trigger is only supported for certain types of workflows (i.e. Get feedback from your manager for the selected file)

Reference:

<https://sharepointmaven.com/3-major-components-microsoft-flow/> <https://www.avepoint.com/blog/office-365/office-365-automation/>
<https://flow.microsoft.com/de-de/blog/use-expressions-in-actions/> <https://docs.microsoft.com/en-us/power-automate/getting-started>

Question #106

Topic 1

You are new to working with Microsoft Flow. You create a flow that extracts birth dates for users and then sends a birthday greeting email to users on their birthday.

The flow does not properly extract birth dates.

Where should you make changes?

- A. Connectors
- B. Expression
- C. Templates

Correct Answer: A

Select the new Date Time connector. There you will see all of the actions, which help you to convert time zones to format them for local time in an email, add or subtract times, or just get the current time.

Reference:

<https://flow.microsoft.com/en-us/blog/nested-apply-to-each/>

Question #107

DRAG DROP -

A company plans to use Power Automate to automate tasks.

Match each flow type to its description. To answer, drag the appropriate flow type from the column on the left to its description on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

Flow types	Answer Area	Description	Flow type
automated		a flow that runs after it is triggered by an event	Flow type
business process		a flow that guides a user through a set of tasks	Flow type
scheduled		a flow that runs after a specified number of days	Flow type
instant		a flow that allows you to start tasks on-demand	Flow type

Correct Answer:

Flow types	Answer Area	Description	Flow type
automated		a flow that runs after it is triggered by an event	automated
business process		a flow that guides a user through a set of tasks	business process
scheduled		a flow that runs after a specified number of days	scheduled
instant		a flow that allows you to start tasks on-demand	instant

Box 1: automated -

Automated flows start with an event or trigger, such as an email being received. These also support a multitude of actions in the 200+ Flow connectors.

Box 2: business process -

The business process flow that creates stages or screens that enforce a certain sequence of steps. It collects data from users for each step in the stage and can kick off automated workflows.

Box 3: scheduled -

Scheduled flows run regular reports that are sent out to a team and summarize everything that's happened in the past week. This includes everything from simple daily scheduling to more complex scheduling like "every 3rd Monday."

Box 4: instant -

An instant flow is triggered when you click a button inside of the Flow mobile app, SharePoint, Dynamics, PowerApps, or Excel that passes context directly into your flow.

Note: There are four different Flow types that you can choose from when starting out. You can create a scheduled flow, automated flow, instant flow, or a business process flow.

Question #109

Topic 1

A company has a website. The website includes a form that allows the company to collect information about leads.

You need to set up an automated workflow to create leads in Dynamics 365 Sales when leads are created on the company's custom website.

What should you create?

- A. Task Flow
- B. Power Automate flow
- C. Dynamics 365 workflow
- D. Business Process Flow

Correct Answer: B

Question #110

Topic 1

A company builds and sells residential apartments. The company uses Dynamics 365 Sales to manage sales opportunities.

Management must receive notifications on their mobile devices when sales opportunities are created.

You need to select recommend Power Platform components to address the requirements.

Which two components should you recommend? Each correct answer presents part of the solution.

NOTE: Each selection is worth one point.

- A. Common Data Service connector
- B. Power BI
- C. Power Automate
- D. AI Builder

Correct Answer: C

Reference:

<https://www.powerobjects.com/blog/2019/04/05/flow-approval-process/>

Question #111

Topic 1

A company uses Microsoft 365, SharePoint Online, and Dynamics 365 Sales.

You need to recommend tools to build a solution that meets the following requirements:

Synchronize data daily -

- from an external Microsoft SQL Server instance.
- Send a report automatically to specific company executives.
- Ensure that opportunities over a specified amount are approved by a sales manager.

Which two tools or components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Excel
- B. Microsoft Word
- C. Power BI
- D. Common Data Service**
- E. Power Automate

Correct Answer: DE

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/data-integrator> <https://www.powerobjects.com/blog/2019/04/05/flow-approval-process/>

Question #112

Topic 1

HOTSPOT -

You plan to send an email notification to a user when a new file is placed in a specific folder in OneDrive for Business.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
-----------	-----	----

You can create a flow without writing a single line of code and deploy the flow to a production environment.

You cannot add additional actions to the built-in Power Automate templates.

You can view the code that implements workflow actions and triggers without installing additional software.

Correct Answer:

Answer Area

Statement	Yes	No
-----------	-----	----

You can create a flow without writing a single line of code and deploy the flow to a production environment.

You cannot add additional actions to the built-in Power Automate templates.

You can view the code that implements workflow actions and triggers without installing additional software.

Question #113

Topic 1

HOTSPOT -

For which scenarios can you use Power Automate?

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Notify team members when a response is recorded in a form in Microsoft Forms.	<input type="radio"/>	<input type="radio"/>
When email is received, save email attachments to OneDrive for Business.	<input type="radio"/>	<input type="radio"/>
Receive notifications when negative comments about the company are posted on Twitter.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Notify team members when a response is recorded in a form in Microsoft Forms.	<input checked="" type="radio"/>	<input type="radio"/>
When email is received, save email attachments to OneDrive for Business.	<input checked="" type="radio"/>	<input type="radio"/>
Receive notifications when negative comments about the company are posted on Twitter.	<input checked="" type="radio"/>	<input type="radio"/>

Question #114

Topic 1

DRAG DROP -

A project deadline is approaching. The project manager reports that there are still a number of critical tasks that are not complete.

You need to implement Power Automate to help streamline processes.

Which types of flows should you use? To answer, drag the appropriate flow types to the correct requirement. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Flow types	Answer Area	Requirement	Flow type
automated		Ensure that all of the steps for completing tasks are consistently followed by all team members.	
instant		Allow users to send an email to the project lead whenever a task is completed.	
scheduled		Automatically send a list of completed tasks at the end of each week.	
business process			

Correct Answer:

Flow types	Answer Area	Requirement	Flow type
		Ensure that all of the steps for completing tasks are consistently followed by all team members.	business process
instant		Allow users to send an email to the project lead whenever a task is completed.	automated
		Automatically send a list of completed tasks at the end of each week.	scheduled

Question #115

DRAG DROP -

A company provides on-site architectural consulting services to residential and business customers. The company wants to implement a simple alert system where a consultant can press a button on their mobile device to send the user's location to the company as a text notification. You need to build a button flow that sends the notification.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Add a new step to the flow.

Add a trigger.

Select a connector and action to send text notifications.

Set the actions properties.

Save the flow.

Answer Area

Correct Answer:

Actions

Answer Area

Add a new step to the flow.

Select a connector and action to send text notifications.

Set the actions properties.

Add a trigger.

Save the flow.

Reference:

<https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens#main>

Question #116

Topic 1

HOTSPOT -

A company is using Power Automate to automate business processes.

You need to recommend triggers for Instant flows.

What trigger types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Requirement**

Run a flow when the user presses a button in a canvas app.

Trigger type

<input type="checkbox"/>
PowerApps
for a selected row
manually trigger a flow
for a selected file (OneDrive for a Business)

Run a flow when user presses a button in the mobile Flow app.

<input type="checkbox"/>
PowerApps
for a selected row
manually trigger a flow
for a selected file (SharePoint)

Correct Answer:

Answer Area**Requirement**

Run a flow when the user presses a button in a canvas app.

Trigger type

<input checked="" type="checkbox"/>
PowerApps
for a selected row
manually trigger a flow
for a selected file (OneDrive for a Business)

Run a flow when user presses a button in the mobile Flow app.

<input checked="" type="checkbox"/>
PowerApps
for a selected row
manually trigger a flow
for a selected file (SharePoint)

Question #117

Topic 1

A company uses Dynamics 365 Supply Chain Management.

You need to use Power Automate to automate the process of receiving and tracking raw materials.

Which type of connector should you use?

- A. Common Data Service
- B. Dynamics 365
- C. Dynamics 365 for Fin & Ops
- D. Dynamic Signal

Correct Answer: A

Dynamics 365 for Finance and Operations is now being licensed as Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

You can use Common Data Service to enable the flow of data between Finance and Operations apps and Dynamics 365 Sales.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/data-integration-cds>

Question #118

Topic 1

A company performs on-site inspections and services for air industrial equipment.

Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance steps in a different order. Some technicians miss steps.

You need to ensure that all technicians perform the same steps in the same order.

What should you use?

- A. Business process flow
- B. AI Builder
- C. Business rule
- D. Virtual Agent

Correct Answer: A

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview>

Question #119

Topic 1

You have a Power Automate flow that saves attachments from emails into OneDrive for Business.

You need to determine why the flow is not working.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Navigate to the Power Automate admin center and view the projects.

B. Navigate to the Action Items section of the Power Automate portal.

C. Enable Repair Tips for the flow.

D. Navigate to the flow and view the run history.

E. Navigate to the Power Automate web portal and click view notifications.

Correct Answer: BCD

Reference:

<https://docs.microsoft.com/en-us/power-automate/fix-flow-failures>

Question #120

Topic 1

You are building a Power Automate flow to manage sales.

The sales team saves quotes as PDF files to a Microsoft OneDrive folder. You create a Microsoft SharePoint list to help the sales team manage follow ups to quotes.

You need to copy the customer name, phone number, and the amount of the potential sale from the sales quote and insert the data into the SharePoint list.

Which AI Builder model should you use?

A. key phrase extraction

B. sentiment analysis

C. text recognition

D. language detection

Correct Answer: C

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognition>

Question #121

Topic 1

HOTSPOT -

A business plans to including AI Builder.

Which actions can you perform?

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and analyze its meaning.	<input type="radio"/>	<input type="radio"/>
You can tag Instagram posts that mention your new product.	<input type="radio"/>	<input type="radio"/>
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and analyze its meaning.	<input checked="" type="radio"/>	<input type="radio"/>
You can tag Instagram posts that mention your new product.	<input checked="" type="radio"/>	<input type="radio"/>
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	<input checked="" type="radio"/>	<input type="radio"/>

Correct Answer:

You can tag Instagram posts that mention your new product.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/text-classification-model-in-flow>

Question #122

Topic 1

A company wants users to start using Power Automate to improve personal productivity.

You need to create a flow.

Which two elements must you include? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. expression
- B. condition
- C. action
- D. trigger

Correct Answer: CD

Reference:

<https://docs.microsoft.com/en-us/power-automate/get-started-logic-flow>

Question #123

Topic 1

HOTSPOT -

A company plans to use Power Apps to connect to a series of custom services. There are no connectors available for the custom services.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Custom connectors for customer-specific services do not require review and certification by Microsoft.	<input type="radio"/>	<input type="radio"/>
You can build a custom connector once and reuse the connector for Power Apps and Power Automate.	<input type="radio"/>	<input type="radio"/>
You can make custom connectors publicly available for all Power Platform users without having Microsoft certify the connector.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
Custom connectors for customer-specific services do not require review and certification by Microsoft.	<input checked="" type="radio"/>	<input type="radio"/>
You can build a custom connector once and reuse the connector for Power Apps and Power Automate.	<input checked="" type="radio"/>	<input type="radio"/>
You can make custom connectors publicly available for all Power Platform users without having Microsoft certify the connector.	<input type="radio"/>	<input checked="" type="radio"/>

Correct Answer:

You can build a custom connector once and reuse the connector for Power Apps and Power Automate.

Box 1: Yes -

Only if you would like to share your connector with all users of Logic Apps, Power Automate, and PowerApps, you can submit your connector for Microsoft certification. Microsoft will review your connector.

Box 2: Yes -

Connectors created in Power Automate are available in PowerApps. Likewise, connectors created in PowerApps are available in Power Automate.

Box 3: No -

If you would like to share your connector with all users of Logic Apps, Power Automate, and PowerApps, you can submit your connector for Microsoft certification.

Microsoft will review your connector.

Reference:

<https://docs.microsoft.com/en-us/connectors/custom-connectors/>

Question #124

Topic 1

You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365.

You need to identify the three types of events that can generate a trigger for the tasks.

Which three types of events should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. when a record is displayed in a view

B. when a record is deleted

C. when a record is created

D. when a record is updated

E. when a record is read

Correct Answer: *BCD*

Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.

Reference:

<https://docs.microsoft.com/en-us/power-automate/connection-dynamics365>

Question #125

Topic 1

A company uses Dynamics 365 Supply Chain Management.

When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required.

You need to implement the functionality to create Outlook tasks.

Which two features should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. Power Apps
- C. Business Events
- D. Power Automate
- E. Common Data Service

Correct Answer: CD

Business events in Microsoft Power Automate

Business events can be consumed in Microsoft Power Automate via the application connector. The connector has a trigger that is named when a business event occurs. This trigger can be used to subscribe to any of the business events that are available in the target instance of the application.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/business-events/business-events-flow>

Question #126

Topic 1

HOTSPOT -

A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts.

The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area**Requirement**

Create an approval workflow.

Solution

Dynamics 365 Workflow Notifications
Microsoft Outlook Integration
AI Builder
Microsoft Flow

Connect to report data.

Common Data Service and Power BI
Third-party from AppSource
Custom Code flat file integration
Dynamics 365 Field Service

Answer Area**Requirement**

Create an approval workflow.

Solution

Dynamics 365 Workflow Notifications
Microsoft Outlook Integration
AI Builder
Microsoft Flow

Correct Answer:

Connect to report data.

Common Data Service and Power BI
Third-party from AppSource
Custom Code flat file integration
Dynamics 365 Field Service

Box 1: Dynamics 365 Workflow notifications

You can configure the system to send email messages to users when workflow-related events occur.

Note:

1. Go to Navigation pane > Modules > System administration > Users > Users.
2. In the list, find and select the desired record.
3. On the Action pane, click User options.
4. Click the Workflow tab. Make sure that the Notifications section is expanded. In the Notifications section, you can specify how you want the user to be notified about workflow-related events.

Box 2: Dynamics 365 Field Service

Supply Chain Management enables synchronization of business processes between Dynamics 365 Supply Chain Management and Dynamics 365 Field Service.

The integration scenarios are configured by using extensible Data integrator templates and Common Data Service to enable the synchronization of business processes. Standard templates can be used to create custom integration projects, where additional standard and custom fields and entities can be mapped to adjust the integration and meet specific business needs.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/organization-administration/tasks/users-receive-workflow-related-email-messages>

Question #127

Topic 1

This question requires that you evaluate the underlined text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.

Review the underlined text. If it makes the statement correct, select **No change is needed.** If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a scheduled
- C. an instant
- D. an action

Correct Answer: D

Note: Create a flow (see step 6 below)

1. Sign in to PowerApps.
2. In the left navigation bar, select Business logic, and then select Flows.
3. In the upper-left corner of the My Flows page, select New, and then select Create from blank.
4. Option to create a flow without using a template
Near the bottom of the page that appears, select Search hundreds of connections and triggers.
5. In the search box, type PowerApps, and then select the PowerApps icon.
6. Create a PowerApps trigger
7. On the next page, select the PowerApps icon again, and then select New step.
8. In the box that says Search connectors and actions, specify an action for your flow, as in this example:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/using-logic-flows>

Question #128

DRAG DROP -

You build a flow using a template. You want to add support for additional business scenarios.

You need to ensure that the new workflow does not break existing functionality.

Which flow editing utilities should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools**Answer Area**

Test

Requirement**Tool**

Flow Checker

Check the new flow for any errors or warnings.

Tool

Run the flow using previously processed data.

Tool

Monitor the flow as it is running.

Tool

Correct Answer:**Tools****Answer Area****Requirement****Tool**

Test

Check the new flow for any errors or warnings.

Flow Checker

Flow Checker

Run the flow using previously processed data.

Test

Monitor the flow as it is running.

Test

Box 1: Flow Checker -

The Flow checker feature will promote higher quality flows by ensuring you follow best practices. By running the checker, you will be able to get answers to questions like: which areas of my flow implementation pose a performance or reliability risk?

For each issue identified, the Flow checker points to specific occurrences within the flow where improvements may be required. And more importantly, you learn how to implement these improvements by following detailed guidance.

Box 2: Test -**Box 3: Test -****Reference:**

<https://flow.microsoft.com/en-us/blog/flow-checker-four-connectors/> <https://docs.microsoft.com/en-us/power-automate/modern-approvals>

Question #129

Topic 1

You use Power Automate for personal productivity.

You often overwrite working flows by editing the definitions. You are unable to undo changes after saving a flow.

You need to be able to revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Export

B. Rename

C. Save As

D. Share

Correct Answer: AC

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

Here's how:

Go to your My flows page. Click on the More () menu item next to the flow that you want to create a copy of. Click on the Save As command.

Reference:

<https://flow.microsoft.com/en-us/blog/import-export-bap-packages/> <https://flow.microsoft.com/en-us/blog/make-a-copy/>

Question #130

Topic 1

You use Power Automate to create a flow that automatically sends email to a project manager when project team members mark a task as complete.

Project team members are prematurely marking tasks as complete. Project leads must validate that tasks are complete before an email is sent to the project manager to announce task completion.

You need to modify the flow.

Which component should you use?

- A. a process argument
- B. a condition**
- C. an expression
- D. a trigger
- E. a solution

Correct Answer: B

Use a condition and set the action to send an email.

Reference:

<https://docs.microsoft.com/en-us/power-automate/add-condition>

Question #131

Topic 1

A company uses Power Automate.

Which three items can trigger flows? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Lifecycle Services**
- B. Microsoft 365 Admin center
- C. Common Data Service
- D. Microsoft Outlook 365**
- E. Microsoft Windows Desktop

Correct Answer: ACD

Reference:

<https://docs.microsoft.com/en-us/power-automate/email-triggers> <https://docs.microsoft.com/en-us/power-automate/connection-cds>

<https://dynamics365.wordpress.com/category/powerapps/>

Question #132

Topic 1

HOTSPOT -

A software company plans to use Power Automate.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You must certify custom connectors before users in other departments within your organization can use the connectors.	<input type="radio"/>	<input type="radio"/>
You must use Microsoft Azure API apps to create a public custom connector.	<input type="radio"/>	<input type="radio"/>

Answer Area

	Statement	Yes	No
Correct Answer:	You must certify custom connectors before users in other departments within your organization can use the connectors.	<input type="radio"/>	<input checked="" type="radio"/>
	You must use Microsoft Azure API apps to create a public custom connector.	<input checked="" type="radio"/>	<input type="radio"/>

Question #133

Topic 1

A company is using Power Automate to automate business processes.

You need to run a flow when a user presses a button in an app.

Which trigger type should you recommend?

- A. Power Apps
- B. for a selected row
- C. manually trigger a flow

Correct Answer: A

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/using-logic-flows>

Question #134

Topic 1

A company uses Dynamics 365 Customer Service. The company uses a manual process to manage call escalations.

You must use Power Automate to automate the process for routing escalated calls.

You need to create the flow.

Which type of connector should you use?

- A. Microsoft Excel
- B. Common Data Service
- C. Office 365 Users

Correct Answer: B

Question #135

Topic 1

You are creating a Power Automate flow.

The flow must read each item in a Microsoft SharePoint list that details sales opportunities and set the value for a field named Status to Overdue if the value of a field named Follow up is less than or equal to the current date.

You need to select the appropriate component to cycle through the entire list.

Which component should you use?

- A. Condition
- B. Connector
- C. Action
- D. Trigger

Correct Answer: A

Reference:

<https://docs.microsoft.com/en-us/power-automate/use-expressions-in-conditions>

Question #136

Topic 1

HOTSPOT -

You are creating a Power Automate approval flow.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
------------	-----	----

The addition of an expense report to a Microsoft OneDrive folder can initiate an approval flow.

Approvals must follow a sequential order of approval.

Answer Area

Statements	Yes	No
------------	-----	----

Correct Answer: The addition of an expense report to a Microsoft OneDrive folder can initiate an approval flow.

Approvals must follow a sequential order of approval.

Box 1: Yes -

Box 2: No -

Parallel approvals, integrated approvals, and unanimous approvals are also allowed.

Reference:

<https://docs.microsoft.com/en-us/power-automate/modern-approvals> <https://docs.microsoft.com/en-us/power-automate/create-approval-response-options>

Question #137

Topic 1

A company uses Power Automate.

Each time a work order is created, a service manager must review and approve the work order before a worker is dispatched.

You need to create a flow to enforce the process.

What should you create?

- A. plug-in
- B. approval flow**
- C. business rule
- D. team flow
- E. instant flow
- F. scheduled flow

Correct Answer: B

With Power Automate, you can manage the approval of documents or processes across several services, including SharePoint, Dynamics 365, Salesforce, OneDrive for Business, Zendesk, or WordPress.

Reference:

<https://docs.microsoft.com/en-us/power-automate/modern-approvals>

Question #138

Topic 1

You are planning to allow members of your team to test your chatbot. You must ensure this is done in a secure way.

A team member named User1 must test the chatbot.

You need to ensure that User1 can complete testing.

What should you do?

- A. Sign in to the authoring environment as the chatbot author.**
- B. Sign in to Microsoft Azure DevOps as the chatbot author.
- C. Sign in to Microsoft Azure DevOps as User1.
- D. Sign in to the authoring environment as User1.

Correct Answer: A

Question #139

Topic 1

HOTSPOT -

You are authoring a Power Virtual Agents chatbot for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
------------	-----	----

You must create a custom action to display a knowledge base article that answers a common support question.

You can use Power Automate to retrieve a customer's contact number in order to verify they are an authorized user and their support plan SLA.

Answer Area

Statements	Yes	No
------------	-----	----

Correct Answer: You must create a custom action to display a knowledge base article that answers a common support question.

You can use Power Automate to retrieve a customer's contact number in order to verify they are an authorized user and their support plan SLA.

Question #140

Topic 1

HOTSPOT -

You create a Power Virtual Agents chatbot for use with Microsoft Teams. You are testing the chatbot.

Testers report the following issues:

- Changes that you make to the chatbot are not seen by testers.
- When users enter the word refund the chatbot must ask the user the product for which they would like a refund. The chatbot does not ask the user for product information.

You need to determine what needs to be done to fix the issues.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Missing changes

Create a new chatbot.
Publish the chatbot.
Save the topic.
Share the chatbot.

Refund responses are not working as expected.

Change security.
Create a refund topic.
Create a refund chatbot.

Answer Area

Missing changes

Create a new chatbot.
Publish the chatbot.
Save the topic.
Share the chatbot.

Correct Answer:

Refund responses are not working as expected.

Change security.
Create a refund topic.
Create a refund chatbot.
